The Group is dedicated to disease and technologies areas that are clinically driven, therapeutically validated, and aligned with the direction of modern medicine. It promotes the development and commercialization of innovative technologies and products through diversified and multi-tiered collaboration models, including in-house R&D, co-development, licensing, and industrial investments.

During the Reporting Period, under the guidance of the "4IN" strategy (Innovation, Internationalization, Intelligentization and Integration), the Group persisted in the development pattern of "innovation and transformation, integrated operation and steady development" and the mission of creating value for the shareholders, and continued to advance innovation-driven transformation, actively deploy internationalization, reinforce business focus, drive integrated operations and efficiency enhancement..

During the Reporting Period, the Group's performance was primarily driven by the optimization of its product portfolio and sales growth resulting from the launch of innovative products. During the Reporting Period, the revenue of core products of serplulimab injection (trade name in Chinese mainland: Han Si Zhuang), an innovative anti-PD-1 monoclonal antibody drug, Yi Kai Da (ejilunsai injection), the CAR-T cell therapy product, Akynzeo, the antiemetic drug, Pei Jin (telpegfilgrastim injection), a long-lasting recombinant human granulocyte colony-stimulating factor product, and Yi Xin Tan (sacubitril valsartan sodium tablets), a drug for the treatment of heart failure and hypertension, recorded rapid growth.

During the Reporting Period, the Group also continued to sharpen its business focus, accelerated the integration of its R&D, production and marketing systems, and enhanced operational efficiency, with synergistic effects gradually becoming evident. Furthermore, the Group deepened global collaboration and expedited the international expansion of its products. By leveraging differentiated competitive advantages, it addressed diverse demands in overseas markets, further broadening regional coverage and business depth. As a result, the proportion of international operations further increased.

During the Reporting Period, a total of 16 indications[1] of 7 innovative drugs/biosimilars independently developed or licensed-in by the Group were approved for launch, mainly including: 1 additional indication for Han Si Zhuang (serplulimab injection) was approved in Chinese mainland; Trastuzumab injection was approved for launch in the United States and Canada; 4 additional indications for Han Da Yuan (adalimumab injection) were approved in Chinese mainland; Rabies vaccine (Vero cell) for human use (freeze dried) was approved in Chinese mainland; 2 indications for botulinum toxin type A for injection (trademark in Chinese mainland: ®) was approved in Chinese mainland; the second indication of Su Ke Xin (avatrombopag maleate tablets) was approved in Chinese mainland; Pu Rui Ni (Pretomanid tablets) was approved in Chinese mainland.

During the Reporting Period, 8 innovative drugs/biosimilars independently developed, co-developed or licensed-in by the Group, entered into the pre-launch approval/key clinical trial stage, and a total of 18 innovative drug/biosimilar projects (calculated by indication) were approved for clinical trial. Meanwhile, the medical devices and medical diagnosis segment also rolled out major offerings successively.

1 Counted on the number of indications listed on the regulatory approvals received domestically and overseas

During the Reporting Period, the Group continued to implement its internationalization strategy in multiple dimensions including innovative R&D, licensing partnership, production and operation as well as commercialization. The Group enhanced its operational efficiency and expanded global market presence, primarily covering the U.S., Europe, Africa, India, Southeast Asia and other overseas markets.

In matured regulatory markets, the Group continued to enhance its global operation capabilities. It has set up multi-point R&D centers to realize global innovation, and further improved the commercialization system in different regulated markets through self-establishment, cooperation and other means. In the U.S. market, the Group has established a growing self-operated generic drug team, and cooperated with major distributors and group purchasing organizations (GPOs) to facilitate sales of preparations products, with 33 products in the market as at the end of the Reporting Period. The Group also established an innovative drug team in the U.S., and initiated the preparation works on the commercialization of serplulimab injection (anti-PD-1 monoclonal antibody). In the European market, the Group, through its subsidiary Cenexi, has built up local manufacturing capabilities in Europe. In addition, the subsidiary Sisram Medical, after completing the acquisition of the direct sales channels in China in 2023 and achieving a direct sales layout in the Chinese market, established new direct sales channels in Thailand during the Reporting Period, which continues to strengthen its footprint in the Asia-Pacific market. The marketing network of Breas, a subsidiary, has also covered mature markets such as Europe, the U.S., Japan and Australia.

As for emerging markets, in Africa, the Group primarily conducted medical product export and distribution business in the English-speaking and French-speaking regions in Sub-Saharan Africa, with sales network covering over 40 countries and regions. Meanwhile, in order to realize localization in drug manufacturing and supply in Africa, the Group continued to advance the park construction in the Cote d'Ivoire. Furthermore, the Group also continuously strengthened its product export channels and system development by establishing a new pharmaceutical and medical device sales platform in Nanning in February 2025, which will gradually advance the Group's registration and commercialization capabilities in Southeast Asia, so as to expand the local market.

The Group continued to improve its commercialization system by optimizing the market layout and sales channels. As at the end of the Reporting Period, the pharmaceutical manufacturing segment had a commercialization team consisting of over 5,000 employees in Chinese mainland, covering hospitals, retail channels, etc. In terms of core departments such as hematology, lymphoma, breast, medical oncology, endocrinology, cardiology, rheumatology and nephrology, through the systematic market access team and special product team, the Group explored the innovative product market in core therapeutic areas, and covered county-level and certain prefecture-level markets in Chinese mainland through the broad market team. In addition, the Group solidified and expanded the sales channels of its pharmaceutical products by virtue of the cooperation and linkage with Sinopharm, an associated company.

In terms of commercialization in overseas markets, as at the end of the Reporting Period, the overseas commercialization team of pharmaceutical manufacturing and medical devices segments has over 1,000 employees. In the U.S. market, the Group has established the U.S. innovative drug team. In emerging markets such as Africa, the Group has set up 5 regional drug distribution centers, and continues to improve the core digital management capabilities, user operation capabilities and B2B2C model service capabilities so as to provide one-stop services consisting of registration, circulation, academic promotion and post-launch safety alert and other services for customers. The medical devices segment has continued expanding its global marketing network. As at the end of the Reporting Period, Sisram Medical has expanded its global direct-sales offices to 12, with marketing network now spanning over 110 countries and regions worldwide. The share of direct sales revenue has further increased to 87% during the Reporting Period. At the same time, Breas has expanded its marketing network to cover mature markets such as Europe, the U.S., China, Japan, India, and Australia.

In addition, during the Reporting Period, the Group also released the clinical data for multiple pipeline candidates and marketed products at global industry academic conferences such as the American Society of Clinical Oncology (ASCO), the Annual Meeting of the American Association for Cancer Research (AACR), the European Society for Medical Oncology (ESMO), the World Conference on Lung Cancer (WCLC), and the European Hematology Association (EHA), as well as in globally

During the Reporting Period, cost of sales of the Group decreased to RMB21,366 million from RMB21,595 million, representing a year-on-year decrease of 1.06%.

During the Reporting Period, gross profit of the Group amounted to RMB19,544 million, representing a decrease of 0.55% as compared with RMB19,653 million for 2023. The gross profit margin of the Group for 2024 and 2023 was 47.77% and 47.64%, respectively. This year, the gross profit margin increased by 0.13 percentage point as compared to 2023, mainly due to the increase in the proportion of new and sub-new products with relatively high gross profit margins in total revenue.

During the Reporting Period, the total R&D expenditure of the Group amounted to RMB5,554 million. In particular, the R&D expenses amounted to RMB3,644 million. During the Reporting Period, the R&D expenditures in the pharmaceutical manufacturing segment amounted to RMB4,910 million, accounting for 16.98% of the revenue from the pharmaceutical manufacturing segment. In particular, R&D expenses amounted to RMB3,071 million, accounting for 10.62% of the revenue from the pharmaceutical manufacturing segment, mainly due to the fact that during the Reporting Period, the Group concentrated on quality pipeline assets and enhanced efficiency by integrating its R&D system; as the R&D projects advance, multiple pipelines met the criteria for capitalization recognition, leading to the R&D investment of several projects transferred to development expenditure; in addition to self-initiated R&D, the Group actively implemented an open R&D model by leveraging industry funds and other mechanisms to incubate R&D projects, so as to ensure the sustainability of innovation and R&D investment.

During the Reporting Period, share of profits of associates of the Group decreased to RMB1,828 million from RMB2,387 million, representing a decrease of 23.42% as compared to last year.

Due to the above factors, profit for the year of the Group increased to RMB3,512 million from RMB2,907 million, representing an increase of 20.81% as compared to last year. Net profit margin of the Group for 2024 and 2023 was 8.59% and 7.05%, respectively.

During the Reporting Period, profit for the year attributable to owners of the parent of the Group increased to RMB2,770 million from RMB2,399 million, representing an increase of 15.46% as compared to last year.

As at 31 December 2024, total debts of the Group increased to RMB33,064 million from RMB32,574 million as at 31 December 2023 mainly due to the increase in interest-bearing liabilities scale during the Reporting Period. As at 31 December 2024, mid-to-long-term debts of the Group accounted for 31.59% of its total debts, representing a decrease of 9.87 percentage point as compared to 41.46% as at 31 December 2023. As at 31 December 2024, cash and bank balances fell by 1.24% to RMB13,524 million from RMB13,694 million as at 31 December 2023.

As at 31 December 2024, an equivalent amount of RMB4,550 million (31 December 2023: RMB6,768 million) out of the total debts of the Group was denominated in foreign currencies, and the remainder was denominated in RMB.

As at 31 December 2024, cash and bank balances of the Group denominated in foreign currencies amounted to RMB3,964 million (31 December 2023: RMB3,457 million).

Over 5 years	1,047
Total	32,574

As at 31 December 2024, save for cash and bank balances of RMB13,524 million, the Group had unutilized banking facilities of RMB22,271 million in aggregate. The Group has also entered into cooperation agreements with various major banks (the " ") in China. According to such agreements, the Banks have granted the Group general banking facilities to support its capital requirements. The utilization of such bank facilities was subject to the approval of individual projects from the Banks in accordance with banking regulations in China. As at 31 December 2024, total available banking facilities under these arrangements were approximately RMB55,866 million in aggregate, of which RMB33,595 million had been utilized.

On 12 October 2023, the Company obtained approval from the CSRC to publicly issue corporate bonds not exceeding RMB8 billion to professional investors. The approval shall be valid within 24 months from the date of the CSRC's approval for registration. As at the date of this report, no corporate bonds have been issued pursuant to the approval.

As at 31 December 2024, the Group had placed the following assets as collateral for bank borrowings: property, plant and equipment amounting to RMB2,597 million (31 December 2023: RMB2,117 million), prepaid land lease payments amounting to RMB615 million (31 December 2023: RMB615 million), trade and bills receivables amounting to RMB24 million (31 December 2023: nil), and patents among other intangible assets amounting to RMB227,000 (31 December 2023: RMB355 million).

As at 31 December 2024, the Group had pledged the following for bank borrowings: 6.00% equity interest in a subsidiary Jianjia Healthcare and 58.67% equity interest in a subsidiary Suzhou Abcarta (31 December 2023: 58.67% equity interest in a subsidiary Suzhou Abcarta). Details of the collateral and pledged assets are set out in note 34 to the financial statements.

The cash of the Group is mainly used for meeting capital requirements, repaying interest and principal of debts due, paying for purchases and capital expenditures, and funding growth and expansion of facilities and businesses of the Group. The table below shows the cash flow of the Group generated from (or used in) operating activities, investing activities and financing activities for 2024 and 2023.

Unit: million Currency: RMB

	31 December 2023
Net cash flows from operating activities	3,414
Net cash flows used in investing activities	(3,819)
Net cash flows (used in)/from financing activities	1,336
Net (decrease)/increase in cash and cash equivalents	(1,668)
Cash and cash equivalents at the beginning of the year	11,170
Cash and cash equivalents at the end of the year	9,502

Note: For the analysis on reasons for the changes in cash flows, please refer to "5. Cash Flows" of "IV. Major Operations in the Reporting Period" under "BUSINESS REVIEW".

During the Reporting Period, capital expenditures of the Group amounted to RMB6,641 million, which mainly consisted of additions to property, plant and equipment, other intangible assets and prepaid land lease payments included in right-of-use assets exclusive of amounts due to new acquisition of subsidiaries. Details of capital expenditures are set out in note 46 to the financial statements.

As at 31 December 2024, the Group had capital commitments contracted but not provided of approximately RMB698 million and capital commitments authorized but not signed of approximately to RMB1,225 million. These capital commitments were mainly used to the reconstruction and renewal of plant and machinery. Details of capital commitments are set out in note 46 to the financial statements.

As at 31 December 2024, the Group did not have any contingent liabilities.

In 2024, the interest coverage, which is calculated by EBITDA divided by financial cost was 6.03 times as compared with 5.61 times for 2023. The increase in the interest coverage was mainly due to the EBITDA of the Group in 2024 which was RMB8,772 million, increased by 13.63% as compared with that in 2023 which was RMB7,720 million, and financial cost of the Group in 2024 amounting to RMB1,432 million, increased by 8.08% as compared with that in 2023 which was RMB1,325 million.

The Group has transactional currency exposures. Such exposures arise from sales or purchases by operating units and investing and financing activities by investment holding units in currencies other than the units' functional currencies.

It is the Group's strategy to use debts with fixed and floating interest rates to manage its interest costs. The Group's exposure to the risk of changes in market interest rates relates primarily to the Group's debt obligations with floating interest rates.

During the Reporting Period, the Group further focused on innovative drugs and high-value devices, and promotion of product structure and strategic transformation, with revenue amounted to RMB40,910 million. Specifically, the revenue from innovative drugs recorded steady growth, with the core products of innovative anti-PD-1 monoclonal antibody drug (trade name in Chinese mainland: Han Si Zhuang), Yi Kai Da (ejilunsai injection), the CAR-T cell therapy product, Akynzeo (netupitant and palonosetron hydrochloride capsules), the antiemetic drug, Pei Jin (telpegfilgrastim injection), a long-lasting recombinant human granulocyte colony-stimulating factor product, and Yi Xin Tan (sacubitril valsartan sodium tablets), a drug for the treatment of heart failure and hypertension, recorded rapid growth.

During the Reporting Period, the Group realized an operating cash flow of RMB4,477 million, representing a year-on-year growth of 31.13%, higher than the growth in operating profit. The Group also increased the free cash flow through multiple measures including asset structure optimization and strict capital expenditures control. The Group continued to promote lean management across various aspects, including quality enhancement, cost control, efficiency improvement, cyclical management and innovative R&D, with an aim to improve operational efficiency and profitability. During the Reporting Period, the gross profit margin less selling expenses ratio increased by 2.45 percentage points year-on-year. Excluding the impact of newly acquired companies, the administrative expense decreased by RMB318 million.

As for emerging markets, in Africa, the Group primarily conducted medical product export and distribution business in the English-speaking and French-speaking regions in Sub-Saharan Africa, with sales network covering over 40 countries and regions. Meanwhile, in order to realize localization in drug manufacturing and supply in Africa, the Group continued to advance the park construction in the Cote d'Ivoire. Furthermore, the Group also continuously strengthened its product export channels and system development by establishing a new pharmaceutical and medical device sales platform in Nanning in February 2025, which gradually advanced the Group's registration and commercialization capabilities in Southeast Asia, with an aim to expand the local market.

- *Internationalization of innovative products*
  The Group continued to expand the regulatory markets such as the U.S. and the EU. In respect of pharmaceutical manufacturing segment, during the Reporting Period, trastuzumab injection received approvals for market launch in the United States and Canada; the new drug authorization application (MAA) of serplulimab injection received positive review opinions from the Committee for Medicinal Products for Human Use (CHMP) of the European Medicine Agency and was approved in the EU in February 2025; the new drug applications for the biosimilar of denosumab HLX14 (recombinant anti-RANKL fully human monoclonal antibody injection) was accepted by the European Medicine Agency, Health Canada, and the U.S. FDA; and HLX22 (anti-human epidermal growth factor receptor-2(HER2) humanized monoclonal antibody injection) for the first-line treatment of locally advanced or metastatic gastroesophageal junctional adenocarcinoma and gastric cancer, and HLX78 (lasofoxifene tablets) for the treatment of ER+/HER2-breast cancer with ESR1 mutation, among others, were in the international multi-center Phase III clinical trials. In respect of medical devices segment, during the Reporting Period, Alma Harmony™ and Alam Hybrid™, the two dermatological products of Sisram Medical, a subsidiary, received certification under the EU Medical Device Regulation, which further enhanced the Group's product portfolio and competitive edge.

- *Localization of innovative products in China*
  The Group proactively introduces international leading technologies and products into the Chinese market, so as to benefit more patients and customers. During the Reporting Period, Intuitive-Fosun, the Company's associated companies, officially opened its headquarters and industrial base in Zhangjiang International Medical Park, Shanghai, in June 2024. The industrial base integrates R&D, manufacturing and training. The launch of this industrial base will further accelerate the localization progress of the Da Vinci surgical system. In 2024, 58 units of "Da Vinci Surgical Robot" were being installed in Chinese mainland and Macau. As at the end of the Reporting Period, the "Da Vinci Surgical Robot" has been installed in over 300 hospitals across Chinese mainland, Hong Kong and Macau, with a cumulative installation volume exceeding 460 units, serving more than 670,000 patients across Chinese mainland, Hong Kong and Macau. Additionally, the Ion System of Intuitive Fosun was approved by the NMPA in March 2024, and achieved the first commercial installation in September 2024. During the Reporting Period, 4 units of the Ion System were sold in Chinese mainland. The Ion System has adopted a flexible robot with shape-sensing technology and can perform precise diagnostic operations on peripheral lung lesions through the bronchus. The launch of the Ion System in China will help more lung cancer patients receive early diagnosis and treatment in a more minimally invasive way. The Da Vinci SP endoscopic single orifice surgical system of Intuitive Fosun has been included in the NMPA's special review process for innovative medical devices, facilitating its subsequent

registration and review. During the Reporting Period, Fosun Insightec, a joint venture established with Insightec in China, had achieved sales of the magneticresonance image guided focused ultrasound brain therapy system (“ ”). Several ventilators of Breas, a subsidiary, were

In respect of license cooperation, during the Reporting Period, Shanghai Henlius, a subsidiary, had reached strategic cooperation with SVAX to establish a new joint venture in Saudi Arabia aiming to advance the local registration, manufacturing, commercialization, and global registration or market launch of innovative drugs (products), thereby enhancing the accessibility of high-value innovative drugs (products) in the area of MENAT (Middle East, North Africa and Turkey). In December 2024, Shanghai Henlius had entered into a collaboration and licensing agreement in relation to the global co-development of E-602, a pipeline product of Palleon, and the related combination therapeutic solutions within the licensed field (i.e., for the treatment of human diseases) and the commercialization of the same in the respective licensed field, on the basis of their respective patents and proprietary technologies.

- *Progress of International Quality Standard Production System*
  The Group continues to advance the international quality standard certification of its production system. The quality control system and production capacity have been recognized by international certification authorities, further laying a solid foundation for the export of its preparations. During the Reporting Period, Carelife Pharma, a subsidiary, underwent a routine surveillance inspection by the U.S. FDA for the APIs clindamycin hydrochloride, clindamycin phosphate, mitoxantrone hydrochloride, granisetron hydrochloride, entecavir, venlafaxine hydrochloride, sorafenib tosylate and clindamycin palmitate hydrochloride, and received a zero-defect rating; Dongting Pharma's tranexamic acid API underwent a GMP compliance inspection by the U.S. FDA and received a zero-defect rating; Fosun Wanbang's lyophilized preparations production line successfully passed the EU GMP on-site inspection again, and received the GMP on-site inspection final report and GMP certificate issued by the Dutch Health and Youth Care Inspectorate in July 2024; and Suzhou Erye continued to enhance the internationalization of its heparin products, obtaining a registration certificate from the South Korean Food and Drug Administration (KFDA) and passing an on-site inspection by the Malaysian National Pharmaceutical Regulatory Agency for enoxaparin sodium during the Reporting Period.

3. Matured commercialization system

The Group continued to improve its commercialization system by optimizing the market layout and sales channels. As at the end of the Reporting Period, the pharmaceutical manufacturing segment had a commercialization team consisting of over 5,000 employees in Chinese mainland, covering hospitals, retail channels, etc. In terms of core departments such as hematology, lymphoma, breast, medical oncology, endocrinology, cardiology, rheumatology and nephrology, through the systematic market access team and special product team, the Group explored the innovative product market in core therapeutic areas, and covered county-level and certain prefecture-level markets in Chinese mainland through the broad market team. In addition, the Group expanded the sales channels of its pharmaceutical products by virtue of the cooperation and linkage with Sinopharm, an associated company.

In terms of commercialization in overseas markets, as at the end of the Reporting Period, the overseas

The Group continued to promote the application of artificial intelligence in drug R&D. In 2022, the Group established a strategic partnership with Insilico to jointly advance AI-driven drug R&D for relevant targets. As at the end of the Reporting Period, the first small molecule drug developed through this collaboration has entered the clinical trial stage. In January 2025, Shanghai Henlius, a subsidiary, had entered into a strategic partnership with DP Technology for AI-assisted drug development, aiming to explore R&D pathways for drugs (such as antibody drugs, ADC drugs) by combining artificial intelligence with physical modeling.

Meanwhile, the Group continued to deepen the application of digital technologies across core areas such as R&D, production, marketing and management, with the aim to enhance operational efficiency and intelligence. In R&D, by introducing the PharmAID decision intelligence platform, intelligence will be enhanced in information retrieval, patent analysis, and sales forecasting, providing support for pipeline decision-making. In production and supply chain management, optimization will be made in production quality control, supply chain logistics, inventory management, and production planning to promote improvement of operational efficiency. In marketing, AI technology will be leveraged to gain insights into market trends and demands, continuously enhancing marketing precision and customer satisfaction.

5. Continued to promote lean management and improve quality and efficiency

During the Reporting Period, the Group continued to promote lean management across various aspects, including quality enhancement, cost control, efficiency improvement, cyclical management and innovative R&D, with an aim to improve operational efficiency and profitability. In terms of innovative R&D, the Group continued to focus on pipelines with advantages, optimized management and resources allocation of R&D projects and prioritized to the promotion of key projects to realize research commercialization and continuous launch of innovative products. In terms of production, the Group has continuously strengthened cost management to enhance the competitiveness of production cost and continuously improved product yield by optimizing production processes, strengthening process control and strengthening staff training. In addition, the Group also continued to promote the international market expansion of APIs, and during the Reporting Period, the ferric carboxymaltose API-supported preparations were launched in the Europe.

Meanwhile, the Group continued to divest and integrate non-strategic and non-core assets, and gathered resources on core businesses so as to optimize asset structure and improve asset efficiency. During the Reporting Period, the Group continued its asset structure optimization and acceleration of cash recovery, with total funds recouped reaching nearly RMB3,000 million since the beginning of 2024.

1	Anti-tumor and immune modulation	Han Li Kang (rituximab injection)	This drug was approved for launch by the NMPA in February 2019, and is the first domestic biosimilar. Its approved indications include: non-Hodgkin's lymphoma, chronic lymphoblastic leukaemia, rheumatoid arthritis (RA) indication. It is also the first rituximab approved for rheumatoid arthritis (RA) indication in China.	Yes	
2		Han Qu You (trastuzumab injection)	This drug is the first trastuzumab biosimilar approved for launch in China, and also the domestic monoclonal antibody biosimilar approved by China, Europe and the United States. As at the end of the Reporting Period, this drug has been approved for launch in a total of more than 50 countries and regions, including China, Europe, the United States, Australia and Canada. The drug's trade name in EU: Zercepac, the trade name in the United States: HERCESSI™, and the trade name in Canada: Adheroza. Its approved indications include: HER2 positive early breast cancer, metastatic breast cancer, and metastatic gastric cancer.	Yes	
3		Han Si Zhuang (serplulimab injection)	This drug (anti-PD-1 monoclonal antibody) was approved for launch by the NMPA in March 2022, and is the first innovative monoclonal antibody independently developed by the Group. In February 2025, the drug was approved by the EC, making it the first anti-PD-1 monoclonal antibody approved in the EU for the treatment of extensive-stage small cell lung cancer (ES-SCLC). The drug's trade name in the EU: Hetronifly. Its approved indications include: first-line treatment of squamous non-small cell lung cancer (sqNSCLC), extensive-stage small cell lung cancer (ES-SCLC), esophageal squamous cell carcinoma (ESCC) and non-squamous non-small cell lung cancer (nsNSCLC). It is the first anti-PD-1 monoclonal antibody drug approved for the first-line treatment of small cell lung cancer in the world. It has been recommended by guidelines including CSCO Guidelines on Small Cell Lung Cancer Treatment, CSCO Guidelines on Non-Small Cell Lung Cancer Treatment, CSCO Guidelines on Esophageal Cancer Treatment, CSCO Guidelines on Colorectal Cancer Treatment and CSCO Guidelines on Clinical Application of Immune Checkpoint Inhibitors.	No	
4		Han Da Yuan (adalimumab injection)	This drug was approved for launch by the NMPA in December 2020, and is the first domestic adalimumab biosimilar with GMP certified production base approved by both China and Europe. Its approved indications include: rheumatoid arthritis, ankylosing spondylitis, psoriasis, uveitis, etc.	Yes	
5		Han Bei Tai (bevacizumab injection)	This drug was approved for launch by the NMPA in November 2021. Its approved indications include: metastatic colorectal cancer, advanced, metastatic or recurrent non-small cell lung cancer, recurrent glioblastoma, epithelial ovarian cancer, etc..	Yes	

6	Anti-tumor and immune modulation	Su Ke Xin* (avatrombopag maleate tablets)	This drug was approved for launch by the NMPA in April 2020, and is the first oral drug approved for the treatment of thrombocytopenia related to chronic liver diseases in the world. Its approved indications include the selective thrombocytopenia treatment of adult patients with chronic liver disease (CLDT) undergoing diagnostic procedures or surgery and treatment of essential chronic immune thrombocytopenia (ITP) in adult patients with poor response from prior treatment.	Yes	
7		Otezla* (apremilast tablets)	This drug was approved for launch by the NMPA in August 2021, and is the world's first oral phosphodiesterase-4 (PDE4) inhibitor for the treatment of plaque psoriasis. Its approved indication is treatment for adult patients with moderate to severe plaque psoriasis who are suitable for phototherapy or systematic treatment.	Yes	
8		Akynzeo* (netupitant and palonosetron hydrochloride capsules)	This drug was approved for launch by the NMPA in August 2019, and is the world's first dual-channel fixed-dose combination oral compound preparation that simultaneously blocks both NK-1 receptors and 5-HT3 receptors. Its approved indication is prevention of acute and delayed nausea and vomit arising from highly emetogenic chemotherapy in adult patients.	Yes	
9		Pei Jin* (telpegfilgrastim injection)	This drug (new generation of long-lasting recombinant human granulocyte colonystimulating factor product) was approved for launch by the NMPA in June 2023, and is classified as class 1 new drug in China. Its approved indication is reduction of occurrence of infections expressed in form of febrile neutropenia in patients with non-myeloablative cancer when receiving myelosuppression anti-tumor drug treatment which can easily cause febrile neutropenia.	Yes	
10		Fu Ke Shu®* (anti-human T-lymphocyte rabbit immunoglobulin)	The product is a polyclonal antibody inhibitor. Its approved indications include the prevention of acute transplant rejection in patients receiving solid organ transplantation (SOT) and the treatment of acute rejections if the therapeutic effect of corticosteroid treatment has proven to be unsatisfactory.	Yes	
11		Yi Kai Da* (ejilunsai injection)	This product was approved for launch by the NMPA in June 2021, and is the first CAR-T cell therapy product approved for domestic launch. Its approved indications include adult patients with relapsed or refractory large B-cell lymphoma (r/r LBCL) after prior second-line or higher systemic therapy, adults patients with large B-cell lymphoma (r/r LBCL) refractory to first-line immunochemotherapy or relapsing within 12 months of first-line immunochemotherapy (conditional approved). As at the end of the Reporting Period, this product has been included in over 110 urban customized commercial health insurances and over 80 commercial insurances, while the number of treatment centers on record exceeded 180, covering more than 28 provinces and municipalities across China.	No	

12	Metabolism and alimentary system	Atomolan (preparations for glutathione series)	This series include Atomolan (glutathione tablets) and Atomolan (glutathione for injection), both of them are class B drug under National Medical Insurance Drugs Catalogue and the basic medicine for liver diseases. In particular, Atomolan (glutathione tablets) are the first glutathione oral preparations in China, while Atomolan (glutathione for injection) is the first generic drug of its kind in China.	Yes	
13		Pang Bi Fu* (etelcalcetide hydrochloride injection)	This drug (new generation of calcimimetic) was approved for launch by the NMPA in May 2023. Its approved indication is treatment of secondary hyperparathyroidism (SHPT) of adult patients receiving hemodialysis treatment for chronic kidney disease (CKD).	No	14		Bei Wen* (keverprazan hydrochloride tablets)	This drug (potassium ion competitive acid blocker (P-CAB)) was approved for launch by the NMPA in February 2023 and is classified as class 1 new drug in China. It is the first approved P-CAB with DU/RE double indications in China. Its approved indications include duodenal ulcer (DU), reflux esophagitis (RE), and eradication of Helicobacter pylori (H. pylori) in combination with appropriate antibiotics.	Yes	
15	Anti-infection	Antimalarial series such as artesunate	This series include Artesun and Argesun (artesunate for injection), SPAQ-CO (sulfadoxine pyrimidine dispersible tablets + amodiaquine dispersible tablets) and the D-ARTEPP series (dihydroartemisinin-piperaquine phosphate tablets) etc. In particular, artesunate is the first class 1 new drug in China. As at the end of the Reporting Period, the Group has a total of 36 antimalarial drugs (including APIs and preparations) with WHO PQ. The second generation of artesunate for injection (Argesun) was registered and approved in 25 countries. As at the end of the Reporting Period, the Group has supplied over 400 million doses of artesunate for injection across the world.	Some of products launched in Chinese mainland have been included	
16	Cardiovascular system	Heparin series preparations	This series include enoxaparin sodium injection, heparin sodium injection, low molecular weight heparin for injection and nadroparin calcium injection etc. Heparin series preparations are mainly used for the prevention of thrombosis or treatment of embolism. The Group has the full industry chain supply capability for low-grade and high-grade heparin products, low-molecular heparin raw materials and preparations, and the sales network covers China, the United States, South America, Europe, the Middle East and Southeast Asia.	Some of products launched in the Chinese mainland have been included	
17		Yi Xin Tan* (sacubitril valsartan sodium tablets)	The drug was approved for launch by the NMPA in August 2023, and is a first-line drug for the treatment of heart failure and hypertension in an innovative crystalline form. Its approved indication is the treatment of essential hypertension. It can also be used in adult patients with chronic heart failure (NYHA class II-IV, LVEF≤40%) with reduced ejection fraction to mitigate risks of cardiovascular death and hospitalisation for heart failure.	Yes	

18	Rabies prophylaxis	Rabies vaccine (Vero cell) for human use, rabies vaccine (Vero cell) for human use (freeze dried)	Rabies vaccine (Vero cell) for human use and rabies vaccine (Vero cell) for human use (freeze dried) were approved for launch by the NMPA in September 2016 and March 2024 respectively. The approved indication is rabies prophylaxis. CTN-1V strain was used as its virus strain for production, whose gene sequence is closer to that of the street strain of prevailing rabies virus, and has better immune protection effect.	Rabies vaccine (Vero cell) for human use has been included	
19	Influenza prophylaxis	Influenza virus lysate vaccine	Influenza virus lysate vaccine includes adult dosage form and paediatric dosage form. The adult dosage form was approved for launch by the NMPA in November 2005, with a specification of 0.5ml/vial in pre-filled form; and the paediatric dosage form was approved for launch by the NMPA in July 2009, with a specification of 0.25ml/vial in pre-filled form. The approved indication is prevention of influenza caused by a parent strain of virus. The product is made from influenza A1, influenza A3 and influenza B virus strains as recommended by the WHO and approved by the NMPA. The product contains more active ingredient haemagglutinin than the standard required by the Chinese Pharmacopoeia to ensure its effectiveness.	No	

* Being the licensed-in innovative drug (product) of the Group.

Performance summary

The Group has proactively adjusted its business structure, and intensified its support and development efforts for innovative products. It has focused on core therapeutic areas, strengthened the integration of its business systems to promote flat marketing system management and constantly promote cost reduction and efficiency. During the Reporting Period, the pharmaceutical manufacturing segment of the Group recorded revenue of RMB28,776 million and segment results of RMB3,304 million, representing a year-on-year increase of 54.83%, and profit of RMB3,250 million, representing a year-on-year increase of 64.64%.

During the Reporting Period, while maintaining a relatively stable level of R&D intensity, the Group continued to optimize its innovation and R&D system, concentrated on quality pipeline assets and enhanced efficiency by integrating its R&D system. In 2024, the Group's R&D investment in the pharmaceutical manufacturing segment amounted to RMB4,910 million, accounting for 16.98% of its revenue from pharmaceutical manufacturing segment. R&D expenses were RMB3,071 million, accounting for 10.62% of its revenue from pharmaceutical manufacturing segment. In addition to self-initiated R&D, the Group also actively implemented an open R&D model by leveraging industry funds and other mechanisms to incubate innovative R&D projects, so as to ensure the sustainability of innovation R&D.

Revenue from major products of the Group in the major therapeutic areas during the Reporting Period is set out in the following table:

Unit: million Currency: RMB

	2023	Year-on-year increase on the same basis (%)
Major products of anti-tumor and immune modulation *(Notes 1, 6)*	7,638	5.84
Major products of anti-infection *(Notes 2, 6)*	4,338	–27.95
Major products of metabolism and alimentary system *(Note 6)*	2,814	–0.73
Major products of cardiovascular system *(Notes 3, 6)*	1,677	14.00
Major products of central nervous system *(Notes 4, 6)*	1,392	–21.01
Major products of APIs and intermediate products *(Notes 5, 6)*	1,271	–12.97

Note 1:

In 2024, there were a total of 49 preparations or series of products in the pharmaceutical manufacturing segment of the Group that each recorded sales of over RMB100 million, and details are as follows:

Currency: RMB

Over 1 billion	4	Han Qu You (trastuzumab injection), Han Li Kang (rituximab injection), Han Si Zhuang (serplulimab injection), Heparin series preparations
500 million to 1 billion	3	Antimalarial series such as artesunate, You Li Tong (febuxostat tablets), Su Ke Xin (avatrombopag maleate tablets)
300 million to 500 million	4	Cravit (levofloxacin tablets), Atomolan (glutathione tablets), Yi Kai Da (ejilunsai injection), Akynzeo (netupitant and palonosetron hydrochloride capsules)
100 million to 300 million	38	38 varieties including Otezla (apremilast tablets), Han Da Yuan (adalimumab injection), Han Bei Tai (bevacizumab injection), Qi Wei (quetiapine fumarate tablets), Fu Ke Shu (anti-human T-lymphocyte rabbit immunoglobulin), Yi Xin Tan (sacubitril valsartan sodium tablets), Pei Jin (telpegfilgrastim injection)

Important events

- *1 new indication for serplulimab injection (anti-PD-1 monoclonal antibody) and its progress in overseas markets*

  During the Reporting Period, Han Si Zhuang (serplulimab injection), the self-developed innovative anti-PD-1 monoclonal antibody, obtained approval in Chinese mainland for the indication as a first-line treatment for non-squamous non-small cell lung cancer (nsNSCLC). This newly approved indication marks the third indication authorized in the field of lung cancer for the drug, following its previous approvals for squamous non-small cell lung cancer (sqNSCLC) and extensive-stage small cell lung cancer (ES-SCLC), thereby further expanding its coverage to broader patient populations. Additionally, as at the disclosure date of the 2024 annual results announcement (i.e. 25 March 2025, the same below), the Marketing Authorization Application (MAA) for serplulimab injection (EU trade name: Hetronifly) in combination with carboplatin and etoposide for the first-line treatment of extensive-stage small cell lung cancer (ES-SCLC) in adult patients has been approved by EC. Consequently, the drug has obtained centralized marketing authorization across all EU member states, as well as Iceland, Liechtenstein, and Norway (collectively, European Economic Area countries). This approval establishes serplulimab as the first anti-PD-1 monoclonal antibody authorized by the EU for the treatment of extensive-stage small cell lung cancer (ES-SCLC).

  As at the disclosure date of the 2024 annual results announcement, relevant indications for Han Si Zhuang (serplulimab injection) have been approved in Chinese mainland, including first-line treatment in combination with chemotherapy for squamous non-small cell lung cancer (sqNSCLC), extensive-stage small cell lung cancer (ES-SCLC), esophageal squamous cell carcinoma (ESCC), and non-squamous non-small cell lung cancer (nsNSCLC).

  With the successive approvals of multiple indications for serplulimab injection (anti-PD-1 monoclonal antibody) domestically and the smooth progress of overseas clinical trials, the drug has gained extensive international recognition for its superior efficacy and high-quality data. Its license-out now covers Europe, Southeast Asia, and the Middle East and North Africa, with international commercialization advancing systematically. During the Reporting Period, serplulimab injection (anti-PD-1 monoclonal antibody) was approved for marketing in Cambodia and Thailand. In January 2024, it received the Innovation Passport from the UK Innovative Licensing and Access Pathway Steering Group, which includes the Medicines and Healthcare Products Regulatory Agency (MHRA). In addition, the Group continues to advance the drug's commercialization in the U.S. market by establishing an U.S. innovative drug team covering medical affairs, market access, and sales functions as well as partnering with Syneos Health to provide commercialization support for the drug in the U.S..

  Centered around the "Combo+Global" (combination therapy + internationalization) differentiated development strategy, serplulimab injection (anti-PD-1 monoclonal antibody) actively synergizes with other proprietary pipeline products. Multiple global clinical trials for combination therapies are currently underway, covering indications such as lung cancer, esophageal cancer, head and neck squamous cell carcinoma, colorectal cancer, and gastric cancer. In particular, a head-to-head bridging trial is progressing systematically in the U.S., comparing serplulimab with the first-line standard-of-care atezolizumab for extensive-stage small cell lung cancer (ES-SCLC). This trial aims to further support the drug's biologics license application in the U.S. market.

- *Progress of other pipeline products*

  During the Reporting Period, the Group continued to promote the R&D and industrialization of vaccines in its pipeline. In March 2024, rabies vaccine (Vero cell) for human use (freeze dried), which is independently developed by the Group, was approved for launch in Chinese mainland. In July 2024 and September 2024, the clinical trial applications for the Group's self-developed 23-valent pneumococcal polysaccharide vaccine and self-developed rabies vaccine (human diploid cells) for human use (freeze dried) were approved by the NMPA successively. In March 2025, the clinical trial application for the Group's self-developed 24-valent pneumococcal polysaccharide conjugate vaccine was also approved in Chinese mainland.

  At the same time, during the Reporting Period, the established medicines manufacturing & supply business of the Group continued to optimize the life cycle management of established medicines on the product end, focusing on the independent R&D of first generic drugs, difficult and complex preparations and improvement of new drugs, grasped highly fit expansion opportunities, enriched pipelines, improved the capability and efficiency of the system, and actively promoted the overseas commercialization of preparations. During the Reporting Period, a total of 79 generic drugs varieties of the Group (including 43[2] domestic varieties and 36 overseas varieties) were approved for launch both domestically and internationally. In particular, isepamicin sulfate injection of Beijing Jnova, a subsidiary, is the first generic drugs approved for launch in Chinese mainland. In addition, a total of five drugs, including Shenyang Hongqi's cycloserine capsules, enzalutamide soft capsules, Yao Pharma's beprost sodium tablets, risperidone orally disintegrating tablets and carboplatin injection, are among the top five generic drugs in Chinese mainland. A total of four drugs, including Suzhou Erye's oxacillin sodium for injection, Guilin Pharma's bumetanide injection and Yao Pharma's epinastine hydrochloride capsule and propranolol hydrochoride injection, are the first production passing consistency evaluation among similar varieties domestically.

R&D innovation

The Group has established an open and globalized pharmaceutical innovation and R&D system that integrates independent R&D, cooperative development, licensed-in projects and industrial investment, which focuses on the core therapeutic areas of tumors (solid tumors, hematological tumors) and immuno-inflammatory diseases, with emphasis on the enhancement of the core technology platforms of antibody/ADC, cellular therapy and small molecules. The Group also cooperated with industry funds in the deployment of nuclear drug, RNA, gene therapy, AI drug R&D and other cutting-edge technologies. These efforts aims to continuously enhance our core R&D capabilities and pipeline value, and facilitate the R&D process of more blockbuster products in order to achieve commercialization.

[2] Including import drug license

To advance the Group's innovation strategy with excellence and enhance R&D efficiency, a Scientific Advisory Board ("SAB") at the group level, mainly composed of an external think tank, has been established to assist the management of the Group in formulating and optimizing the medium-and-long-term innovation strategy, and to provide strategic guidance and insights. In terms of improving the internal innovation management structure, by introducing senior scientists and high-level talents, the capabilities in early-stage R&D, CMC, clinical medicine, clinical operations, etc. have been comprehensively enhanced. By establishing a pipeline committee composed of internal experts to strengthen synergies and optimize the allocation of R&D resources, the improvement of the quality and effectiveness of innovative R&D has been promoted. In addition, through lean R&D projects, leveraging on the INNOX digital management system, the process management in areas such as R&D project approval, budget management, decision-making mechanisms for major milestones, etc. have been continuously optimized.

During the Reporting Period, a total of 7 innovative drugs/biosimilars independently developed by the Group or introduced through licensing, with a total of 16 indications[3], and 79 generic drug varieties (including 43 domestic varieties[4] and 36 overseas varieties) were approved both domestically and internationally; 4 innovative drugs/biosimilars, and 81 generic drug varieties (including 55[4] domestic varieties and 26 overseas varieties) were applied for launch both domestically and internationally. In addition, a total of 18 innovative drugs/biosimilars (counted on indications) were approved for clinical trial during the Reporting Period. During the Reporting Period, a total of 220 patents had been applied for in the pharmaceutical manufacturing segment of the Group, including 3 U.S. patent applications and 18 PCT applications; and 66 licensed invention patent authorization were obtained.

The Group's innovation achievements under the guidance of the innovation strategy have also received attention and recognition from the international academic community, and its global academic influence has been continuously enhanced. During the Reporting Period, the Group released the clinical data for multiple pipeline candidates and marketed products at global industry academic conferences such as the American Society of Clinical Oncology (ASCO), the Annual Meeting of the American Association for Cancer Research (AACR), the European Society for Medical Oncology (ESMO), the World Conference on Lung Cancer (WCLC), the Congress of the European Hematology Association (EHA), and in global top journals such as the New England Journal of Medicine (NEJM) and The Lancet (Lancet).

For the updated progress of the main R&D pipelines of the Group during the Reporting Period, please refer to Schedule 2.

3

	Trastuzumab injection (trade name in Chinese mainland: Han Qu You, trade name in the United States: HERCESSI™, trade name in Canada: Adheroza)	Biological product	(1) Adjuvant therapy for HER2-expressing breast cancer; (2) Therapy for HER2-expressing metastatic breast cancer; (3) Therapy for HER2-expressing metastatic gastric adenocarcinoma or gastroesophageal junctional adenocarcinoma (U.S.)						—
			(1) early breast cancer, (2) metastatic breast cancer, (3) metastatic gastric cancer (Canada)						—
	Serplulimab injection (trade name in Chinese mainland: Han Si Zhuang)	Therapeutic biological product	1 new indication added: In combination with pemetrexed and carboplatin for the first-line treatment of patients with epidermal growth factor receptor (EGFR) mutation-negative and anaplastic lymphoma kinase (ALK) gene rearrangement-negative locally advanced or metastatic non-squamous non-small cell lung cancer (NSCLC) that cannot be removed through surgery						—
	Adalimumab injection (trade name in Chinese mainland: Han Da Yuan)	Therapeutic biological product	4 new indications added: (1) polyarticular juvenile idiopathic arthritis, (2) pediatric plaque psoriasis,						—
	Rabies vaccine (Vero cell) for human use (freeze dried)	Preventive biological product	[illegible] EMC9tose dried)						

Under phase I clinical study	HLX6018[#] (innovative anti-GARP/TGF-β1 monoclonal antibody)	Therapeutic biological product	For the treatment of idiopathic pulmonary fibrosis						—
	XH-S004[#]	Chemical drug	For the treatment of non-cystic fibrosis bronchiectasis						—
	HLX42 (antibody-drug conjugate targeting EGFR with novel DNA topoisomerase I inhibitor)	Therapeutic biological product	For the treatment of advanced/ metastatic solid tumor						—
	XS-02[#]	Chemical drug	For the treatment of advanced solid tumors						—
	FH-2001[#]	Chemical drug	For the treatment of advanced solid tumors						In combination with serplulimab injection
IND approved	HLX43 (antibody-drug conjugate targeting PD-L1 with novel DNA topoisomerase I inhibitor)	Therapeutic biological product	For the treatment of advanced/ metastatic solid tumors						—
	FCN-338	Chemical drug	For the treatment of systemic light chain amyloidosis						
			For the treatment of chronic lymphoblastic leukaemia/small lymphocytic lymphoma						In combination with FCN-647
	GCK–01	Therapeutic biological product	For the treatment of relapsed or chemotherapy-resistant follicular lymphoma						—
	HLX22 (anti-human epidermal growth factor receptor-2) (HER2) humanized monoclonal antibody injection)	Biological product	First-line treatment of HER2-positive advanced gastric cancer (GC) (U.S., Japan)						In combination with trastuzumab and chemotherapy
			For the treatment of HER2-expressing solid tumors						In combination with trastuzumab and/ or chemotherapy, or in combination with trastuzumab deruxtecan
	23-valent pneumococcal polysaccharide vaccine	Preventive biological product	Prevention of pneumococcal diseases						*Note 6*
	Rabies vaccine (human diploid cells) for human use (freeze dried)	Preventive biological product	Rabies prophylaxis						*Note 7*
	XS-04	Chemical drug	For the treatment of hematological malignancies						—
	HLX17 (recombinant anti-PD-1 humanised monoclonal antibody injection)	Therapeutic biological product	For the treatment of melanoma, non-small cell lung cancer, esophageal cancer, head and neck squamous cell carcinoma						—

[#] Innovative drugs approved for clinical trial and had commenced respective clinical study during the Reporting Period.

Note 1: In February 2025, the marketing authorization application (MAA) for serplulimab injection (anti-PD-1 monoclonal antibody) for this indication was approved by the EC.

Note 2: In February 2025, the NDA for (Tenapanor hydrochloride tablets) for this indication was approved by the NMPA.

Note 3: The two indications have been included in the priority review.

Note 4: During the Reporting Period, two of the Phase III clinical studies for the combination dosing of OP0595, and cefepime or aztreonam for the treatment of adults infected by aerobic gram-negative bacteria with limited treatment options, were commenced in Chinese mainland.

Note 5: In May 2024, HLX78 was approved by the NMPA to carry out the Phase I clinical trial for healthy subjects and the Phase III of international multi-center clinical trial in Chinese mainland (such new drug is used in combination with abemaciclib for the treatment of pre/postmenopausal women and men with locally advanced or metastatic breast cancer with disease progression, harboring estrogen receptor 1 (ESR1) mutations, estrogen receptor positive (ER+), human epidermal growth factor receptor 2-negative (HER2-) during receiving treatment of aromatase inhibitors (AI) in combination with cyclindependent kinases (CDK 4/6) inhibitors).

Note 6: In July 2024, the application for Phase I and Phase III clinical trials of the 23-valent pneumococcal polysaccharide vaccine was approved by the NMPA.

Note 7: In September 2024, the application for Phase I and Phase III clinical trials of the Group's rabies vaccine (human diploid cells) for human use (freeze dried) was approved by the NMPA.

As at the end of the Reporting Period, there were over 80 major pipeline projects of the Group on innovative drugs and biosimilars (calculated by indications); for details on major pipeline drug projects of the Group, please refer to Table 3 to Table 7.

1	Anti-tumor	FCN-338	Hematological malignancies	Phase I clinical trial	Phase I clinical trial (U.S.)
2			Relapsed or refractory B-celllymphoma	Phase I clinical trial	
3			Treatment of myeloid malignancies in combination with azacitidine or chemotherapy	Phase II clinical trial	—
4		Luvometinib tablets (FCN-159)	Neurofibromatosis type 1 (children)	NDA	
5			Neurofibromatosis type 1 (adult)	Phase III clinical trial	—
6			Dendritic cell and histiocyte neoplasms in adults	NDA	—
7			Low-grade gliomas	Phase II clinical trial	—
8			Langerhans cell histiocytosis in children	Phase II clinical trial	—
9		Dimethyl malonate furmonertinib capsules (SAF-189)	Non-small cell lung cancer (ROS1+)	Phase II clinical trial	Approved for clinical trial (U.S.)
10			Non-small cell lung cancer (ALK+)	Phase III clinical trial *Note 1*	
11		Citric acid vovonsertib gel (FCN-437c)	Breast cancer 1L	Phase III clinical trial *Note 2*	—
12			Breast cancer 2L	NDA	
13		YP01001	Advanced solid tumor	Phase I clinical trial	—
14		FH-2001	Advanced malignant solid tumor	Phase Ib/II clinical trial	—
15		FH-2001+ Serplulimab injection	Advanced solid tumor	Phase I clinical trial	—
16		XS-03	RAS-mutated advanced solid tumor	Phase I clinical trial	—
17		XS-04	Hematological malignancies	Approved for clinical trial	—
18		XS-02	Advanced solid tumor	Phase I clinical trial	—
19	Others	ET-26	Anesthesia	Phase III clinical trial	—
20		Luvometinib tablets (FCN-159)	Arteriovenous malformations	Phase II clinical trial	—
21		XH-S003	IgA nephropathy and other glomerular diseases with abnormal complement activation	Phase I clinical trial Note 3	Phase I clinical trial (Australia)
22		XH-S004	Non-cystic fibrous bronchial dilation	Phase I clinical trial	—
23		FCN-338	Systemic light chain Amyloidose	Approved for clinical trial	—

Note 1: In March 2025, the NDA for Dimethyl malonate furmonertinib capsules (project code: SAF-189) was accepted by the NMPA. The indication applied is for the treatment of patients with locally advanced or metastatic non-small cell lung cancer (NSCLC) who are positive for anaplastic lymphoma kinase (ALK).

Note 2: In January 2025, the NDA for Citric acid vovonsertib capsules (Project Code: FCN-437c) was accepted by the NMPA. The indication applied is for locally advanced or metastatic breast cancer in hormone receptor (HR) positive and human epidermal growth factor receptor 2 (HER2) negative patients, to be used in combination with aromatase inhibitors as initial endocrine therapy for premenopausal, postmenopausal, and perimenopausal women with breast cancer.

Note 3: In January 2025, a Phase II clinical trial of XH-S003 capsule for the treatment of IgA nephropathy and other glomerular diseases with abnormal complement activation was initiated in Chinese mainland.

1	Anti-tumor	Han Si Zhuang (serplulimab injection) + chemotherapy	Squamous non-small cell lung cancer (sqNSCLC)	Launched	Phase III clinical trial (international multi-center)
2			Extensive-stage small cell lung cancer (ES-SCLC)	Launched	Marketing authorization application (EU)[Note 1] Bridging trial (U.S.)
3			Non-squamous non-small cell lung cancer (nsNSCLC)	Approved for launch	—
4			Neo-/adjuvant treatment of gastric cancer (GC)	Phase III clinical trial	—
5		Han Si Zhuang (serplulimab injection) + chemotherapy + radiotherapy	Limited-stage small cell lung cancer (LS-SCLC)	Phase III clinical trial (international multi-center)	
6		Han Si Zhuang (serplulimab injection) + bevacizumab + chemotherapy	Metastatic colorectal cancer (mCRC)	Phase III clinical trial (international multi-center)	
7		Han Si Zhuang (serplulimab injection) + HLX07 (recombinant anti-EGFR humanized monoclonal antibody injection)	Recurrent or metastatic head and neck squamous cell carcinoma (HNSCC)	Phase II clinical trial	—
8			Squamous non-small cell lung cancer (sqNSCLC)	Phase II clinical trial	—
9		HLX07 (recombinant anti-EGFR humanized monoclonal antibody injection)	Solid tumor	Phase Ib/II clinical trial	Approved for clinical trial (U.S.)
10			Locally advanced or metastatic cutaneous squamous cell carcinoma (CSCC)	Phase II clinical trial	Approved for clinical trial (U.S.)
11		HLX26 (recombinant anti-LAG-3 humanized monoclonal antibody injection) + Han Si Zhuang (serplulimab injection) + chemotherapy	Advanced non-small cell lung cancer (NSCLC)	Phase II clinical trial	—
12		HLX53 (anti-TIGIT Fc fusion protein)	Solid tumor and lymphoma	Phase I clinical trial	—
13		HLX53 (anti-TIGIT Fc fusion protein) + Han Si Zhuang (serplulimab injection) + Han Bei Tai (bevacizumab injection)	First-line treatment of locally advanced or metastatic hepatocellular carcinoma (HCC)	Phase II clinical trial	—
14		HLX42 (antibody-drug conjugate targeting EGFR with novel DNA topoisomerase I inhibitor)	Advanced/metastatic solid tumor	Phase I clinical trial	Approved for clinical trial (U.S.)
15		HLX43 (antibody-drug conjugate targeting PD-L1 with novel DNA topoisomerase I inhibitor)	Advanced/metastatic solid tumor	Phase I clinical trial[Note 2]	Approved for clinical trial (U.S.)
16		VT-101	Advanced head and neck squamous cell carcinoma, melanoma, breast cancer and other solid tumors	Approved for clinical trial	Approved for clinical trial (U.S.)
17		GCK-01	Relapsed or chemotherapy-resistant follicular lymphoma	Approved for clinical trial	—
18	Others	HLX04-O (recombinant anti-VEGF humanized monoclonal antibody injection)	Wet age-related macular degeneration (wAMD)	Phase III clinical trial	Phase III clinical trial (international multi-center)
19		HLX6018 (innovative anti-GARP/TGF-β1 monoclonal antibody)	Idiopathic pulmonary fibrosis	Phase I clinical trial	—

Note 1:

1	Anti-tumor	FS-1502 (recombinant HER2 humanized monoclonal antibody-monomethyl auristatin F conjugate for injection)	HER2-positive locally advanced or metastatic breast cancer	Chinese mainland: Phase III clinical trial
2			HER2-expressing advanced malignant solid tumors	Chinese mainland: Phase II clinical trial
3		FS-1502 (recombinant HER2 humanized monoclonal antibody-monomethyl auristatin F conjugate for injection) in combination with serplulimab and/or chemotherapy	HER2-expressing advanced gastric cancer	Chinese mainland: Phase II clinical trial
4		HLX78 (lasofoxifene tables)	Breast cancer	Chinese mainland: Phase III clinical trial (international multi-center)
5		HLX208 (BRAF V600E inhibitor)	Solid tumor (metastatic colorectal cancer, non-small cell lung cancer, etc.), LCH and ECD	Chinese mainland: Phase II clinical trial
6		HLX208 (BRAF V600E inhibitor) + serplulimab injection	BRAF V600E or BRAF V600 mutation-positive advanced solid tumor (non-small cell lung cancer)	Chinese mainland: Phase II clinical trial
7		HLX22 (anti-human epidermal factor receptor-2 (HER2) humanized monoclonal antibody injection) + standardized treatment (trastuzumab + chemotherapy)	HER2-positive locally advanced or metastatic gastroesophageal junction and gastric cancer (GC)	Chinese mainland: Phase III clinical trial (international multi-center)
8			First-line treatment of HER2- positive advanced gastric cancer (GC)	U.S.: Approved for clinical trial Japan: Approved for clinical trial
9		HLX22 (anti-human epidermal growth factor receptor-2 (HER2) humanized monoclonal antibody injection) + standardized treatment (trastuzumab + chemotherapy)/deruxtecan	HER2-expressing solid tumors	Chinese mainland: Approved for clinical trial
10		HLX22 (anti-human epidermal growth factor receptor-2 (HER2) humanized monoclonal antibody injection) + serplulimab injection + standardized treatment (trastuzumab + chemotherapy)	HER2-positive advanced gastric cancer (GC)	Chinese mainland: Approved for clinical trial
11		SVN53–67/M57-KLH peptide vaccine (SurVaxM)	Primary diagnosis of glioblastoma	Chinese mainland: Approved for clinical trial
12	Anti-infection	Pu Rui Ni (Pretomanid tablets)	Extensively drug-resistant (XDR) or multidrug-resistant tuberculosis (MDR-TB) with treatment intolerance/ low efficacy of treatment	Chinese mainland: Approved for launch Hong Kong: Launched
13		OP0595 (Nacubactam) + cefepime or aztreonam	Treatment of adults infected by aerobic gram-negative bacteria with limited options	Chinese mainland: Phase III clinical trial
14	Central nervous system	Opicapone capsules	Parkinson syndrome	Chinese mainland: NDA
15		SBK010	Light to moderate acute ischemic stroke	Chinese mainland: NDA
16	Blood system	Su Ke Xin (Avatrombopag maleate tablets)	Chronic immune thrombocytopenia (ITP)	Chinese mainland: Approved for launch
17		(Tenapanor hydrochloride tablets)	Controlling serum phosphorus levels in adult dialysis patients with chronic kidney disease (CKD) who have insufficient response to or are intolerant of phosphate binders	Chinese mainland: NDA[Note]
18		Fu Ke Shu® (anti-human T-lymphocyte rabbit immunoglobulin)	Prevent graft-versus-host disease (GvHD) after the hematopoietic stem cell transplantation	Chinese mainland: Approved for clinical trial
19	Others	® (botulinum toxin type A for injection)	Moderate to severe glabellar lines in adults (GL)	Chinese mainland: Approved for launch
20			Cervical dystonia in adults (CD)	Chinese mainland: Approved for launch
21		Fortacin spray (lidocaine prilocaine spray)	Premature ejaculation	Chinese mainland: Phase III clinical trial

Note: In February 2025, the NDA for (Tenapanor hydrochloride tablets) was approved by the NMPA, with the approved indication for controlling serum phosphorus levels in adult dialysis patients with chronic kidney disease (CKD) who have insufficient response to or are intolerant of phosphate binders.

1	Anti-tumor	HLX11 (recombinant anti-HER2 domain II humanized monoclonal antibody injection)	Neoadjuvant treatment of BC	NDA
2		HLX05 (recombinant anti-EGFR human/murine chimeric monoclonal antibody injection)	Metastatic colorectal cancer (mCRC) and metastatic head and neck squamous cell carcinoma (HNSCC)	Phase I clinical trial
3		HLX13 (recombinant anti-CTLA-4 fully human monoclonal antibody injection)	Melanoma, renal cell carcinoma, colorectal cancer, hepatocellular carcinoma, non-small cell lung cancer, malignant pleural mesothelioma and esophageal squamous cell carcinoma	Phase I clinical trial
4			Liver cancer	Approved for clinical trial
5		HLX15 (recombinant anti-CD38 fully human monoclonal antibody injection)	Multiple myeloma (MM)	Phase I clinical trial
6		HLX17 (recombinant anti-PD-1 humanized monoclonal antibody injection)	Melanoma, non-small cell lung cancer, esophageal cancer, head and neck squamous cell carcinoma, etc.	Approved for clinical trial
7	Metabolism and alimentary system	Mixed protamine zinc recombinant insulin lispro injection (50R)	Diabetes	Approved for launch
8		Mixed protamine zinc recombinant insulin lispro injection (25R)	Diabetes	NDA
9		Semaglutide injection	Diabetes	Phase III clinical trial
10		Liraglutide injection	Diabetes	Phase III clinical trial
11		Insulin degludec injection	Diabetes	Phase III clinical trial
12	Others	HLX14 (recombinant anti-RANKL fully human monoclonal antibody injection)	Osteoporosis (OP), etc.	Applied for launch (Europe, Canada, U.S.)

1	Anti-infection	Rabies Vaccine (Vero Cells) for human use (freeze-dried)	Rabies prophylaxis	Approved for launch
2		13-valent pneumococcal conjugate vaccine (multivalent combinations)	Prevention of pneumococcal related diseases	Phase III clinical trial
3		Rabies Vaccine (Human Diploid Cells) for human use (freeze-dried)	Rabies prophylaxis	Approved for clinical trial
4		23-valent Pneumococcal Polysaccharide Vaccine	Prevention of related pneumococcal diseases	Approved for clinical trial
5		24-valent Pneumococcal Polysaccharide Conjugate Vaccine	Prevention of related pneumococcal diseases	*Note*

Note: In March 2025, the clinical trial application for the 24-valent Pneumococcal Polysaccharide Conjugate Vaccine was approved by the NMPA. It is intended to be used for the prevention of infectious diseases caused by pneumococcal serotypes 1, 2, 3, 4, 5, 6A, 6B, 7F, 8, 9N, 9V, 10A, 11A, 12F, 14, 15B, 17F, 18C, 19A, 19F, 20, 22F, 23F and 33F.

As at the end of the Reporting Period, a total of 42 products of the Group that had passed or deemed to have passed the consistency evaluation of generic drugs were selected in ten batches of national centralized procurement in bulk and the insulin specialty successive procurement bidding. In particular, for the details of the results of the insulin specialty successive procurement (implemented since May 2024), and the tenth batch of centralized procurement (to be implemented since April 2025), both of which were conducted during the Reporting Period, please refer to Table 8 — Products won tenders for centralized procurement during the Reporting Period. For the existing products included in centralized procurement, the Group leveraged the advantages of multi-channel marketing and lean production to strengthen the life cycle management of centralized procurement products while sacrificing price for volume, and actively promoted incremental products to quickly enter the market through centralized procurement and effectively smoothen the impact of centralized procurement to existing products.

(Specification, packaging and centralized procurement price of the drugs listed in the announced selection result)

1	Insulin specialty successive procurement *Note*	Insulin lispro injection	Diabetes	3ml:300 unit (refill) *1 vial	Vial	35.35
2		Insulin glargine injection	Diabetes	3ml:300 unit (refill) *1 vial	Vial	65.33
3	Tenth batch	Aspirin Enteric-coated Tablets	Unstable angina pectoris (part of standard treatment); acute myocardial infarction (part of standard treatment); prevention of the recurrence of myocardial infarction; after arterial vascular surgery or interventional surgery, such as aorto-coronary arterial saphenous vein bypass grafting, percutaneous coronary transluminal angioplasty; prevention of transient ischemic attack (TIA) and prevention of cerebral infarction after early symptoms have appeared.	100mg*14 tablets/plate × 4 plates/box	Box	2.61
4		Potassium Chloride Granules	For the treatment and prevention of hypokalemia with or without metabolic alkalosis in patients who do not respond well to dietary management through potassium-rich foods or diuretic dose reduction.	Each bag contains potassium chloride 1.0g*6 bags/box	Box	1.30
5		Latamoxef Sodium for Injection	For the treatment of infections caused by susceptible bacteria, including: sepsis, meningitis, respiratory infections (pneumonia, bronchitis, bronchiectasis, lung abscess, empyema, etc.), digestive system infections (cholangitis, cholecystitis, etc.), intraperitoneal infections (liver abscess, peritonitis, etc.), urinary and reproductive infections (pyelonephritis, cystitis, urethritis, gonorrhea, epididymitis, intrauterine infection, uterine adnexitis, pelvic inflammatory, etc.), skin and soft tissue infections, bone and joint infections, and wound infections.	0.5g*1 bottle/ bottle	Bottle	8.00
6		Ampicillin Sodium and Sulbactam Sodium for Injection	For the treatment of infections caused by susceptible bacteria. Typical indications include: sinusitis, otitis media, epiglottitis, bacterial pneumonia and other upper and lower respiratory tract infections; urinary tract infections and pyelonephritis; intra-abdominal infections such as peritonitis, cholecystitis, endometritis, pelvic cellulitis; bacterial septicemia of infections of the skin, soft tissues, bones, and joints; gonococcal infections. During the perioperative period, this medication may also be administered via injection to reduce the incidence of wound infections in patients following abdominal and pelvic surgeries, as wound infections may lead to peritoneal infections. In cases of pregnancy termination or cesarean section, Ampicillin Sodium and Sulbactam Sodium for Injection can be used prophylactically to reduce the risk of postoperative sepsis.	0.75g*1 bottle/ bottle	Bottle	1.45
7		Piperacillin Sodium for Injection	For the treatment of infections of septicemia caused by susceptible Enterobacteriaceae, Pseudomonas aeruginosa, and Acinetobacter species; upper urinary tract and complicated urinary tract infections; respiratory tract infections; biliary tract infections; intra-abdominal infections; pelvic infections; skin and soft tissue infections. Piperacillin, in combination with aminoglycosides, is also indicated for infections in immunocompromised patients with neutropenia.	1g*1 bottle/box	Bottle	1.23
8		Ampicillin Sodium for Injection	For the treatment of infections caused by susceptible bacteria, including: respiratory tract infections; gastrointestinal infections; urinary tract infections; soft tissue infections; endocarditis; meningitis; septicemia etc.	1g*1 bottle/box	Bottle	1.41
9		Penicillin Sodium for Injection	For the treatment of each infection caused by susceptible bacteria, such as abscesses, bacteremia, pneumonia, and endocarditis.	800,000 units*1 bottle/bottle	Bottle	0.56
10		Sitagliptin Phosphate Tablets	Monotherapy: This product, in conjunction with dietary management and exercise, is indicated to improve glycemic control in patients with type 2 diabetes mellitus. Combination therapy with metformin: When glycemic control is inadequate with metformin hydrochloride monotherapy, this product may be used in combination with metformin hydrochloride to improve glycemic control in patients with type 2 diabetes mellitus, in conjunction with diet and exercise.	100mg*30 tablets/bottle	Bottle	5.59

Note: The Group's products selected in the sixth batch of national centralized procurement, Human Insulin Injection and Protamine Human Mixed Insulin Injection (30R), were also elected into the 2024 national centralized procurement (insulin specialty successive procurement).

Integrated production and streamlined operation

In order to further improve the competitiveness of the production system of pharmaceutical manufacturing business, improve operational efficiency and implement the internationalization strategy, the Group continued to streamline and discover its internal competitive production capacity, deepened the integration of the production side, realized the rapid transformation of products through the construction of API and preparation bases and engineering technology centers, and developed internationally competitive star production lines and production bases.

The Group continued to consolidate production lines on the production side, built regional production centers, gathered production capacity and achieved the integration of APIs and preparations, so as to further improve production and operation efficiency and expand production cost advantages. During the Reporting Period, the Group built regional production centers in Xuzhou and Chongqing, continuously advanced the construction and operation of Xingnuo Pharma API Base, Dongting Pharma API Base and Yao Pharma Changshou API Base, and vertically integrated the APIs and preparation industry chains, realizing intensive mass production capacity. At the same time, the Group also actively deployed production lines for complex preparations and special preparations, and the production lines for BFS, spray drying and OEB4/5 have entered into the construction and/or production phases. As at the end of the Reporting Period, the validation and trial production stage of the tranexamic acid production line and Gentamicin B fermentation and purification workshop production line in Dongting Pharma API Base had commenced. The product process validation in Yao Pharma Changshou API Base for clindamycin hydrochloride had been conducted. Several products involved in some production lines of Xingnuo Pharma API Base had passed the on-site inspections on drug production license, GMP and registration verification and commenced commercial production. In particular, the OEB4 high-activity production line completed trial production. Xuzhou Industrial Park Preparation Base had completed the construction of BFS production line and new OEB4 oral solid preparation production line, the transfer of relevant products had commenced. New products would be successively introduced with increased production capacity in the subsequent stage. In addition, the Group continued with the construction of the Cote d'Ivoire park project, aiming to realize localization in drug manufacturing and supply in Africa.

At the same time, the Group continued to promote the building of production system with international quality standard, thus laying a solid foundation for the overseas distribution of preparations. The Group through different means including gap analysis, special training, reform and upgrade, etc., continued to improve quality systems based on domestic and international requirements, and enhanced the GMP knowledge, quality risk awareness and quality management capabilities of all employees. As at the end of the Reporting Period, all commercial production lines of the domestic subsidiaries under the pharmaceutical manufacturing segment of the Group obtained domestic GMP certifications, and 10 production lines had passed GMP certification in major regulatory markets such as the U.S. and the EU. During the Reporting Period, the domestic subsidiaries under the pharmaceutical manufacturing segment received over 120 official inspections as well as official sample tests on over 670 batches, all of which were passed smoothly.

During the Reporting Period, the Group recorded revenue of RMB4,320 million from the medical devices and medical diagnosis segment, representing a year-on-year decrease of 1.50%, which was mainly due to the

In the field of professional medical products, the Group accelerated concentration and integration, and focused on building the systematic capabilities in R&D, production, products and marketing through "licensed-in and incubation" and the "Intelligent Manufacture in China". During the Reporting Period, 58 units of "Da Vinci Surgical Robot" of Intuitive Fosun, the Company's associated companies, were being installed in total in Chinese mainland and Macau. The Intuitive Fosun headquarter industrial base was completed and put into use in the Zhangjiang International Medical Park in Shanghai in June 2024. As at the end of the Reporting Period, the "Da Vinci Surgical Robot" has been installed in over 300 hospitals, with a cumulative installation volume exceeding 460 units, serving more than 670,000 patients across Chinese mainland, Hong Kong and Macau. During the Reporting Period, the Da Vinci SP endoscopic single orifice surgical system developed by Intuitive Fosun has been included in the NMPA'enspec5(the)0.5(DaheadquarterInsghEec)0.5(Dai)0.5(jointuartervturure0.5(NMeoveblishe)0.5(inuitive FP

Regarding smart healthcare, Fosun Health provides users with closed-loop solutions throughout the treatment course and one-stop health management services that combine healthcare, medicines, health and insurance. Fosun Health continued to improve the "Cloud HIS" (a new generation of smart medical cloud platform) and the internet hospital SaaS of multiple medical institutions, including Foshan Fosun Chancheng Hospital and Guangzhou Xinshi Hospital during the Reporting Period, which promoted the online-offline integrated service model of regional medical associations at a faster pace and further expanded hospital departments and patient coverage. As at the end of the Reporting Period, nearly 160 clinics had contracted to join the Greater Bay Area regional medical institution alliances.

Regarding insurance empowerment, Fosun Health continued to promote the two-way empowerment of healthcare and insurance. During the Reporting Period, Fosun Health continued to establish the commercial insurance operation system. Leveraging the specialty departments and cutting-edge medical technologies of medical centers and regional medical associations, Fosun Health created customized innovative insurance payment solutions. In addition, Fosun Health continuously deepen the specialization in specific diseases, and integrated commercial insurance and medical services. As at the end of the Reporting Period, the medical institutions controlled by Fosun Health had contracted over 50 domestic and overseas insurance companies, and the commercial insurance service had been implemented in Foshan Fosun Chancheng Hospital, Shanghai Xingchen Children's Hospital, and Shenzhen Hengsheng Hospital.

Furthermore, Fosun Health continues to explore and innovate the application of AI technology in medical services. Regarding AI-powered patient services for more convenient medical visits, since 2024, the four hospitals in the Greater Bay Area have provided AI-driven intelligent outbound call services for chronic disease and post-surgery patients who missed their appointments. This service covers over 30 departments and more than 70 disease types, reaching over 40,000 follow-up cases. In terms of AI-assisted improvements in diagnostic efficiency, in February 2025, Fosun Health integrated DeepSeek into its "Cloud HIS" system to launch an AI assistant, which was deployed for operation in four hospitals in the Greater Bay Area.

Rehabilitation specialty business

During the Reporting Period, the Group continued to deepen its strategic deployment of the rehabilitation specialty business by actively expanding its core regional markets such as municipalities directly under the central government, new first-tier cities and provincial capitals, and promoting the "

In terms of empowering rehabilitation hospital operation, the Group has taken a series of measures for the rehabilitation specialty business, including improving various operation manuals to provide detailed and standardized guidance for daily operations, establishing a periodic operation analysis and management system to promptly identify operational issues and take corresponding measures, and formulating standardized solutions for each procedure to further enhance operational efficiency and quality. In terms of improving healthcare services expertise, the rehabilitation specialty business focused on enhancing its healthcare service capacity for key diseases, such as stroke, traumatic brain injury and spinal cord injury, continued to improve the rehabilitation discipline construction and optimize cultivation mechanism for professional talents, thereby maintaining its professional advantages in the field of rehabilitation. In terms of services, the rehabilitation specialty business centered on rehabilitation butler service, conducted whole lifecycle management for patients so as to continuously improve patient satisfaction and brand loyalty. Meanwhile, the Group has actively continued to connect with commercial insurance providers to explore diversified payment channels with the aim of providing patients with a more convenient and flexible payment method, as well as deepened strategic cooperation in the whole industry chain to achieve resources sharing and complementary advantages among enterprises therein.

During the Reporting Period, Sinopharm, an associated company, further clarified its development strategy and promoted the rapid transformation and upgrade of the business model on the basis of maintaining overall business stability. In 2024, Sinopharm recorded an operating income of RMB584.508 billion and net profit attributable to the parent company of RMB7.050 billion, representing a year-on-year decrease of 2.02% and 22.14%, respectively.

During the Reporting Period, the pharmaceutical distribution segment of Sinopharm showed the resilience of steady development, and recorded a revenue of RMB444.365 billion, representing a year-on-year increase of 0.75%. During the Reporting Period, Sinopharm enhanced the optimization and layout of the pharmaceutical distribution network, continued to lay a solid foundation for the development of the pharmaceutical distribution segment with high-quality terminal structure, and actively enhanced its market share. Meanwhile, Sinopharm continued to optimize the channel structure of pharmaceutical distribution business and promoted direct sales business to high-grade hospitals and retail terminals. As at the end of the Reporting Period, the proportion of its direct sales business increased steadily.

During the Reporting Period, due to the impact of comparison base arising from a reduction in device procurement projects under fiscal subsidy policies and a sharp decrease in the epidemic prevention materials with high gross profits under industry regulations, the revenue of the medical device distribution segment of Sinopharm recorded RMB117.915 billion, representing a year-on-year decrease of 9.44%.

During the Reporting Period, the revenue of the retail pharmacy segment of Sinopharm recorded RMB35.981 billion, representing a year-on-year increase of 0.82%. As at the end of the Reporting Period, the total number of retail pharmacies of Sinopharm was 11,213, among which there were 1,644 specialty pharmacies, representing an increase of 51 pharmacies compared with the end of 2023.

During the Reporting Period, the core competitiveness of the Group was reflected in its open innovative R&D ecology, forwardlooking international layout, systematic commercialization team and other aspects:

1. Advantages in R&D and innovation. The Group connected with teams with outstanding scientific talents, leading technologies and high-value products worldwide through diversified and multi-level cooperation models such as independent R&D, co-development, licensed-in projects and industrial investment. The Group continued to enrich its innovative product pipelines, enhanced the research and clinical development capabilities of FIC (First-in-class) and BIC (Best-in-class) products, and promoted the R&D and practice of innovative technologies and products through the integrated management of the innovative R&D projects by the global R&D center.

2. Advantages in internationalization. The Group implemented its internationalization strategy in multiple dimensions including innovative R&D, two-way license, production and operation as well as commercialization. The global BD team kept enhancing the two-way license of products and IP, and deployed in frontier areas through R&D cooperation and licensed-in projects, while drug clinical and registration teams in the U.S., Africa, Europe, India, Japan, Middle East and Southeast Asia continued to strengthen overseas drug registration and application capabilities. The Group also accelerated the international quality system certification of domestic production lines, and further deepened its international marketing capabilities, so as to continue to expand the international market. In particular, as at the end of the Reporting Period, in the field of medical devices, the Group's marketing network for medical cosmetology equipment covered over 110 countries and regions worldwide, and has established direct sales layouts in multiple countries.

3. Advantages in commercialization. The Group continuously enhanced the construction and integration of marketing system, and had formed a marketing system by product lines featured by professionalism, branding, digitalization and compliance that supported existing products and products to be launched. As at the end of the Reporting Period, the Group had built up a comprehensive supporting system covering aspects such as medical affairs, large access system, medical strategic alliance, brand and market promotion, etc.

1. Analysis of Changes in Relevant Items of Income Statement and Statement of Cash Flows

Unit: million Currency: RMB

			(%)	
Revenue	40,910	41,249	–0.82	*Note 1*
Cost of sales	21,366	21,595	–1.06	*Note 1*
Selling and distribution expenses	8,680	9,712	–10.63	*Note 2*
Administrative expenses	4,440	4,495	–1.22	
Credit impairment losses	111	132	–15.91	*Note 3*
R&D expenses	3,644	4,346	–16.15	*Note 4*
Other gains	1,010	1,392	–27.44	*Note 5*
Other expenses	567	832	–31.85	*Note 6*
Finance costs	1,432	1,325	8.08	*Note 7*
Share of profits and losses of:				
Associates	1,828	2,387	–23.42	*Note 8*
Net cash flow generated from operating activities	4,477	3,414	31.13	*Note 9*
Net cash flow generated from financing activities	–1,003	–1,336	24.96	*Note 10*

Note 1: For the reasons for the year-on-year change in revenue and cost of sales, please refer to "Segment Performance Overview" in "Management Discussion and Analysis".

Note 2: During the Reporting Period, the selling and distribution expense ratio was 21.22%, representing a decrease of 2.32 percentage points as compared to the same period of last year. Gross profit margin less selling and distribution expenses ratio was 26.55%, representing an year-on-year increase of 2.44 percentage points. This was mainly due to the combined effects that: (1) the Group continued to strengthen the control of selling and distribution expenses through refined management and optimized resource allocation; (2) the structure of sales products has changed, and the sales expense ratio of centralized procurement products has decreased year-on-year; (3) the Group maintained investment in market development and sales team for new product launched.

Note 3: Mainly due to the credit impairment provisions made for COVID-19-related receivables during the same period of last year.

Note 4: Mainly due to the fact that during the Reporting Period, the Group concentrated on quality pipeline assets and enhanced efficiency by integrating its R&D system; as the R&D projects advance, multiple pipelines met the criteria for capitalization recognition, leading to the R&D investment of several projects transferred to development expenditure; in addition to self-initiated R&D, the Group actively implemented an open R&D model by leveraging industry funds and other mechanisms to incubate R&D projects, so as to ensure the sustainability of innovation and R&D investment.

Note 5: Mainly due to the fact that the gains from the disposal of non-core assets, such as Tianjin Pharma, in the same period of last year were greater than those in the current period.

Note 6: Mainly due to fair value changes on financial assets held such as YSB and BFLY.

Note 7: Mainly due to factors such as the appreciation of the United States dollars, changes in the size of interest-bearing liabilities, rehabilitation medical business's long-term leases subject to the recognition of lease liabilities in accordance with the lease standard, leading to the corresponding increase in financial costs.

Note 8: Mainly due to a year-on-year decline in the share of profits from associates.

Note 9: Mainly due to the Group's initiatives in supply chain management and operational efficiency improvement, resulting in the increase of operating cash flow over-performing the growth of operating profit for the period.

Note 10: Mainly due to the combined effects of cash inflows from the partial disposal of Gland Pharma's equity interest and changes in the scale of interest-bearing liabilities during the Reporting Period.

2. Analysis of Revenue and Cost of Sales

(1) Principal Operations by Segments, Products, Geographical Locations

Unit: million Currency: RMB

			(%)	(%)	(%)	
Pharmaceutical manufacturing	28,776	13,218	54.07	–4.34	–6.19	increase of 0.91 percentage point
Medical devices and medical diagnosis	4,320	2,158	50.05	–1.50	–1.95	increase of 0.23 percentage point
Healthcare services	7,642	5,910	22.66	14.62	12.98	increase of 1.12 percentage points

			(%)	(%)	(%)	
Major products of anti-tumor and immune modulation	8,085	1,716	78.78	5.84	9.54	decrease of 0.71 percentage point
Major products of anti-infection[(Note)]	3,126	1,003	67.92	–27.95	–53.79	increase of 17.94 percentage points
Major products of metabolism and alimentary system	2,793	693	75.20	–0.73	8.89	decrease of 2.19 percentage points
Major products of cardiovascular system	1,912	1,185	38.02	14.00	13.75	increase of 0.13 percentage point
Major products of central nervous system	1,099	159	85.57	–21.01	–2.35	decrease of 2.76 percentage points
Major products of APIs and intermediate products	1,106	810	26.75	–12.97	–10.97	decrease of 1.65 percentage points

(3) Analysis of Cost

Unit: million Currency: RMB

			(%)		(%)	(%)
Pharmaceutical manufacturing	Cost of products	13,218	61.87	14,090	65.25	–6.19
Medical devices and medical diagnosis	Cost of products and goods	2,158	10.10	2,201	10.19	–1.95
Healthcare services	Cost of services	5,910	27.66	5,231	24.22	12.98

Unit: million Currency: RMB

			(%)		(%)	(%)
Major products of anti-tumor and immune modulation	Cost of products	1,716	12.98	1,566	11.12	9.54
Major products of anti-infection[(Note)]	Cost of products	1,003	7.59	2,170	15.40	–53.79
Major products of metabolism and alimentary system	Cost of products	693	5.24	636	4.51	8.89
Major products of cardiovascular system	Cost of products	1,185	8.97	1,042	7.39	13.75
Major products of central nervous system	Cost of products	159	1.20	162		

(4) Major Customers and Suppliers

Sales to the top 5 customers of the Group amounted to RMB10,069 million in aggregate, representing 24.52% of the total sales for the year.

Purchases from the top 5 suppliers of the Group amounted to RMB1,354 million in aggregate, representing 8.97% of the total purchases for the year.

3. Expenses

During the Reporting Period, selling and distribution expense of the Group amounted to RMB8,680 million; the selling and distribution expense ratio was 21.22%, representing a decrease of 2.32 percentage points as compared to the same period of last year; and gross profit margin less selling and distribution expenses ratio was 26.55%, representing an year-on-year increase of 2.44 percentage points. The year-on-year change in selling and distribution expense ratio was mainly due to: (1) changes in product mix; (2) refined management and optimized resource allocation, promoting flat marketing system management to concentrate resources on the front line of marketing, and promoting the improvement of team efficiency; and (3) integration of marketing resources to promote integrated access to strategic alliances, resulting in lower marketing expenses ratio.

During the Reporting Period, the administrative expense of the Group amounted to RMB4,440 million, representing a year-on-year decrease of 1.22%; excluding the impact of newly acquired companies, administrative expenses decreased by RMB318 million on the same basis.

During the Reporting Period, the finance costs of the Group amounted to RMB1,432 million, representing a year-on-year increase of 8.08%, mainly due to factors such as the appreciation of the United States dollars, changes in the size of interest-bearing liabilities, rehabilitation medical business's long-term leases subject to the recognition of lease liabilities in accordance with the lease standard, leading to the corresponding increase in financial costs.

4. R&D Expenditures

Accounting treatment of R&D expenditures

The Group divides expenses for internal R&D projects into expenses in the research phase and expenses in the development phase. Expenses in the research phase are recognized in profit or loss for the period as incurred. Expenses in the development phase may only be capitalized if the following conditions are satisfied simultaneously: the completion of such intangible assets for use or sale is technically feasible; the Company has the intention to use or sell the intangible assets upon completion; the way in which the intangible assets bring economic benefits shows that there exists a consumption market for the products with use of these intangible assets or the intangible assets themselves, or that they are useful in case of internal utilization; the Company has sufficient technological, financial and other resources to complete the development of the intangible assets and the ability to make them available for use or sale; and the expenses attributable to such intangible assets can be measured reliably at the development stage. Development expenses not satisfying all of the above conditions are recognized in profit or loss of the period as incurred. Combining the characteristics of the R&D process of the pharmaceutical industry and of the Group itself, the Group's expenses for its R&D projects may only be accounted for as capitalized R&D expenses if they are incurred after relevant approvals or certificates (Approval for Clinical Trial and Pharmaceutical Product Registration Approval Document) based on Measures on the Registration Administration of Medicines (

) issued by NMPA or approval from international drug regulatory authority on the regulatory market) are obtained, and if the present value of the Company's future cash flow or realizable value resulting from the evaluated project results are higher than the book value. The remainder of the R&D expenses would be expensed.

Unit: million Currency: RMB

R&D expenditures expensed for the year	3,644
R&D expenditures capitalized for the year	1,910
Total R&D expenditures	5,554
Total R&D expenditures as a percentage of revenue (%)	13.52
R&D expenditures in the pharmaceutical manufacturing segment as a percentage of the revenue from the pharmaceutical manufacturing segment (%)	16.98
Percentage of R&D expenditures capitalized (%)	34.39
The number of R&D staff in the Group	3,047
The number of R&D staff as a percentage of the total number of staff in the Group (%)	7.51

Descriptions

During the Reporting Period, the Group maintained stable R&D intensity while continuously optimizing its innovation system. By focusing on advantageous pipelines and integrating R&D systems, operational efficiency was enhanced. During the Reporting Period, the Group's total R&D expenditure reached RMB5,554 million, including R&D expenses of RMB3,644 million and capitalized R&D expenditure of RMB1,910 million. It was mainly due to the fact that as the R&D projects advance, R&D expenditure of multiple pipelines met the criteria for capitalization recognition, leading to the R&D investment of several pipelines transferred to development expenditure, such as serplulimab injection's indications under research (gastric cancer (GC), limited-stage small cell lung cancer, etc.), HLX22 (anti-human epidermal growth factor receptor-2) (HER2) humanized monoclonal antibody injection), Dimethyl malonate formonertinib capsules, 13-valent pneumococcal conjugate vaccine (multivalent combinations). In addition to self-initiated R&D, the Group also actively implemented an open R&D model and leveraged industry funds and other mechanisms to incubate innovation and R&D projects, so as to ensure the sustainability of innovation and R&D.

5. Cash Flows

Unit: million Currency: RMB

As at 31 December 2024, the ratio of total interest-bearing bank and other borrowings over total assets was 28.16%, as compared with 28.72% as at 31 December 2023.

Unit: million Currency: RMB

		(%)		(%)	(%)	
Financial assets at fair value through profit or loss — current	2,596	2.21	1,888	1.66	37.50	*Note 1*
Contract assets	128	0.11	146	0.13	–12.33	*Note 2*
Assets held for sale	75	0.06	–	–	100.00	*Note 3*
Investments in joint ventures	21	0.02	79	0.07	–73.42	*Note 4*
Property, plant and equipment	22,203	18.91	20,846	18.38	6.51	*Note 5*
Right-of-use asset	4,691	3.99	4,248	3.75	10.43	*Note 6*
Deferred income tax assets	758	0.65	624	0.55	21.47	*Note 7*

Lease liabilities — non-current	2,542	2.16	2,050	1.81	24.00	*Note 8*

Note 1: Mainly due to the changes in the fair value of financial assets held, as well as the transfer of investments held from long-term assets because of the loss of significant impact and partial sales.

Note 2: Mainly due to the decrease in contract receivables.

Note 3: Mainly attributable to assets contracted for sale pending settlement at the end of the Reporting Period.

Note 4: Mainly due to the fact that Fosun Kairos has transformed to a subsidiary from a joint venture.

Note 5: Mainly due to the transfer of construction of biomedical industry park to fixed assets.

Note 6: Mainly due to new long-term leases of subsidiaries.

Note 7: Mainly due to the increase of deferred income tax assets by subsidiaries.

Note 8: Mainly due to new long-term leases of subsidiaries.

1. Operation and Results of Subsidiaries of the Group

3. Acquisition and Disposal of Subsidiaries during the Reporting Period (including the Purposes, Methods and Effects of the Acquisitions and Disposals and the Effects on the Group's Overall Operation and Results)

(1) Acquisition of Subsidiaries during the Reporting Period

The acquisitions of the subsidiaries during the Reporting Period have had the following effect on the Group's production and results:

Shenzhen Fosun Pharmaceutical Technology Co., Ltd.* ( )	Equity transfer	22 October 2024
Fosun Kairos	Equity transfer	31 October 2024

(2) Disposal of Subsidiaries during the Reporting Period:

Chongqing Guoyu Health Management Co. Ltd*. ( )	Equity transfer	28 March 2024
Guo Rong Le Yang Health Technology (Shanghai) Co. Ltd.* (( ))	Equity transfer	29 March 2024
Fujian Jiahu Healthcare Management Co. Ltd.* ( )	Equity transfer	23 April 2024
Sinopharm Putian Hanjiang Medical Investment Management Co. Ltd.* ( )	Equity transfer	27 June 2024
Tongfuhui (Shanghai) Health Service Co., Ltd.* (( ))	Equity transfer	23 October 2024
Shanghai Futuo Zhida Healthcare Technology Co., Ltd.* ( )	Equity reorganization	20 December 2024

As at the end of the Reporting Period, the Group had a total of 40,557 employees. The employee's remuneration policies of the Group are formulated on the basis of the performance, work experience and salary level prevailing in the market.

In terms of market demand and payment in 2024, in view of the accelerated population aging and increased burden caused by disease, as well as the growing awareness in health among residents, the government emphasizes health sector and further increases investment in public health and medical health so as to encourage innovative R&D and development of new treatment technologies as well as localization of high-end medical equipment from a policy level. The medical and healthcare market in China maintained a long-term and stable growth trend. With the population aging and the development of treatment technology, the spectrum of disease also changes. The prevalence and diagnosis rate of tumors and immune system diseases continue to rise. The population of patients with chronic diseases continues to expand, and there are still an enormous amount of clinical treatment needs to be met. These drivers will encourage local companies to firmly follow the path of innovation and transformation, and provide patients with new treatments with higher efficacy and affordability. In terms of industry policies, enterprises are led and encouraged by the government to undergo upgrade and structural optimization in terms of strategic emerging industries, in order to achieve the overall transformation of the local pharmaceutical industry while aiming at high-value innovations and promoting high quality development. In terms of payment policies, the National Medical Insurance Drugs Catalogue is further expanded to include new products into the catalogue at a faster pace, which reflects the policy orientation to develop more accessibility and affordability. Centralized procurement of drugs in bulk is regularly undertaken in line with regulations and the scope of centralized procurement of high-value medical supplies in bulk is continuously expanded, which further expands the scope for medical insurance payment and further expands the medical insurance coverage on innovative products. The policies continue to support the long-term healthy development of innovative, large-scale domestic pharmaceutical enterprises with international presence. In the overseas expansion of domestically developed innovative drugs, Chinese pharmaceutical companies are actively exploring international markets. Through the NewCo model (collaborating with overseas investors to establish new joint ventures), domestic innovative drug companies are establishing overseas structures to realise the overseas expansion of their pipeline interests. Diversified external licensing has driven the enterprise's rapid growth while providing high-quality innovative medicines to more patients in need globally.

As the industry has become more regulated, standardized and professional in the course of development, a further rise was seen in level of concentration of the industry. The continuous upgrade of the industry unavoidably presents pressure and challenges in terms of operations in the transformation process to local enterprises in the short term. Nevertheless, such circumstance will benefit the rapid development of leading enterprises and innovative individual business in the long term. Meanwhile, uncertainties lurk within the global economy environment. The international expansion of domestic enterprises will be subject to various challenges, but enterprises with robust independent innovation capabilities will continue to enjoy the room for international development.

The Group will commit to its mission of improving human health, adhere to its corporate philosophy of "Innovation for Good Health", and endeavor to capture the momentum presented by the broad pharmaceutical market in China as well as the rapid g58.8ora34Hth58.8ora amainstream58.8orin Chithe the rapid rapid well radent Strategses

In terms of the established medicines manufacturing & supply business, with respect to R&D, the Group will establish R&D projects for difficult generic drugs and differentiated products as well as improved new drugs and innovative drugs, efficiently promote the development of pipeline products, and actively make deployment in high-end/complex preparations such as in situ gels, minitablets, oral fast dissolving film, inhalation and sustained and controlled release, to form a differentiated R&D layout. In terms of operation, the Group will consolidate and plan the industrial layout, strengthen the integration of APIs and preparations, as well as deploy characteristic APIs and emerging technology platforms, strengthen the capacity construction of international registration and marketing system of

Healthcare services

In 2025, based on the continuous consolidation on its existing advantageous areas, the healthcare services business with focus on comprehensive medical institutions, will continue to improve specialized service capabilities and a full life cycle management system based on patients' disease process, so as to further enhance the standard of its medical services. It will also continue to strengthen its core capabilities, promote the innovation and application of medical technologies, and enhance the integrated operation efficiency. It will continue to enhance the cooperation with commercial insurance in terms of depth and breadth, increase the coverage of commercial insurance in healthcare services business, and accelerate the expansion of one-stop health management services for the integration of medicine, healthcare and insurance. It will continue to deepen the integrated online and offline smart healthcare services based on the digital platform. Meanwhile, it will explore capabilities of international medical services, with a focus on the Greater Bay Area.

In 2025, regarding the rehabilitation specialty business, the Group will promote the opening of rehabilitation hospitals under construction and continue to refine the rehabilitation hospital standardization model 3.0 to enhance operational benchmarking and capability empowerment. Efforts will be continued to promote the standardization of rehabilitation assessment criteria and quality control systems. The Group will further improve brand management and service platform development to solidify its market positioning as "precision rehabilitation" with a "mid-to-high-end" brand image, alongside building and continuously improving an interconnected group-base rehabilitation information system. In parallel, the "clinical-rehabilitation integration" development will be strengthened to further enhance the experience of rehabilitation patients and realize full-cycle management and optimization of rehabilitation services.

(I) Industry policies adjustments

The medical healthcare industry is one of the industries most affected by national policies, involving various ministries and commissions and institutions such as national medical insurance, health, drug supervision and administration, industry and information technology, technology and intellectual property rights. With intensified efforts in the reform of drug production and manufacturing, medical health and healthcare security, the landscape of the healthcare industry is still in the midst of continuous changes, leading to the innovative transformation, industry consolidation and transformation in business models becoming a matter of great urgency. As the connection among the elements in "Three Medical Linkages" grows stronger, the promotion and implementation of new policies on national and regional centralized procurement of drugs and devices in bulk, rational drug use policies, control of medical cost growth rates, adjustments to price and payment method for medical insurance, dynamic adjustments to National Medical Insurance Drug Catalogue, National Medical Insurance Drug Catalogue preferential inclusion of cost-effective innovative drugs, and biosafety and environmental protection mechanisms have affected the production costs and profitability of the entire pharmaceutical industry and brought about a renovated competitive structure to the industry.

In the field of medical devices and medical diagnosis, the policies encourage the integration of the enterprise's resources and advantage complementation, and put innovation as the development focus, which intensifies the support for the innovation of high-end medical devices, and thus the technology levels of clinical products are continuously improved. Equipment upgrade and centralized procurement of medical consumables in bulk also bring about a drastic change to the industry.

In the field of healthcare services, socially organized medical institutions need to conduct more strategic and diversified deliberations on how to strengthen collaboration with dominant public healthcare providers while pursuing differentiated development patterns and collaborative expansion. Concurrently, rapidly refined policies on internet-based healthcare have propelled medical services into a new phase of integrated online-offline development, transitioning from the traditional single offline model.

In this regard, the Group will closely monitor and analyze on the policy trends of related industries, keep abreast of the development trends of the industry and continuously improve business management mechanisms, so as to fully reduce the business risks caused by policy changes.

(II) Market competition risks

With the deepening reform of the medical system, the National Healthcare Security Administration has initiated a comprehensive governance of drug and consumable prices, and extended it to retail terminals. Meanwhile, it increased the reform efforts in healthcare payment based on Diagnosis Related Groups (DRG) and Diagnosis Intervention Packet (DIP), aiming to further optimize and reshape medical practices.

In the field of innovative drugs, since the market size of generic drugs has shrunk drastically, numerous generic drugs companies seek transformation. With China's entry into the International Council for Harmonisation of Technical Requirements for Pharmaceuticals for Human Use (ICH) and the domestic drug review and approval system being gradually brought into line with international standards, more and more innovative drugs are being launched at a faster pace. The internal competition among local innovative pharmaceutical companies has been increasingly fierce, and at the same time, they are also facing competition from international pharmaceutical companies. The National Reimbursement Drug List negotiation mechanism, primarily targeting innovative drugs, demonstrates a trend of accelerating the inclusion of newly launched products, while simultaneously tightening pricing restrictions on innovative drug products. In addition, the development and launch of innovative products by domestic pharmaceutical companies in overseas markets also face challenges such as heavy investment and lack of familiarity with regulatory requirements.

In the field of generic drugs, the tightening of medical insurance cost control policies, coupled with the advancement of the generic drug consistency evaluation and the implementation of the centralized procurement in bulk policy, are driving a further increase in industry concentration within the generic drugs. Meanwhile, with the progressing supply-side reforms and the rapid launch of more innovative drugs, the market shares and profit margins of generic pharmaceutical products will be subject to further pressure.

In addition, the competition for generic drugs in the overseas markets, mainly in the U.S., has been intense and price pressure has further increased. At the same time, the drug regulatory agencies are imposing increasingly stringent requirements on production quality. These factors constitute unavoidable risks during the deepening of internationalization. In emerging markets such as Africa, more and more generic drugs companies have joined the competition, resulting in intensified price pressure on government tenders, as well as increasing risks of competition.

In this regard, the Group will continuously track and keep abreast of the changes in development trend of the industry, insist on innovation R&D, enrich product pipelines, optimize product structure, and enhance the R&D efficiency. At the same time, the Group will enhance the benefits from economies of scale, and proactively improve quality and increase productivity for production. In terms of marketing, the Group will increase efforts in market development and enhance the marketability of products, so as to further expand market coverage.

(III) Business and operating risks

1. R&D risks of drugs

Drugs must undergo processes ranging from preclinical studies, clinical trials, application for registration and approval for production from the R&D stage to marketing stage, and drug R&D is characterized by large investment, long cycles, high risks, etc. and is also susceptible to various unpredictable factors. In addition, if the R&D of drugs does not match future market demand, or if the sales of the new drugs are not sufficient due to intensified competition and other factors, the recovery of the initial investment and the realization of economic benefits may be affected, which will in turn adversely affect the profitability and development of the Group.

In this regard, the Group will continue to strengthen its project and early research capabilities, adhere to a lean R&D concept and process, scientifically employ Go/No-go decisions, and promote the continuous improvement of R&D efficiency and output with an effective reward and punishment mechanism. In addition, the Group will further strengthen the construction of BD and clinical registration capabilities by introducing and developing product pipelines with high clinical value and strong innovative attributes, and accelerate the launch of innovative products. At the same time, the Group will also actively promote and develop competitive product pipelines by virtue of various models such as industry-university-research cooperation, industrial investment and fund incubation.

2. Quality control risks of products and services

Drugs, medical devices and diagnostic products are special commodities, and the society pays a great deal of attention to their quality. The Group has been continuously increasing its management efforts and investment in technological upgrading in terms of quality management. The technology and equipment standards of subsidiaries have significantly improved. However, due to the multiple production stages for pharmaceutical products, quality issues may arise due to raw materials, production, transportation, storage, use and other matters. Meanwhile, the Group has formulated corresponding management measures and established management agencies to ensure that the procurement, inventory, preparation, and sales of pharmaceuticals, medical devices, and diagnostic products comply with GMP or GSP and relevant requirements and operate in accordance with the laws. However, there may still be the possibility that the relevant operating entities will be punished for failing to strictly abide by relevant laws and regulations due to reasons such as poor management in the actual course of operation.

The healthcare services segment may be subject to risks of medical malpractice claims or disputes, including complaints and disputes between doctors and patients arising from surgical errors, medical misdiagnosis and incidents relating to defects of treatment and diagnostic devices. In the event of serious medical malpractice, relevant compensation and loss may be incurred by the Group, which may in turn affect the operation results, brand and market reputation of the Group's healthcare services institutions.

In this regard, the Group will continue to maintain lean operation, adhere to quality and risk management throughout the life cycle of its products, and practically implement quality and safety control mechanisms and pharmacovigilance mechanism. For healthcare services, the Group will strengthen the construction of disciplines and improve the quality of operations while pursuing business development.

(V) Exchange rate fluctuation risks

With the implementation of internationalization strategies, the Group continued to expand its operation areas, and the proportion of purchases, sales, and mergers and acquisitions denominated in foreign currencies has continued to increase. Changes in exchange rates will affect the value of assets and liabilities denominated in foreign currencies and the value of invested overseas entities, thereby indirectly causing changes in the Group's income or cash flow over a period of time. With the continuous deepening of the reform of exchange rate marketization, the exchange rate between RMB and other convertible currencies fluctuates in a greater range during the exchange rate settlement process and therefore brings the risk of exchange rate fluctuations.

In this regard, the Group will keep paying attention to fluctuations of the foreign exchange rate, optimizing the structure of domestic and overseas assets, and reasonably controlling foreign exchange exposure so as to improve the ability to deal with exchange rate fluctuation risks.

(VI) Force majeure risks

Severe natural disasters and abrupt public health incidents may harm the properties and personnel of the Group, and may affect the normal production and operation of the Group.

In this regard, the Group will continue to strengthen the analysis and prediction of force majeure risks and improve the emergency management system so as to try to reduce the adverse impact that force majeure incidents may bring to operations.

Fosun High Tech, a controlling shareholder of the Company, planned to further increase its shareholding in the Company (including A Shares and/or H Shares) by way of, including but not limited to, centralised price bidding or block trade at the stock exchanges and transfer by agreement (and/or through parties acting in concert with it) within the 12-month period commencing from 13 September 2023, if and where appropriate, and the cumulative total consideration thereof shall not be less than RMB100 million (including the total consideration for an increase in shareholding of A Shares of not less than RMB100 million) and the additional shareholding interest to be acquired in aggregate shall not exceed 2% of the total number of shares of the Company as at 13 September 2023 (i.e. 2,672,156,611 shares, the same below) (and the aggregated number of shares in the Company to be acquired in the 12-month period on a rolling basis shall not exceed 2% of the total number of shares of the Company) (the " "). Fosun High Tech and/or parties acting in concert with it shall not reduce its/their shareholding in the Company during the implementation of the Shareholding Increase Plan and within the statutory restricted period.

As at 12 September 2024, the term of the Shareholding Increase Plan expired. Under the Shareholding Increase Plan, Fosun High Tech acquired a total of 4,295,000 A Shares of the Company, representing approximately 0.16% of the total number of Shares of the Company as at 13 September 2023, with a cumulative consideration of approximately RMB101.19 million.

By resolutions of the Board dated 24 June 2024 and 23 August 2024 respectively, the privatization proposal of Shanghai Henlius, a subsidiary of the Company, and the amendments thereto were approved. Pursuant to the proposal (as amended), Fosun New Medicine (as the offeror and acquirer), a subsidiary of the Company proposed to acquire and cancel all shares of Shanghai Henlius (including H shares and unlisted shares) held by other existing shareholders of Shanghai Henlius by cash and/or share alternative (the " "), and to privatize Shanghai Henlius. Upon the completion of the Merger, Fosun New Medicine (as the subsisting entity after the Merger) will inherit and assume all assets, liabilities, interests, businesses, personnel, contracts and all rights and obligations of Shanghai Henlius, and the legal entity of Shanghai Henlius will be eventually deregistered.

On 22 January 2025, the Merger, as a special resolution, was approved by more than two-thirds of the voting shareholders present at the extraordinary general meeting of Shanghai Henlius. However, it was not passed at the H shareholders class meeting of Shanghai Henlius, where only independent H shareholders had the right to vote. Therefore, the Merger has not been implemented, and Shanghai Henlius will retain its H Share listing status.

The Directors are pleased to present their 2024 report and the audited consolidated financial statements of the Group for the year ended 31 December 2024.

The Group's scope of business is strategically organized along the pharmaceutical and healthcare industry chain, with a focus on the domestic market while expanding globally. Businesses directly operated by the Group include pharmaceutical manufacturing, medical devices and medical diagnosis and healthcare service. The Group also has a presence in pharmaceutical commerce through its investment in Sinopharm.

Details of the principal activities of the Group's principal subsidiaries are set out in note 1 to the financial statements. There were no significant changes in the nature of the Group's principal activities during the Reporting Period.

A review of the business of the Group in 2024 and a discussion and analysis of the material factors underlying the Group's performance, results and financial position during the year are provided in the sections headed "Financial Review" and "Business Review" in the Management Discussion and Analysis in this annual report, respectively. Description of the major risks and uncertainties confronted by the Group can be found throughout this annual report, particularly in the section headed "Potential Risks" in the Management Discussion and Analysis in this annual report. Particulars of important events affecting the Group that have occurred since the end of the Reporting Period, can be found in note 53 to financial statements. The outlook of the Group

Particulars of the names, places of incorporation and issued/registered share capital of the Company's principal subsidiaries are set out in note 1 to the financial statements.

Pursuant to the general mandate to repurchase H shares of the Company, which was considered and approved at the annual general meeting, the A Shareholders class meeting and the H Shareholders class meeting of the Company (the " ") respectively, and in order to preserve the value of the Company, the H Share repurchase plan (" ") was considered and approved at the 55th meeting of the ninth session of the Board of the Company on 12 July 2024. It was approved the repurchase of the H Shares by the Company on or before 31 December 2024 with internal financial resources, and the total number of H Shares to be repurchased not exceed 5% of the total number of H shares (i.e. 551,940,500 shares, the same below) of the Company as at the date of the resolution of the General Meetings (i.e. 26 June 2024, the same below).

As at 31 December 2024, the implementation period of the H Share Repurchase Plan expired. During the Reporting Period, the Company repurchased a total of 7,558,500 H Shares (representing approximately 0.28% of the total number of shares of the Company (i.e. 2,671,326,465 shares) as at 31 December 2024 and 1.37% of the total number of H shares of the Company as at the date of resolution of the General Meetings) on the Hong Kong Stock Exchange with an aggregated repurchase amount of approximately HK$96.71 million under the H Share Repurchase Plan, details of which are summarized below:

	(shares)	(HK$ per share)	(HK$ per share)	(HK$ million)
August 2024	3,132,500	12.64	11.98	38.56
September 2024	2,339,000	12.82	11.52	28.33
November 2024	862,500	14.98	13.96	12.46
December 2024	1,224,500	14.46	13.94	17.35
Total	7,558,500			96.71

Note: Any discrepancies between totals and sums of figures are due to rounding.

Pursuant to the 2022 Restricted A Share Incentive Scheme and relevant authorizations approved by the Shareholders of the Company at the extraordinary general meeting, the A Shareholders class meeting and the H Shareholders class meeting held on 29 November 2022, due to the occurrence of repurchase and cancellation situations as set out in the Restricted A Share Incentive Scheme, including: (1) the resignation of certain participants in the first grant and reserved grant or their retirement in accordance with national and the Company's regulations regarding retirement age; and (2) underperformance of appraisal indicator for 2023 annual results at the Group level, on 7 August 2024, the Board and the Supervisory Committee approved the Company to repurchase and cancel a total of 1,072,246 restricted A Shares with the total amount of RMB22,830,809.73. Excluding the interest of 5,025 restricted A Shares held by the retired participants accrued at the benchmark interest rate for deposit of the same period, the repurchase price of each restricted A Shares was RMB21.29. The relevant shares were repurchased on 27 September 2024 and cancelled on 8 October 2024.

Save as disclosed above, neither the Company nor any of its subsidiaries repurchased, sold or redeemed any of the Company's listed securities and has not disposed or sold of any of its treasury shares during the year ended 31 December 2024.

The amount of the Company's reserves available for distribution as at 31 December 2024, calculated in accordance with PRC rules and regulations, was RMB13,598 million.

During the Reporting Period, the Group's total purchases attributable to the Group's five largest suppliers were less than 30%, and the Group's total turnover attributable to the Group's five largest customers was less than 30%.

As at the end of the Reporting Period, the Board consisted of 12 Directors. The Directors are as follows:

Mr. Wu Yifang ( ) *(Chairman)*
Mr. Wang Kexin ( ) *(Co-Chairman)*
Ms. Guan Xiaohui ( ) *(Vice Chairman)*
Mr. Wen Deyong ( ) *(Chief Executive Officer)*

Mr. Chen Qiyu ( )
Mr. Xu Xiaoliang ( )
Mr. Pan Donghui ( )
Mr. Chen Yuqing ( )

Ms. Li Ling ( )
Mr. Tang Guliang ( )
Mr. Wang Quandi ( )
Mr. Yu Tze Shan Hailson ( )

On 30 June 2024, Mr. Yao Fang resigned as a non-executive Director. At the 2024 first extraordinary general meeting held on 27 September 2024, Mr. Chen Yuqing was appointed as a non-executive Director.

As at the end of the Reporting Period, the Supervisory Committee consists of three Supervisors. The Supervisors are as follows:

Mr. Chen Bing ( ) *(Chairman)*
Mr. Guan Yimin ( )
Ms. Wang Lina ( )

Ms. Ren Qian resigned as the employee Supervisor and the chairman of the Supervisory Committee with effect from 19 June 2024. At the employee representatives meeting held on 19 June 2024, Ms. Wang Lina was appointed as the employee Supervisor with effect from 19 June 2024 until the expiry of the term of the current session of the Supervisory Committee. At the Supervisory Committee meeting held on 19 June 2024, Mr. Chen Bing was appointed as the chairman of the Supervisory Committee with effect from 19 June 2024 until the expiry of the term of the current session of the Supervisory Committee.

Biographical details of the Directors, Supervisors and the senior management of the Company are set out on pages 117 to 129 of this annual report.

Each of the Directors and Supervisors has entered into a service contract with the Company for a term of not more than three years until the conclusion of the forthcoming general meeting of the Company, at which members of the next session of the Board and Supervisory Committee will be elected. None of the Directors or Supervisors has an unexpired service contract which is not determinable by the Company within one year without payment of compensation (other than statutory compensation).

The executive Director who is also the senior management of the Company is not entitled to receive by way of remuneration for their services as being executive Directors, but entitled to receive by way of remuneration for their services as the senior management of the Company, and such remuneration will be assessed and determined by the Board. The remuneration for the full-time Directors should be determined by the Shareholders at the general meetings of the Company based on the economic benefits received by the Company and by reference to factors including the responsibilities and performance of the Directors and the remuneration standards of the industry. The allowances for the independent non-executive Directors should be determined by the Shareholders at the general meeting of the Company.

Save for the connected transactions as disclosed in the section headed "Connected Transactions" under the "Report of the Directors"

(1) (L) — Long position

(2) Delisted from the Hong Kong Stock Exchange in March 2025.

As at 31 December 2024, so far as is known to the Directors and Supervisors, the persons or entities, other than the Directors, Supervisors or chief executive of the Company, who had interests or short positions recorded in the register required to be kept under section 336 of the SFO were as follows:

Fosun High Tech	Beneficial owner	H Share	71,533,500(L)	12.96%
	Beneficial owner	A Share		

At no time during the year ended 31 December 2024 and up to the date of this report was there any permitted indemnity provision in force for the benefit of any of the Directors and the Supervisors (whether made by the Company or otherwise) or any directors and supervisors of an associated company (if made by the Company). The Company has arranged appropriate Directors', Supervisors' and senior management's liability insurance coverage for the Directors, Supervisors and senior management.

The adoption of the 2022 Restricted A Share Incentive Scheme was approved by the Shareholders of the Company at the extraordinary general meeting, the A Shareholders class meeting and the H Shareholders class meeting held on 29 November 2022. A summary of the principal terms of the Restricted A Share Incentive Scheme is set out below.

(1) Purpose

The Restricted A Share Incentive Scheme aims to further improve the corporate governance structure, promote the establishment and improvement of the incentive mechanism of the Group, fully mobilize the enthusiasm of the executive Directors and senior management personnel of the Company and employees of the Group, effectively align the interests of the Shareholders, corporate(s) and operators to focus on and work collectively for the long-term development of the Group.

(2) Participants

The participants under the Restricted A Share Incentive Scheme include executive Directors, senior management personnel of the Company, the mid-level management personnel of the Group and other employees to whom the Board considers provision of incentives to be appropriate. The detailed list of participants and their respective allocation under the scheme shall be proposed by the Board, independent non-executive Directors and the Supervisory Committee shall opine on the same, subject to the relevant procedures in the event the approval at the general meeting, the A Shareholders class meeting and the H Shareholders class meeting of the Company is required.

Participants under the Restricted A Share Incentive Scheme do not include any independent non-executive Director or Supervisor of the Company, or Shareholders individually or collectively holding more than 5% of the Shares of the Company or actual controller and his/her spouse, parents and children. The executive Directors and senior management personnel of the Company among the participants shall be elected at the general meetings or appointed by the Board. All participants shall have entered into employment agreements or engagement documents with the Company or its subsidiaries at the time of grant under the Restricted A Share Incentive Scheme and during the term of the Restricted A Share Incentive Scheme.

(3) Maximum number of shares to be issued and maximum shareholdings entitled by the participants

A number of up to 3,434,300 restricted A Shares were proposed to be granted to the participants under the Restricted A Share Incentive Scheme, representing up to 0.13% of the total number of shares of the Company (excluding treasury shares)[1] as at the date of this report. Specifically, a number of up to 2,747,500 Shares were granted under the first grant, representing up to 0.10% of the total number of shares of the Company (excluding treasury shares) as at the date of this report; and a number of up to 686,800 Shares were reserved for further grant, representing up to 0.03% of the total number of shares of the Company (excluding treasury shares) as at date of this report. The reserved grant portion represents up to 20% of the total Restricted A Shares to be granted under the Restricted A Share Incentive Scheme. The total number of shares of the Company granted to any of the participants under all share incentive schemes currently in force does not in the aggregate exceed 0.1% of the total number of shares of the Company as at 29 August 2022.

(4) Term, restriction period and unlocking arrangement

The term of the Restricted A Share Incentive Scheme shall be commencing from the completion date of registration of the Shares under the first grant (i.e. 13 December 2022, the same below) and ending on the date of all the Restricted A Shares granted to the participants having unlocked or repurchased and cancelled, the maximum period of which shall not exceed 60 months.

The restricted A Shares granted under the Restricted A Share Incentive Scheme shall be locked after completion of their registration. During the restriction period, the cash dividend from the restricted A Shares granted to the participants shall be held by the Company and payable to the participants upon unlocking; and in the event of the restricted A Shares are unable to be unlocked, the corresponding cash divided shall be forfeited by the Company. Within the unlocking period, the Company shall deal with matters related to the unlocking of those restricted A Shares which satisfy the conditions to such unlocking. The restricted A Shares which fail to satisfy the unlocking conditions, or fail to apply for unlocking the relevant restricted A Shares within the prescribed period as listed above, shall be repurchased by the Company at the repurchase price equal to the grant price in accordance with the terms of the Restricted A Share Incentive Scheme and cancelled accordingly.

[1] i.e. 2,657,108,265 Shares being the total number of shares of the Company (i.e. 2,671,326,465 shares) after deduction of shares repurchased but not canceled (i.e. 14,218,200 shares)

The restriction period (i.e. the vesting period) of the restricted A Shares granted under the first grant of the Restricted A Share Incentive Scheme (took place in 2022) shall be 12 months, 24 months and 36 months from the relevant completion date of registration of the Shares under the first grant (i.e. 13 December 2022), respectively. The unlocking schedule and arrangements for the restricted A Shares to be granted under the first grant are set out below:

First unlocking period	Commencing from the first trading day after expiry of the 12-month period from the date of completion of registration of certain corresponding restricted A Shares under the first grant and ending on the last trading day of the 24-month period from the date of completion of registration of certain corresponding restricted A Shares under the first grant	33%
Second unlocking period	Commencing from the first trading day after expiry of the 24-month period from the date of completion of registration of certain corresponding restricted A Shares under the first grant and ending on the last trading day of the 36-month period from the date of completion of registration of certain corresponding restricted A Shares under the first grant	33%
Third unlocking period	Commencing from the first trading day after expiry of the 36-month period from the date of completion of registration of certain corresponding restricted A Shares under the first grant and ending on the last trading day of the 48-month period from the date of completion of registration of certain corresponding restricted A Shares under the first grant	34%

The restriction period (i.e. the vesting period) of the restricted A Shares granted under the reserved grant of the Restricted A Share Incentive Scheme (took place in 2023) shall be 12 months and 24 months from the relevant completion date of registration of the restricted A Shares under the reserved grant (i.e. 21 September 2023, same as below) , respectively. The unlocking schedule and arrangements for the restricted A Shares to be granted under the reserved grant are set out below:

First unlocking period	Commencing from the first trading day after expiry of the 12-month period from the date of completion of registration of certain corresponding restricted A Shares under the reserved grant and ending on the last trading day of the 24-month period from the date of completion of registration of certain corresponding restricted A Shares under the reserved grant	50%
Second unlocking period	Commencing from the first trading day after expiry of the 24-month period from the date of completion of registration of certain corresponding restricted A Shares under the reserved grant and ending on the last trading day of the 36-month period from the date of completion of registration of certain corresponding restricted A Shares under the reserved grant	50%

(5) Grant price of restricted A Shares and the basis of determination

The grant price under the Restricted A Share Incentive Scheme (including the grant prices of the first grant and the reserved grant) shall be RMB21.29 per share. Upon fulfilment of grant conditions, each participant is entitled to purchase the A Shares newly issued to him or her by the Company at the price of RMB21.29 per share.

The grant price underlying the first grant of the Restricted A Share Incentive Scheme shall not be less than the nominal value of the Shares, and shall not be less than the higher of the following prices:

(a) 50% of the average trading price of the A Shares on the last trading day prior to the date of the A-Share announcement on the Restricted A Share Incentive Scheme (i.e. 29 August 2022); and

(b) 50% of the average trading price of the A Shares on the last 20 trading days prior to the date of the A-Share announcement on the Restricted A Share Incentive Scheme.

The grant price underlying the reserved grant of the Restricted A Share Incentive Scheme shall not be less than the nominal value of the Shares, and shall not be less than the higher of the following prices:

(a) 50% of the average trading price of the A Shares on the last trading day prior to the date of the announcement of Board resolution on the reserved grant (i.e. 31 August 2023);

(b) 50% of the average trading price of the A Shares on the last 20, 60 or 120 trading days prior to the date of the announcement of Board resolutions on the reserved grant; and

(c) the grant price of the first grant.

Pursuant to the Restricted A Share Incentive Scheme and under the authorization of the aforesaid extraordinary general meeting and class meetings, on 9 January 2024, the Board and the Supervisory Committee considered and approved, among other things, unlocking the first tranche of the first grant under the Restricted A Share Incentive Scheme. The unlocking conditions of the first unlocking period under the Restricted A Share Incentive Scheme for a total of 774,114 restricted A Shares held by 113 participants had been fulfilled and relevant Shares have been traded on 16 January 2024 (i.e. the first unlocking date). The weighted average closing price of the A Shares of the Company on the trading day prior to the first unlocking date was RMB23.72 per share. On 7 August 2024, the Board and the Supervisory Committee considered and approved, among other things, the repurchase and cancellation of 1,072,246 Restricted A Shares not yet unlocked, at a total repurchase amount of RMB22,830,809.73. In addition, its was approved to forfeit the cash dividends from such Shares repurchased and cancelled for the corresponding year(s) as held in escrow by the Company. As at 8 October 2024, the repurchase and cancellation of relevant Shares have been completed.

On 1 January 2024 and 31 December 2024, the maximum number of restricted A Shares to be granted under the Restricted A Share Incentive Scheme was 0 share. During the Reporting Period, the number of restricted A Shares that the Company may grant under the Restricted A Share Incentive Scheme was 0 share, representing 0.00% of the weighted average number of the total number of A Shares issued by the Company in 2024.

The 2022 H Share Employee Share Ownership Scheme was approved by the Shareholders of the Company at the extraordinary general meeting held on 29 November 2022. A summary of the principal terms of the 2022 H Share Employee Share Ownership Scheme is set out below.

(1) Purpose

The 2022 H Share Employee Share Ownership Scheme aims to further improve the corporate governance structure of the Group, promote the establishment and improvement of the incentive mechanism of the Group, fully mobilize the enthusiasm of the executive Directors and senior management personnel of the Company and employees of the Group, and effectively align the interests of the shareholders, corporate(s) and operators to focus on and work collectively for the long-term development of the Group.

(2) Participants

The holders under the 2022 H Share Employee Share Ownership Scheme include executive Directors and senior management personnel of the Company and the mid-level management personnel of the Group and other employees to whom the Board considers provision of incentives to be appropriate. The detailed list of holders and their respective allocation shall be proposed by the Board, and independent non-executive Directors and the Supervisory Committee shall opine on the same, subject to the relevant procedures in the event the approval at the general meeting of the Company is required.

Participants under the H Share Employee Share Ownership Scheme do not include any independent non-executive Director or Supervisor of the Company, or Shareholders individually or collectively holding more than 5% of the shares of the Company or actual controller and his/her spouse, parents and children. The executive Directors and senior management personnel of the Company among the holders shall be elected at the general meeting or appointed by the Board. All holders shall enter into employment agreements or engagement documents with the Company or its subsidiaries at the time of grant under the H Share Employee Share Ownership Scheme and during the term of the H Share Employee Share Ownership Scheme.

(3) Source of funds, source of target shares and upper limit of interests granted to holders

The source of funds of the H Share Employee Share Ownership Scheme is the Company's funds designated for incentive purposes with a size of RMB73,462,500, and the holders are not required to pay any consideration. The management institution of the H Share Employee Share Ownership Scheme shall purchase the relevant target shares on the open market through the Shanghai-Hong Kong Stock Connect. The H Share Employee Share Ownership Scheme is denominated in "units", each being RMB1 in value, i.e. the maximum number of units under the scheme is 73,462,500. Amongst which, there are up to 58,770,000 units under the first grant, and the remainder of up to 14,692,500 units are reserved units. The total number of H Shares to be held under the H Share Employee Share Ownership Scheme shall not exceed 0.5% of the total share capital of the Company, and the total number of H Shares corresponding to units to be held by a holder under the scheme shall not in the aggregate exceed 0.5% of the total share capital of the Company.

(4) Term, lock-up period and vesting

The term of the H Share Employee Share Ownership Scheme shall not exceed 60 months commencing from the date on which the H Share Employee Share Ownership Scheme is considered and approved at the general meeting of the Company and the target shares under the H Share Employee Share Ownership Scheme are purchased as announced by the Company (i.e. 29 December 2022, same as below). Unless otherwise extended as reviewed by the holders' meeting under the H Share Employee Share Ownership Scheme and resolved and approved by the Board, the H Share Employee Share Ownership Scheme shall be automatically terminated upon its expiry.

The lock-up period for the target shares under the H Share Employee Share Ownership Scheme shall be 12 months commencing from the date on which the H Shares under the H Share Employee Share Ownership Scheme are purchased in the secondary market as announced by the Company. In case of capitalization of capital reserves, bonus issue and refinancing by the Company during the lock-up period, the Shares newly acquired under the H Share Employee Share Ownership Scheme due to holding of the Company's Shares cannot be sold in the secondary market or otherwise disposed of. The lock-up period of such newly acquired Shares under the scheme shall be the same as that of their corresponding target shares.

The units under the first grant of the H Share Employee Share Ownership Scheme (granted in 2022) shall be vested according to the performance appraisal results at the Group level and the performance appraisal results of the respective holder at the individual level in three batches. The specific vesting periods and vesting arrangements are set out below:

First vesting period	Commencing from the first trading day after the expiry of the 12-month period from the date on which the target shares under the H Share Employee Share Ownership Scheme are purchased in the secondary market as announced by the Company and ending on the last trading day of the 24-month period from such date	33%
Second vesting period	Commencing from the first trading day after the expiry of the 24-month period from the date on which the target shares under the H Share Employee Share Ownership Scheme are purchased in the secondary market as announced by the Company and ending on the last trading day of the 36-month period from such date	33%
Third vesting period	Commencing from the first trading day after the expiry of the 36-month period from the date on which the target shares under the H Share Employee Share Ownership Scheme are purchased in the secondary market as announced by the Company and ending on the last trading day of the 48-month period from such date	34%

During the Reporting Period, the details of the changes in the shares of the H Share Employee Share Ownership Scheme are set out as follows:

			(units)	(units)	(units)	(units)	(units)	(units)
Wu Yifang	29 November 2022[1]	From 29 December 2022 to 28 December 2025[2]	5,500,000	5,500,000	0	1,815,000	1,815,000	1,870,000
Wang Kexin	29 November 2022[1]	From 29 December 2022 to 28 December 2025[2]	4,600,000	4,600,000	0	1,518,000	1,518,000	1,564,000
Guan Xiaohui	29 November 2022[1]	From 29 December 2022 to 28 December 2025[2]	4,000,000	4,000,000	0	1,320,000	1,320,000	1,360,000
Wen Deyong	29 November 2022[1]	From 29 December 2022 to 28 December 2025[2]	4,000,000	4,000,000	0	1,320,000	1,320,000	1,360,000
	—	—	18,100,000	18,100,000	0	5,973,000	5,973,000	6,154,000
Other participants	29 November 2022[1]	From 29 December 2022 to 28 December 2025[2]	35,400,000	32,630,000	0	10,583,200	12,343,400	9,703,400
Other participants	1 September 2023	From 1 September 2023 to 31 August 2025[3]	7,994,000	7,994,000	0	0	4,647,000	3,347,000

(3) The units under the reserved grant granted to holders under the H Share Employee Share Ownership Scheme shall be vested as follows upon fulfilment of certain vesting conditions of the H Share Employee Share Ownership Scheme (including Group level performance appraisal and individual level performance appraisal of the participants, please refer to the Company's circular dated 31 October 2022 for details):

From 1 September 2023 to 31 August 2024	From 1 September 2024 to 31 August 2025	50%
From 1 September 2023 to 31 August 2025	From 1 September 2025 to 31 August 2026	50%

The impact of the implementation of the H Share Employee Share Ownership Scheme on the Group's accounting costs would be calculated and amortized in accordance with the requirements of the HKFRS.

Based on the information publicly available to the Company and to the best knowledge of the Directors, as at the date of this annual report, the Company has been maintaining sufficient public float as required by the Hong Kong Listing Rules.

There are no provisions for pre-emptive rights under the Articles of Association or applicable laws of the PRC where the Company is incorporated.

During the Reporting Period, the Group made donations of approximately RMB52.49 million.

During the Reporting Period, the Company has entered into the following transactions with connected persons (as defined in the Hong Kong Listing Rules):

1. As disclosed in the announcement of the Company dated 31 May 2024, on 31 May 2024, Foshan Fosun Chancheng Hospital, a subsidiary of the Company, and Xingshuangjian Investment entered into an equity transfer agreement, pursuant to which Xingshuangjian Investment agreed to sell, and Foshan Fosun Chancheng Hospital agreed to purchase the 49% equity interest in Foshan Xinglian Nursing Home Limited* ( ) held by Xingshuangjian Investment at a consideration of RMB131,146 to be settled in cash. Upon completion of the transaction under the equity transfer agreement, the equity interest in Foshan Xinglian Nursing Home Limited* ( ) held by the Company through Foshan Fosun Chancheng Hospital will increase to 100% from 51%.

   As Xingshuangjian Investment is a subsidiary of Fosun High Tech, the Company's controlling shareholder. As such, Xingshuangjian Investment is an associate of Fosun High Tech, and is a connected person of the Company. Therefore, the transaction under the equity transfer agreement constitutes a connected transaction of the Company under Chapter 14A of the Hong Kong Listing Rules.

2. As disclosed in the announcement of the Company dated 31 May 2024, on 31 May 2024, Suzhou Angel Fund, a subsidiary of the Company, entered into a capital increase agreement with, among others, Hongshulin Investment (being an independent third party of the Company and an existing shareholder of Puling Biomedical), Puling Biomedical and its founding shareholders, pursuant to which Suzhou Angel Fund and Hongshulin Investment proposed to make capital contribution in cash in the aggregate amount of RMB16,833,333 to subscribe for additional registered capital of Puling Biomedical totaling RMB1,230,506.79, of which Suzhou Angel Fund proposed to make capital contribution in cash in the amount of RMB7,500,000 to subscribe for additional registered capital of Puling Biomedical of RMB548,245.61. Meanwhile, based on the comprehensive consideration of factors including investment strategies, as one of the existing investor shareholders of Puling Biomedical, Shanghai Futuo, a subsidiary of the Company issued a confirmation of non-exercise of the right of first refusal to Puling Biomedical on 31 May 2024 to waive its right of first refusal in respect of the additional registered capital of Puling Biomedical. Upon completion of the transactions under the capital increase agreement, the shareholding percentage of the Group in Puling Biomedical (through Shanghai Futuo and Suzhou Angel Fund) will increase to 12.60% from 10.65%.

   As Fosun High Tech, the controlling shareholder of the Company, held more than 10% of the equity interest of Suzhou Angel Fund, a subsidiary of the Company, Suzhou Angel Fund constitutes a connected subsidiary and hence a connected person of the Company pursuant to Rule 14A.16 of the Hong Kong Listing Rules. Therefore, Shanghai Futuo (a subsidiary of the Company)'s waiver of its right of first refusal in respect of the additional registered capital of Puling Biomedical proposed to be subscribed by Suzhou Angel Fund under the capital increase constitutes a connected transaction of the Company under Chapter 14A of the Hong Kong Listing Rules.

3. As disclosed in the announcement of the Company dated 11 December 2024, on 11 December 2024, Ningbo Fuying, a subsidiary of the Company, as a limited partner of each of Nanjing Fund, Dalian Xingweilai Fund and Suzhou Angel Fund, entered into the transfer agreements with Fosun High Tech for the acquisition of certain

1. As disclosed in the announcement of the Company dated 7 January 2022, Dalian Xingweilai Fund, Dalian Fujian and Fujian Fund Management Company proposed to enter into a fund management agreement, pursuant to which Fujian Fund Management Company shall be the fund manager of Dalian Xingweilai Fund to provide fund management services for a term commencing from date of signing of the fund management agreement (i.e. 17 January 2022) and ending on 31 December 2024.

   As Fosun High Tech is a controlling shareholder of the Company, Fosun High Tech constitutes a connected person of the Company pursuant to Rule 14A.07 of the Hong Kong Listing Rules. During the Reporting Period, Fosun High Tech held 16.40% equity interest in Dalian Fujian, a subsidiary of the Company (which is the general partner of Dalian Xingweilai Fund, a subsidiary of the Company). Accordingly, Dalian Fujian and Dalian Xingweilai Fund constitute connected subsidiaries of the Company pursuant to Rule 14A.16 of the Hong Kong Listing Rules and connected persons of the Company pursuant to the Hong Kong Listing Rules. Therefore, the transactions under such fund management agreement constitute the continuing connected transactions of the Company pursuant to Chapter 14A of the Hong Kong Listing Rules.

2. As disclosed in the announcement of the Company dated 24 January 2022, Suzhou Angel Fund, Xingsheng Fuying and Fujian Fund Management Company proposed to enter into a fund management agreement, pursuant to which Fujian Fund Management Company shall be the fund manager of Suzhou Angel Fund to provide fund management services for a term commencing from the first closing date of the fund and ending on 31 December 2024. The fund management agreement was entered into on 29 January 2022.

   As Fosun High Tech is a controlling shareholder of the Company, Fosun High Tech constitutes a connected person of the Company pursuant to Rule 14A.07 of the Hong Kong Listing Rules. During the Reporting Period, Fosun High Tech held 29.60% equity interest in Xingsheng Fuying, a subsidiary of the Company (which is the general partner of Suzhou Angel Fund, a subsidiary of the Company). Accordingly, Xingsheng Fuying and Suzhou Angel Fund constitute connected subsidiaries of the Company pursuant to Rule 14A.16 of the Hong Kong Listing Rules and connected persons of the Company pursuant to the Hong Kong Listing Rules. Therefore, the transactions under such fund management agreement constitute the continuing connected transactions of the Company pursuant to Chapter 14A of the Hong Kong Listing Rules.

3. As disclosed in the announcement of the Company dated 29 August 2022, as well as the circular dated 31 October 2022, on 29 August 2022, the Company entered into a financial services agreement with Fosun Finance (as service provider) to renew the financial services agreement expiring on 31 December 2022 for a term of three years commencing from 1 January 2023 and ending on 31 December 2025.

   As Fosun Finance is a subsidiary of Fosun High Tech, a controlling shareholder of the Company, Fosun Finance constitutes a connected person of the Company pursuant to Rule 14A.07 of the Hong Kong Listing Rules. Therefore, the transactions under the renewed financial services agreement constitute continuing connected transactions of the Company pursuant to Chapter 14A of the Hong Kong Listing Rules.

4. As disclosed in the announcement of the Company dated 22 December 2022, on 22 December 2022, the Company and CQ Pharma Holdings entered into a mutual supply framework agreement in relation to the supply of sales products and the purchase of procurement products, and the mutual provision of services between the Group and CQ Pharma Holdings and its subsidiaries for a term of three year commencing from 1 January 2023 and ending on 31 December 2025.

   As CQ Pharma Holdings is a substantial shareholder of Yao Pharma, an indirect non-wholly-owned major subsidiary of the Company, CQ Pharma Holdings constitutes a connected person of the Company at the subsidiary level pursuant to Rule 14A.07 of the Hong Kong Listing Rules. Therefore, the transactions under such mutual supply framework agreement constitute continuing connected transactions of the Company pursuant to Chapter 14A of the Hong Kong Listing Rules.

5. As disclosed in the announcement of the Company dated 15 December 2023, on 15 December 2023, the Company and Fosun International entered into a lessee framework agreement (the " ") in relation to the lease of relevant premises of Fosun International and/or its associates to relevant members of the Group, as tenant, for a term of 1 year commencing from 1 January 2024 and ending on 31 December 2024. On the same date, the Company and Fosun International entered into a lessor framework agreement (the " ") in relation to the lease of relevant premises of Fosun Pharma by Fosun International and/or its associates from relevant members of the Group, as lessor, for a term of 1 year commencing from 1 January 2024 and ending on 31 December 2024.

   As disclosed in the announcement of the Company dated 11 December 2024, as the 2024 Lessee Framework Agreement was about to expire, on 11 December 2024, the Company entered into a new lessee framework agreement with Fosun International to renew the 2024 Lessee Framework Agreement for a term of 1 year commencing from 1 January 2025 and ending on 31 December 2025. On the same date, as the 2024 Lessor Framework Agreement was about to expire, the Company entered into a new lessor framework agreement with Fosun International to renew the 2024 Lessor Framework Agreement for a term of 1 year commencing from 1 January 2025 and ending on 31 December 2025.

   As Fosun International is a controlling shareholder of the Company, Fosun International and its associates constitute connected persons of the Company pursuant to Rule 14A.07 of the Hong Kong Listing Rules. Therefore, the transactions under the aforesaid tenancy framework agreements constitute continuing connected transactions of the Company pursuant to Chapter 14A of the Hong Kong Listing Rules.

6. As disclosed in the announcement of the Company dated 15 December 2023, on 15 December 2023, the Company and Fosun International entered into a mutual supply framework agreement (the " ") in relation to the mutual supply of products and provision of services between the Group and Fosun International and/or its associates, for a term of 1 year commencing from 1 January 2024 and ending on 31 December 2024.

   As disclosed in the announcement of the Company dated 11 December 2024, as the 2024 Fosun International Mutual Supply Framework Agreement was about to expire, on 11 December 2024, the Company entered into a new mutual supply framework agreement with Fosun International to renew the 2024 Fosun International Mutual Supply Framework Agreement for a term of 1 year commencing from 1 January 2025 and ending on 1 December 2025.

As Fosun International is a controlling shareholder of the Company, Fosun International constitutes a connected person of the Company pursuant to Rule 14A.07 of the Hong Kong Listing Rules. Therefore, the transactions under such mutual supply framework agreements constitute continuing connected transactions of the Company pursuant to Chapter 14A of the Hong Kong Listing Rules.

The Company has complied and will continue to comply with relevant requirements pursuant to Chapter 14A of the Hong Kong Listing Rules in respect of connected transactions, including, among others, conducting an annual review of the continuing connected transactions.

Certain details of the continuing connected transactions during the year ended 31 December 2024 are summarized in the table below.

		RMB	RMB

The Board (including independent non-executive Directors) has reviewed the continuing connected transactions as described above and confirmed that in 2024, such transactions have been entered into:

(i) in the ordinary and usual course of business of the Group;

(ii) on normal commercial terms or better; and

(iii) in accordance with the relevant agreements governing such transactions on terms that are fair and reasonable and in the interests of the Shareholders of the Company as a whole.

The auditors of the Company issued a letter to the Board, confirming (among which) in respect of the continuing connected transactions as mentioned above:

1. nothing has come to their attention that causes the auditors to believe that the disclosed continuing connected transactions have not been approved by the Board;

2. for transactions involving the provision of goods or services by the Group, nothing has come to their attention that causes the auditors to believe that the transactions were not, in all material respects, in accordance with the pricing policies of the Group;

3. nothing has come to their attention that causes the auditors to believe that the transactions were not entered into, in all material respects, in accordance with the relevant agreements governing such transactions; and

4. nothing has come to their attention that causes the auditors to believe that the disclosed continuing connected transactions have exceeded the maximum aggregate annual cap.

Regarding the net proceeds raised from the 2022 Non-public Issuance of A Shares, RMB568.38 million had been utilized during the Reporting Period, and an aggregate of RMB4,239.76 million had been utilized as at the end of the Reporting Period. The aggregated utilization details as at the end of the Reporting Period are as follows:

Unit: million Currency: RMB

Innovative drug clinical, license-in and relevant marketing preparation	2,607.62	1,851.18
Intensive comprehensive base for APIs and preparations	1,156.16	1,156.16
Replenishment of working capital	1,232.42	1,232.42

As at 31 December 2024, the remaining net proceeds raised from the Non-public Issuance was RMB216.44 million, which will be invested to the proposed projects in 2025 (and subsequent years).

The Company has adopted the Model Code and the Written Code as its codes of conduct regarding securities transactions. Having made specific enquiry of the Directors, all the Directors have confirmed that they have complied with the standards as set out in the Model Code and the Written Code throughout the Reporting Period.

The Company's corporate governance practices are based on the principles and code provisions as set out in the CG Code contained in Appendix C1 to the Hong Kong Listing Rules. The Board is of the view that, during the Reporting Period, the Company has complied with all the applicable code provisions as set out in the CG Code.

Further information on the corporate governance practices of the Company is set out in the Corporate Governance Report on pages 105 to 116 of this annual report.

The Group must comply with a number of laws and regulations, which mainly include the PRC Company Law, the Civil Code of the PRC, the Drug Administration Law of the PRC, and exchange rules of listing places of the Company's shares, such as the Hong Kong Listing Rules and the Shanghai Listing Rules, as well as other applicable regulations, policies and regulatory legal documents promulgated pursuant to the aforementioned laws, regulations and rules.

Through various measures such as internal control, compliance management, business approval procedures and employee training, the Group ensures the compliance with applicable laws, regulations, and regulatory legal documents (especially those that have significant impact on the main business). Whenever there are any changes to the applicable laws, regulations, and regulatory legal documents, the Group will notify the relevant employees and the operating team from time to time.

During the Reporting Period, as far as the Directors were aware, there was no breach or non-compliance with the relevant laws and regulations by the Group which would have a material impact on the Group.

The Group complied with the Environmental Protection Law of the PRC, Environmental Impact Assessment Law of the PRC, Environmental Protection Tax Law of the PRC and other laws and regulations. The Company and relevant subsidiaries have established the EHS special committee and the EHS team to establish and continuously improve EHS-related policies and formulate EHS management strategic objectives. Relevant subsidiaries continued to improve the environmental management system and operating procedures for pollution prevention and control facilities to ensure that all production processes comply with the requirements of laws, regulations and technical specifications for ecological and environmental protection, as well as to establish and improve environmental management ledgers to record the operation and management of pollution prevention and control facilities, testing records and other environmental management information. For details on environmental policies and performance, please refer to the "2024 Environment, Society and Governance (ESG) and Sustainability Report" of the Company.

As at the end of the Reporting Period, the Audit Committee of the ninth session of the Board comprised independent non-executive Directors Mr. Tang Guliang (chairman), Ms. Li Ling and Mr. Wang Quandi.

The main duties of the Audit Committee are to review and monitor the financial reporting procedures and internal control system of the Group, and to provide recommendations and advice to the Board. The Audit Committee of the Company has reviewed the 2024 annual results of the Group.

The consolidated financial statements of the Group have been audited by Ernst & Young.

A resolution for re-appointing Ernst & Young as the auditor of the Company will be proposed at the forthcoming annual general meeting of the Company.

On Behalf of the Board

Chairman

Shanghai, PRC
25 March 2025

In 2024, the ninth sessions of the Supervisory Committee of the Company carried out the work diligently, lawfully and efficiently in accordance with the Articles of Association and the Procedural Rules of the Supervisory Committee:

Supervisors attended relevant board meetings, and held 11 Supervisory Committee Meetings in 2024. Details are as follows:

1. On 9 January 2024, the first meeting of the ninth session of the Supervisory Committee in 2024 was convened to review and approve the resolution in relation to the unlocking of the first tranche of the restricted A Shares of the first grant under the 2022 Restricted A Share Incentive Scheme.

2. On 26 March 2024, the second meeting of the ninth session of the Supervisory Committee in 2024 was convened to review and approve the 2023 Annual Report of the Group, the Working Report of the Supervisory Committee for 2023, the 2023 Internal Control Assessment Report and the Special Report of the Placement and Actual Use of the Proceeds in 2023.

3. On 29 April 2024, the third meeting of the ninth session of the Supervisory Committee in 2024 was convened to review and approve the 2024 First Quarterly Report of the Group.

4. On 14 May 2024, the fourth meeting of the ninth session of the Supervisory Committee in 2024 was convened to review and approve the resolution in relation to the amendments to the Procedural Rules of the Supervisory Committee appended to Articles of Association.

5. On 19 June 2024, the fifth meeting of the ninth session of the Supervisory Committee in 2024 was convened to review and approve the resolution in relation to the election of the Chairman of the Supervisory Committee.

6. On 9 July 2024, the sixth meeting of the ninth session of the Supervisory Committee in 2024 was convened to review and approve the resolution in relation to the temporary replenishment of working capital with some of the Idle Proceeds.

7. On 19 July 2024, the seventh meeting of the ninth session of the Supervisory Committee in 2024 was convened to review and approve the resolution in relation to the amendments to the Procedural Rules of the Supervisory Committee appended to Articles of Association.

8. On 29 July 2024, the eighth meeting of the ninth session of the Supervisory Committee in 2024 was convened to review and approve the resolution in relation to the subject of the additional projects funded by proceeds from the 2022 Non-Public Issuance.

9. On 7 August 2024, the ninth meeting of the ninth session of the Supervisory Committee in 2024 was convened to review and approve the resolution in relation to the repurchase and cancellation of certain restricted A Shares that are not yet unlocked.

10. On 27 August 2024, the tenth meeting of the ninth session of the Supervisory Committee in 2024 was convened to review and approve the 2024 Interim Report of the Group, the Special Report of the Placement and Actual Use of the Proceeds in the first half of 2024 of the Group and the 2024 Interim Internal Control Assessment Report.

11. On 29 October 2024, the eleventh meeting of the ninth session of the Supervisory Committee in 2024 was convened to review and approve the resolution in relation to the 2024 Third Quarterly Report of the Group.

The Supervisory Committee is of the view that, during the Reporting Period, the operation of the Company had been consistent with the provisions of the PRC Company Law, the PRC Securities Law and the Articles of Association; that the decision-making process of the Company had been in compliance with the laws, and the Company had established a relatively comprehensive internal control system; and that the Directors and senior management of the Company, in discharging their duties, had not violated any law, regulation or the Articles of Association, nor had they acted in a way which is prejudicial to the interests of the Company.

The Supervisory Committee agrees with the audit opinion issued by Ernst & Young Hua Ming LLP and Ernst & Young on the 2024 financial report of the Group.

The Supervisory Committee is of the view that the Group acquired and disposed of assets at reasonable prices, and it was not aware of any insider dealing or any act that was prejudicial to the interests of Shareholders or resulting in any loss of assets of the Group during the Reporting Period.

The Supervisory Committee is of the view that the related party/connected transactions of the Group were fair, and were not prejudicial to the interests of the Group during the Reporting Period.

The Supervisory Committee has reviewed the 2024 Internal Control Assessment Report of the Group, and considers that, as at the end of the Reporting Period, the Group has established an appropriate internal control system in all material respects. During the Reporting Period, the internal control system has operated efficiently, which ensures the implementation of the internal control measures and the normal conduct of production and operation.

On Behalf of the Supervisory Committee

Chairman

Shanghai, PRC
25 March 2025

The Board hereby presents to the Shareholders the corporate governance report of the Group for the year ended 31 December 2024 (the " ").

As a company whose shares are listed on the Hong Kong Stock Exchange and the Shanghai Stock Exchange, the Company has strictly complied with relevant regulations, the Hong Kong Listing Rules, the Shanghai Listing Rules and the Articles of Association. The Company is committed to continuously improving its corporate governance structure, and optimizing its internal management and control and its business operation in order to improve the corporate governance of the Company.

The Board believes that high corporate governance standards are essential in providing a framework for the Group to safeguard the interests of Shareholders and to enhance corporate value and accountability, as well as the formulation of corporate business strategy and policy outline.

The Company's corporate governance practices are based on the principles and Code Provisions as set out in the CG Code contained in Appendix C1 to the Hong Kong Listing Rules.

The Board is of the view that throughout the Reporting Period, the Company had complied with all the applicable code provisions as set out in the CG Code.

The Company has adopted the Model Code as set out in Appendix C3 to the Hong Kong Listing Rules and formulated the Written Code as its code of conduct regarding securities transactions.

Specific enquiries have been made to all the Directors, and the Directors have confirmed that they had complied with the Model Code and the Written Code throughout the Reporting Period.

No incident of non-compliance of the Written Code by the Directors and relevant employees is noted by the Company.

As at the end of the Reporting Period, the Board constituted twelve members, including four executive Directors, four non-executive Directors and four independent non-executive Directors.

The composition of the Board is as follows:

Mr. Wu Yifang ( ) *(Chairman)*
Mr. Wang Kexin ( ) *(Co-Chairman)*
Ms. Guan Xiaohui ( ) *(Vice Chairman)*
Mr. Wen Deyong ( ) *(Chief Executive Officer)*

Mr. Chen Qiyu ( )
Mr. Xu Xiaoliang ( )
Mr. Pan Donghui ( )
Mr. Chen Yuqing ( )

Ms. Li Ling ( )
Mr. Tang Guliang ( )
Mr. Wang Quandi ( )
Mr. Yu Tze Shan Hailson ( )

Notes:

Mr. Yao Fang resigned as a non-executive Director on 30 June 2024.

Mr. Chen Yuqing was appointed as a non-executive Director at the first extraordinary general meeting of 2024 held on 27 September 2024. Mr. Chen Yuqing has obtained the legal advice as at 27 September 2024 referred to in Rule 3.09D of the Hong Kong Listing Rules and confirms that he understands all the obligations under the Hong Kong Listing Rules that are applicable to him as a director of a listed company and the consequences that may arise if he makes a false statement or provides false information to the Hong Kong Stock Exchange.

Biographical information of the Directors is set out on pages 117 to 121 of this annual report.

The members of the Board do not have any relationship, including financial, business, family or other material or relevant relationship, with each other.

During the Reporting Period, the positions of chairman and chief executive officer of the Company were served by Mr. Wu Yifang and Mr. Wen Deyong, respectively. The chairman provides leadership and is responsible for the effective functioning of the Board. The chief executive officer generally focuses on the business development and daily management and operation of the Group. Their respective duties have been clearly defined in written form.

During the Reporting Period, the Board at all times met the requirements of the Hong Kong Listing Rules relating to the appointment of at least three independent non-executive directors with at least one of them possessing appropriate professional qualifications or accounting or related financial management expertise, and the independent non-executive directors represent at least one-third of the Board.

The Company has received written annual confirmation from each of the independent non-executive Directors in respect of his/her independence in accordance with Rule 3.13 of the Hong Kong Listing Rules. In accordance with the guidelines for assessing independence set out therein, the Company is of the view that all independent non-executive Directors are independent.

Directors shall have a term of office of three years and shall be entitled to be re-appointed when the term of office expires provided that the term of office of independent non-executive Directors shall not exceed six years. The Company has entered into a service contract with each executive Director and a letter of appointment with each non-executive Director and independent non-executive Director for a term of three years of each session (unless otherwise required by relevant laws and regulations). The appointment and removal of Directors shall be approved by Shareholders in the general meeting.

As at the end of the Reporting Period, the Board had established five committees, namely, Strategic Committee, Audit Committee, Nomination Committee, Remuneration and Appraisal Committee and ESG Committee, for overseeing all aspects of the Group's affairs. All Board committees of the Company are established with defined written terms of reference. The terms of reference of the Board committees are posted on the Company's website (www.fosunpharma.com) and the Hong Kong Stock Exchange's website (www.hkexnews.hk) and are available to Shareholders upon request.

The majority of the members of each Board committee (except the Strategic Committee) are independent non-executive Directors, and the list of the chairman and members of each Board committee is set out under "Corporate Information" on page 2 of this annual report.

The primary responsibilities of the Strategic Committee are to research and advise on the strategic planning of the Group's medium and long-term development and major issues affecting the Group's development, and to approve research reports on development strategy.

During the Reporting Period, the Strategic Committee held 1 meeting to research and advise on the strategic planning of the Group's 2024-to-2034 period and medium and long-term development.

The principal duties of the Audit Committee are to assist the Board to review the financial information and periodic reports, to review and monitor internal control procedures and its risk management system, to review and monitor the effectiveness of the internal audit function, to review and inspect the appointment and removal of external auditors, to formulate and review the Company's corporate governance and practices, and to make recommendations on the above matters.

During the Reporting Period, the Audit Committee held 12 meetings to review periodic reports, audit plan, internal control implementation, major and ongoing related party/connected transactions, and the Group's Code of Business Ethics and its implementation, and make recommendations to the Group on strengthening the internal control system.

During the Reporting Period, the Audit Committee also held 2 meetings with the external auditors without the presence of the executive Directors.

The principal duties of the Nomination Committee include reviewing the Board composition, developing and formulating relevant procedures for the nomination and appointment of Directors and senior management, making recommendations to the Board on the appointment and succession planning of Directors and senior management, assessing the independence of independent non-executive Directors and reviewing the training and continuous professional development of Directors and senior management.

The Board has adopted a Director nomination policy, setting out the standards and procedures for nomination and appointment of directors, to ensure the members of the Board have the skills, knowledge, experience and diversity that meet the business requirements of the Group and to ensure the continuity of the Board and maintain its leadership, for the nomination of candidates for directorship of the Company by making reference to the skills, experience, professional knowledge and qualification, personal integrity and time commitments of such individuals, the Group's needs and other relevant statutory requirements and regulations.

During the Reporting Period, the Nomination Committee held 3 meetings to discuss, review and make recommendations to the Board on matters relating to the selection and/or re-appointment of Directors and senior management of the Company (including diversity-related matters). The Nomination Committee considered an appropriate balance of diversity of the Board had been maintained.

The primary duties of the Remuneration and Appraisal Committee include formulating, reviewing and making recommendations to the Board on the remuneration policy and structure for Directors and senior management, reviewing the performance of duties by Directors and senior management as well as reviewing their annual performance appraisal and remuneration packages.

During the Reporting Period, the Remuneration and Appraisal Committee held 3 meetings to review the implementation of performance appraisal and remuneration packages of the Directors and senior management of the Company during the prior year and the appraisal plan for the current year, to discuss and review the matters related to the unlocking, repurchase and cancellation of restricted A Shares under the Restricted A Share Incentive Scheme and the vesting and forfeiture of units under the H Share Employee Share Ownership Scheme of the Company, and to make recommendations to the Board. The Remuneration and Appraisal Committee is of the view that the implementation of the Restricted A Share Incentive Scheme and the H Share Employee Share Ownership Scheme during the Reporting Period has contributed to promote the establishment and improvement of the incentive and restraint mechanism of the Group, fully mobilize the enthusiasm of the Directors and senior management personnel of the Company and employees of the Group, effectively align the interests of the Company and Shareholders with the interests of the participants to focus the long-term development and achieve the development goals of the Group.

The primary duties of the ESG Committee include formulating the ESG vision, targets, strategies and structure and reviewing the implementation of the ESG vision, strategies and structure, evaluating the external and internal impacts of ESG efforts, obtaining feedbacks on ESG efforts from internal and external consultants or experts, reviewing the reports on relevant results, reviewing the progress of the fulfillment of ESG goals, and making recommendations on the improvement for ESG efforts in the next phase.

During the Reporting Period, the ESG Committee held 2 meetings to review the 2023 ESG and Sustainability Report and the working plan for the 2024 ESG and Sustainability Report of the Group, and make recommendations to the Board.

During the Reporting Period, the Company established a special meeting mechanism for independent non-executive Directors (the "") to create a platform for independent non-executive Directors to fulfill their duties. This initiative actively leverages their professional expertise and advantages to promote the Company's standardized operations and informed decision-making. The primary duties of the INED Special Committee include independently engaging intermediary institutions to conduct audits, consultations, or verifications on specific matters of the Company, and reviewing notifiable connected/related party transactions, etc.

During the Reporting Period, the INED Special Committee held 11 meetings to review notifiable connected/related party transactions, thereby promoting the Company's standardized operations and protecting Shareholders' interests.

The Board is responsible for performing the functions as set out in Code Provision A.2.1 of the CG Code to ensure that the Company has established comprehensive corporate governance practices and procedures. During the Reporting Period, the Board:

(1) established (modified) and reviewed the corporate governance policies and practices of the Company as well as made relevant recommendations;

(2) reviewed and monitored the training and continuous development of the Directors and senior management;

(3) reviewed and monitored the policies and practices of the Company regarding the compliance of relevant legal and regulatory requirements;

(4) established (modified), reviewed and monitored the code of conduct for Directors and employees; and

(5) reviewed as to whether the Company has complied with the CG Code and made disclosures in the Corporate Governance Report.

The Directors acknowledge their responsibility for preparing the financial statements of the Group for the year ended 31 December 2024. The Directors are not aware of any material uncertainties relating to events or conditions that may cast significant doubt upon the Group's ability to continue as a going concern. The statement of the independent auditors of the Company about their reporting responsibilities on the financial statements is set out in the Independent Auditors' Report on pages 130 to 134.

The remuneration paid to the external auditors of the Company in respect of audit services for the annual report for the year ended 31 December 2024 amounted to RMB4.66 million. There is no remuneration paid to external auditors in respect of significant non-audit services.

The Board, particularly the Audit Committee, is responsible for maintaining sound and effective internal control systems in order to safeguard the Group's assets and interests of shareholders of the Company, and reviewing and monitoring the effectiveness of the Group's internal control and risk management systems on a regular basis in order to ensure that the internal control and risk management systems in place are adequate. The Company conducts reviews of the effectiveness of the internal control systems on a regular basis in order to ensure that they are able to satisfy and deal with different scenarios and the dynamic business environment.

During the Reporting Period, the Board and the Audit Committee, conducted annual review of the effectiveness on the internal control system of the Group, including review of all the Group's material controls, including financial operations and compliance controls and risk management functions, as well as review of the adequacy of accounting, internal audit, financial reporting functions, as well as resources, staff qualifications and experience, training programs and budget relating to the Group's ESG performance and reporting.

Through years of optimization, the Group proactively promoted the continuous improvement of internal control management system in terms of internal environment, risk assessment, activity control, information and communication, as well as internal supervision. Meanwhile, through internal inspection and supervision, communication and feedback, the Group can ensure the effective implementation of relevant administrative rules, smooth communication of feedback received, discovery of defaults and timely rectification. During the Reporting Period, the Group has maintained effective internal control in accordance with rules under laws and regulations and requirements of internal control. Operations were conducted normally, orderly and effectively.

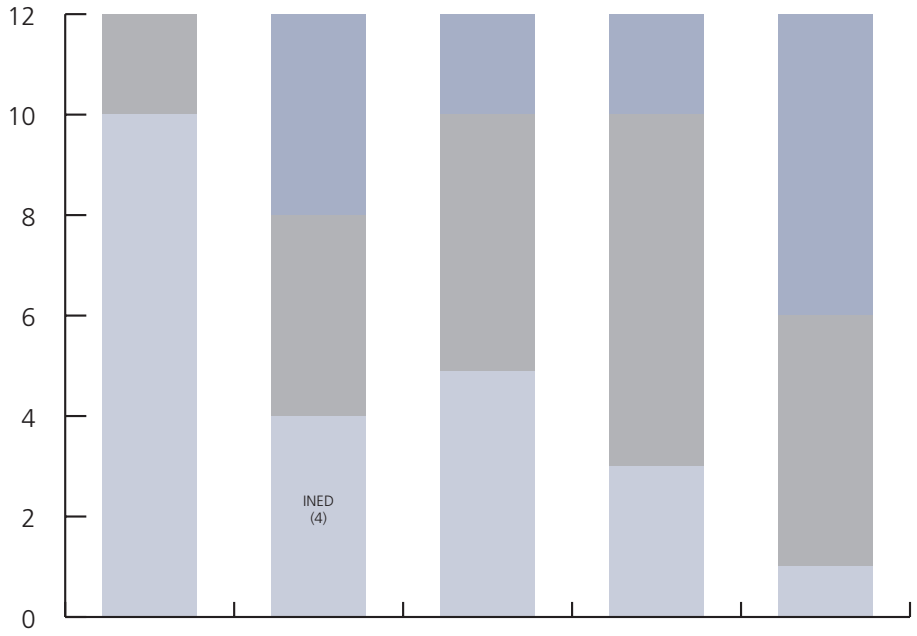
In respect of the procedures for handling and announcement of inside information and internal control measures, the Company is required to disclose inside information as soon as reasonably practicable in accordance with the SFO and the Hong Kong Listing Rules; strictly follow the "Guidelines on Disclosure of Inside Information" issued by the Securities and Futures Commission in handling its affairs; the Company has also adopted the Management System for Person Accessing to Inside Information, aiming to further regulate the management of inside information and person accessing to inside information.

The Board believes that existing internal control system was adequate and effective during the Reporting Period.

Ms. Kam Mei Ha, Wendy has ceased to be the joint company secretary and the authorized representative of the Company as she has reached the age of retirement, with effect from 27 August 2024. Ms. Chan Sau Ling has been appointed as the joint company secretary and the authorized representative of the Company with effect from 27 August 2024.

As at the end of the Reporting Period, Ms. Dong Xiaoxian and Ms. Chan Sau Ling of Tricor Services Limited, an external service provider, were the joint company secretaries of the Company. The primary contact person for Ms. Chan Sau Ling was Ms. Dong Xiaoxian, who was a vice president, secretary to the Board and a joint company secretary of the Company. During the Reporting Period, both Ms. Dong Xiaoxian and Ms. Chan Sau Ling attended no less than 15 hours of professional training.

The Company adopted the Board Diversity Policy, which has been made available on the Company's website (www.fosunpharma.com). The Nomination Committee, in nominating and appointing new Board members, shall consider a range of diversity perspectives pursuant to the Policy, including but not limited to gender, age, culture and education background, professional experience, skills, knowledge and term of service, and make the final decision based on the merits and contribution that the candidate will bring to the Board. When nominating a successive director, the Nomination Committee will also adopt measures, including taking into consideration of the gender of the former director and successive director, to ensure the gender diversity of the Board. The Nomination Committee will review the Policy from time to time to ensure its continued effectiveness. The Nomination Committee viewed that during the Reporting Period, the relevant diversity elements have been substantially included into the Board composition. An analysis of the Board's diversity as at the end of the Reporting Period is set out as follows:



The Company also adopted the Diversity Policy of Employees to protect employees free from race, color, gender, religion, nationality, disability, marital status, retirement status, sexual orientation, gender identity or other legally protected status in the search for employment, compensation, and advancement. In order to ensure the diversity of the Board and employees, the Group has taken diversity into account when appointing directors, selecting senior management or recruiting employees. Taking gender diversity as an example, as at the end of the Reporting Period, the ratio of male to female staff (including senior management) of the Group was approximately 49.73% : 50.27%. The Board is of the view that as at the end of the Reporting Period, the Group has achieved gender diversity among its employees.

To safeguard the interests and rights of the Shareholders, a separate resolution is proposed for each substantially separate issue at the shareholders' general meetings, including the election of individual Directors. All resolutions put forward at the shareholders' general meetings will be voted on by poll pursuant to the Hong Kong Listing Rules except where the chairman of the meeting, in good faith, decides to allow a resolution which relates merely to a procedural or administrative matter to be voted on by a show of hands, and poll results will be posted on the website of the Company (www.fosunpharma.com) and the website of the Hong Kong Stock Exchange (www.hkexnews.hk) after each the shareholders' general meeting.

Pursuant to Article 64 of the Articles of Association, if Shareholders require the convening of an extraordinary general meeting or a class general meeting, the following procedures shall be followed:

(vi) When the Shareholders convene a shareholders' general meeting as the Board has failed to convene the meeting pursuant to the aforesaid provision, the reasonable expense incurred shall be borne by the Company and shall be deducted from the outstanding amounts payable by the Company to the defaulting Directors.

Pursuant to Article 69 of the Articles of Association, Shareholder(s) individually or jointly holding more than one percent (1%) of the shares of the Company shall have the right to propose motions to the Company, and the Company shall include in the agenda of the said shareholders' general meeting the matters of the said motions falling within the functions and powers of shareholders' general meetings. In addition, Shareholder(s) individually or jointly holding more than one percent (1%) of the shares of the Company may submit written provisional motion(s) to the convener ten (10) days before a shareholders' general meeting is convened. The convener shall serve a supplementary notice of shareholders' general meeting within two (2) days after receipt of the motion(s) and announce the contents thereof.

If any shareholder wants to raise any enquiries to the Board, such Shareholder may send written enquiries to the Company.

Note: The Company normally does not deal with verbal or anonymous enquiries.

Shareholders may send their enquiries or requests as mentioned above to the Company by means of facsimile, email or post. The details of contact are as follows:

Shanghai Fosun Pharmaceutical (Group) Co., Ltd.
Address: Building A, No. 1289 Yishan Road, Shanghai, China
Fax: 8621-33987871
Email: ir@fosunpharma.com

For the avoidance of doubt, Shareholders must deposit and send the original duly signed written requisition, notice, statement, or enquiry (as the case may be) to the above address, apart from the registered office of the Company in Hong Kong, and provide their full name, contact details and identification in order to give effect thereto. Shareholders' information will be disclosed in accordance with applicable laws.

The Company considers that effective communication with Shareholders is essential for enhancing investor relations and investors' understanding of the Group's business performance and strategies. The Company endeavors to maintain an on-going dialogue with Shareholders and in particular, through annual general meetings and other shareholders' general meetings of the Company.

As illustrated above, the Company has listed the rights of shareholders of the Company and the channels for shareholders to express or solicit opinions from shareholders, so that shareholders can understand their rights and how to exercise them. The Company also reviewed the implementation and effectiveness of the shareholder communication policy during the Reporting Period. Based on the results of the review, the Board is of the opinion that the Shareholders' Communication Policy has been properly implemented and effective during the year.

In light of, among other things, the newly revised PRC Company Law (effective from 1 July 2024), the abolition of the Special Regulations of the State Council on the Overseas Offering and Listing of Shares by Joint Stock Limited Companies ( ) and the Mandatory Provisions for Companies Listing Overseas ( ) on 31 March 2023, the formulation and issuance of the Measures for the Administration of Independent Directors of Listed Companies ( ) and the recent amendments to the Regulatory Guidelines for Listed Companies No. 3 – Cash Dividends of Listed Companies (3 —) (effective from 15 December 2023) and the Guidelines for the Articles of Association of Listed Companies ( ) (effective from 15 December 2023) by the CSRC, and certain recent amendments to the Listing Rules, as well as taking into account the actual conditions of the Company, at the 2024 first extraordinary general meeting held on 27 September 2024, the Company considered and approved a resolution on the amendments to the Articles of Association and its Appendices (including deletions and additions of certain clauses) (for details, please refer to the announcements of the Company dated 19 July 2024, the circular dated 19 August 2024). Based on the authorization granted at the 2022 second extraordinary general meeting, the 2022 second A Shareholders class meeting and the 2022 second H Shareholders class meeting of the Company, the Board approved the resolution in relation to the amendments to Article 19 and Article 20 to the Articles of Association on 10 October 2024. The latest version of the Articles of Association is available at the Company's website (www.fosunpharma.com) and the website of Hong Kong Stock Exchange (www.hkexnews.hk).

To promote effective communication, the Company maintains an official website at www.fosunpharma.com, where information and updates on the Group's business developments and operation, financial information, corporate governance practices and other information are available for public access.

, aged 55, was appointed as an executive Director of the Company in August 2016 and the chairman of the Company in October 2020. Mr. Wu joined the Group in April 2004 and served as a senior vice president, chief operating officer, president, chief executive officer and other positions of the Company. Mr. Wu is currently a non-executive director of Sisram Medical (stock code: 01696), a company listed on the Hong Kong Stock Exchange, a non-executive director of Shanghai Henlius (stock code: 02696), a company listed on the Hong Kong Stock Exchange, and a senior vice president of Fosun International (stock code: 00656), a company listed on the Hong Kong Stock Exchange. Mr. Wu was the chairman of the supervisory committee of Sinopharm (stock code: 01099), a company listed on the Hong Kong Stock Exchange, and a non-executive director of Gland Pharma (stock code: GLAND), a company listed on the BSE and the NSE. Prior to joining the Group, Mr. Wu served at Xuzhou Biochemical Pharmaceutical Factory* ( ), Xuzhou (Wanbang) Biopharmaceuticals Manufactures Plant* (( )), and Xuzhou Wanbang Biochemical Pharmaceutical Co., Ltd.* ( ) and Fosun Wanbang (where Xuzhou Biochemical Pharmaceutical Factory* ( ), Xuzhou (Wanbang) Biopharmaceuticals Manufactures Plant* (( )) and Xuzhou Wanbang Biochemical Pharmaceutical Co., Ltd.* ( ) were predecessors of Fosun Wanbang, a subsidiary of the Company). EY安永

(Established in the People's Republic of China with limited liability)

The carrying value of goodwill in the consolidated financial statements amounted to RMB10,905,083,000 as at 31 December 2024. In accordance with HKFRSs, the Group is required to perform impairment test for goodwill at least on an annual basis. The impairment test is based on the recoverable amount of each cash-generating unit to

(Established in the People's Republic of China with limited liability)

The directors of the Company are responsible for the other information. The other information comprises the information included in the Annual Report, other than the consolidated financial statements and our auditor's report thereon.

Our opinion on the consolidated financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

The directors of the Company are responsible for the preparation of the consolidated financial statements that give a true and fair view in accordance with HKFRS Accounting Standards as issued by the HKICPA and the disclosure requirements of the Hong Kong Companies Ordinance, and for such internal control as the directors determine is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, the directors of the Company are responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors of the Company either intend to liquidate the Group or to cease operations or have no realistic alternative but to do so.

The directors of the Company are assisted by the Audit Committee in discharging their responsibilities for overseeing the Group's financial reporting process.

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Our report is made solely to you, as a body, and for no other purpose. We do not assume responsibility towards or accept liability to any other person for the contents of this report.

Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with HKSAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

(Established in the People's Republic of China with limited liability)

As part of an audit in accordance with HKSAs, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.

- Conclude on the appropriateness of the directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

- Plan and perform the group audit to obtain sufficient appropriate audit evidence regarding the financial information of the entities or business units within the Group as a basis for forming an opinion on the consolidated financial statements. We are responsible for the direction, supervision and review of the audit work performed for purposes of the group audit. We remain solely responsible for our audit opinion.

We communicate with the Audit Committee regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

(Established in the People's Republic of China with limited liability)

We also provide the Audit Committee with a statement that we have complied with relevant ethical requirements regarding independence and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

From the matters communicated with the Audit Committee, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

The engagement partner on the audit resulting in this independent auditor's report is Wanyee Hooi.

The Company was established as a joint stock company with limited liability on 31 May 1995 in the People's Republic of China ("PRC"). The Company's A Shares have been listed on the Shanghai Stock Exchange since 7 August 1998. The Company's H shares have been listed on the Main Board of The Stock Exchange of Hong Kong Limited (the "Hong Kong Stock Exchange") since 30 October 2012. The operating term is from 31 December 1998 to an indefinite period.

The holding company of the Company is Shanghai Fosun High Technology (Group) Co., Ltd. ("Fosun High Tech"). The ultimate holding company of the Company is Fosun International Holdings Limited. The ultimate controlling shareholder of the Company is Mr. Guo Guangchang.

During the year, the Company and its subsidiaries (collectively referred to as the "Group") were principally engaged in the development, manufacture and sale of pharmaceutical products and medical equipment, import and export of medical equipment and the provision of related and other consulting services and investment management.

Particulars of the Company's principal subsidiaries are as follows:

		('000)	%	%	
Chongqing Yao Pharmaceutical Co., Ltd. ("Yao Pharmaceutical") ( )***	PRC/ Mainland China	RMB196,540	—	61.04	Manufacture and trading of medicine
Fosun Wanbang (Jiangsu) Pharmaceutical Group Co., Ltd. ("Fosun Wanbang") (( ))**	PRC/ Mainland China	RMB480,455	—	100.00	Manufacture and trading of medicine
Guilin South Pharma Co., Ltd. ("Guilin South Pharma") ( )***	PRC/ Mainland China	RMB285,030	—	96.86	Manufacture and trading of medicine
Shanghai Henlius Biotech, Inc. ("Henlius") ( )***	PRC/ Mainland China	RMB543,495	—	59.56	Manufacture and trading of medicine
Gland Pharma Limited ("Gland Pharma")	India	Not applicable	—	51.83	Manufacture and trading of medicine

* The English names of the companies registered in the PRC represent the best efforts made by the management of the Company in directly translating the Chinese names of these companies.

** These subsidiaries are registered as wholly-owned enterprises under PRC law.

*** These subsidiaries are registered as limited liability companies under PRC law.

The above table lists the subsidiaries of the Group which, in the opinion of the directors of the Company, principally affected the results of the Group for the year or formed a substantial portion of the net assets of the Group. To give details of other subsidiaries would, in the opinion of the directors of the Company, result in particulars of excessive length.

These financial statements have been prepared in accordance with HKFRS Accounting Standards (which include all Hong Kong Financial Reporting Standards, Hong Kong Accounting Standards ("HKASs") and Interpretations) as issued by the Hong Kong Institute of Certified Public Accountants ("HKICPA"), and the disclosure requirement of the Hong Kong Companies Ordinance. They have been prepared under the historical cost convention, except for certain equity investments, debt investments and certain financial assets, which have been measured at fair value. Disposal groups held for sale are stated at the lower of their carrying amounts and fair values less costs to sell. These financial statements are presented in Renminbi ("RMB") and all values are rounded to the nearest thousand except when otherwise indicated.

As of 31 December 2024, the Group's current assets were RMB34,491,060,000 and current liabilities were RMB37,452,669,000. The financial statements of the Group are prepared based on the basic accounting assumption of going concern. Having taken into account the expected cash flows from operating activities and the unused banking facilities, it will enable the Group to fulfil its maturing debts. Therefore, the Group has adequate working capital in the foreseeable future to meet the needs of its daily operations and will not face any issues related to going concern due to a shortage of working capital.

Basis of consolidation

The consolidated financial statements include the financial statements of the Company and its subsidiaries (collectively referred to as the "Group") for the year ended 31 December 2024. A subsidiary is an entity (including a structured entity), directly or indirectly, controlled by the Company. Control is achieved when the Group is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee (i.e., existing rights that give the Group the current ability to direct the relevant activities of the investee).

Generally, there is a presumption that a majority of voting rights results in control. When the Company has less than a majority of the voting or similar rights of an investee, the Group considers all relevant facts and circumstances in assessing whether it has power over an investee, including:

(a) the contractual arrangement with the other vote holders of the investee;

(b) rights arising from other contractual arrangements; and

(c) the Group's voting rights and potential voting rights.

Basis of consolidation (Continued)

The financial statements of the subsidiaries are prepared for the same reporting period as the Company, using consistent accounting policies. The results of subsidiaries are consolidated from the date on which the Group obtains control, and continue to be consolidated until the date that such control ceases.

Profit or loss and each component of other comprehensive income are attributed to the owners of the parent of the Group and to the non-controlling interests, even if this results in the non-controlling interests having a deficit balance. All intra-group assets and liabilities, equity, income, expenses and cash flows relating to transactions between members of the Group are eliminated in full on consolidation.

The Group reassesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control described above. A change in the ownership interest of a subsidiary, without a loss of control, is accounted for as an equity transaction.

If the Group loses control over a subsidiary, it derecognises the related assets (including goodwill), liabilities, any non-controlling interest and the exchange fluctuation reserve; and recognises the fair value of any investment retained and any resulting surplus or deficit in profit or loss. The Group's share of components previously recognised in other comprehensive income is reclassified to profit or loss or retained profits, as appropriate, on the same basis as would be required if the Group had directly disposed of the related assets or liabilities.

The Group has adopted the following revised HKFRS Accounting Standards for the first time for the current year's financial statements.

Amendments to HKFRS 16	*Lease Liability in a Sale and Leaseback*
Amendments to HKAS 1	*Classification of Liabilities as Current or Non-current* (the "2020 Amendments")
Amendments to HKAS 1	*Non-current Liabilities with Covenants* (the "2022 Amendments")
Amendments to HKAS 7 and HKFRS 7	*Supplier Finance Arrangements*

The Group has not applied the following new and revised HKFRS Accounting Standards, that have been issued but are not yet effective, in these financial statements. The Group intends to apply these new and revised HKFRS Accounting Standards, if applicable, when they become effective.

HKFRS 18	*Presentation and Disclosure in Financial Statements*[3]
HKFRS 19	*Subsidiaries without Public Accountability: Disclosures*[3]
Amendments to HKFRS 9 and HKFRS 7	*Amendments to the Classification and Measurement of Financial Instruments*[2]
Amendments to HKFRS 9 and HKFRS 7	*Contracts Referencing Nature-dependent Electricity*[2]
Amendments to HKFRS 10 and HKAS 28	*Sale or Contribution of Assets between an Investor and its Associate or Joint Venture*[4]
Amendments to HKAS 21	*Lack of Exchangeability*[1]
Annual Improvements to HKFRS Accounting Standards — Volume 11	Amendments to HKFRS 1, HKFRS 7, HKFRS 9, HKFRS 10 and HKAS 7[2]

1 Effective for annual periods beginning on or after 1 January 2025
2 Effective for annual periods beginning on or after 1 January 2026
3 Effective for annual/reporting periods beginning on or after 1 January 2027
4 No mandatory effective date yet determined but available for adoption

Further information about those HKFRS Accounting Standards that are expected to be applicable to the Group is described below.

HKFRS 18 replaces HKAS 1 *Presentation of Financial Statements*. While a number of sections have been brought forward from HKAS 1 with limited changes, HKFRS 18 introduces new requirements for presentation within the statement of profit or loss, including specified totals and subtotals. Entities are required to classify all income and expenses within the statement of profit or loss into one of the five categories: operating, investing, financing, income taxes and discontinued operations and to present two new defined subtotals. It also requires disclosures about management-defined performance measures in a single note and introduces enhanced requirements on the grouping (aggregation and disaggregation) and the location of information in both the primary financial statements and the notes. Some requirements previously included in HKAS 1 are moved to HKAS 8 *Accounting Policies, Changes in Accounting Estimates and Errors*, which is renamed as HKAS 8 *Basis of Preparation of Financial Statements*. As a consequence of the issuance of HKFRS 18, limited, but widely applicable, amendments are made to HKAS 7 *Statement of Cash Flows*, HKAS 33 *Earnings per Share* and HKAS 34 *Interim Financial Reporting*. In addition, there are minor consequential amendments to other HKFRS Accounting Standards. HKFRS 18 and the consequential amendments to other HKFRS Accounting Standards are effective for annual periods beginning on or after 1 January 2027 with earlier application permitted. Retrospective application is required. The Group is currently analysing the new requirements and assessing the impact of HKFRS 18 on the presentation and disclosure of the Group's financial statements.

HKFRS 19 allows eligible entities to elect to apply reduced disclosure requirements while still applying the recognition, measurement and presentation requirements in other HKFRS Accounting Standards. To be eligible, at the end of the reporting period, an entity must be a subsidiary as defined in HKFRS 10 Consolidated Financial Statements, cannot have public accountability and must have a parent (ultimate or intermediate) that prepares *consolidated financial statements* available for public use which comply with HKFRS Accounting Standards. Earlier application is permitted. As the Company is a listed company, it is not eligible to elect to apply HKFRS 19. Some of the Company's subsidiaries are considering the application of HKFRS 19 in their specified financial statements.

Amendments to HKFRS 9 and HKFRS 7 *Amendments to the Classification and Measurement of Financial Instruments* clarify the date on which a financial asset or financial liability is derecognised and introduce an accounting policy option to derecognise a financial liability that is settled through an electronic payment system before the settlement date if specified criteria are met. The amendments clarify how to assess the contractual cash flow characteristics of financial assets with environmental, social and governance and other similar contingent

Amendments to HKAS 21 specify how an entity shall assess whether a currency is exchangeable into another currency and how it shall estimate a spot exchange rate at a measurement date when exchangeability is lacking. The amendments require disclosures of information that enable users of financial statements to understand the impact of a currency not being exchangeable. Earlier application is permitted. When applying the amendments, an entity cannot restate comparative information. Any cumulative effect of initially applying the amendments shall be recognised as an adjustment to the opening balance of retained profits or to the cumulative amount of translation differences accumulated in a separate component of equity, where appropriate, at the date of initial application. The amendments are not expected to have any significant impact on the Group's financial statements.

Annual Improvements to HKFRS Accounting Standards — Volume 11 set out amendments to HKFRS 1, HKFRS 7 (and the accompanying Guidance on implementing HKFRS 7), HKFRS 9, HKFRS 10 and HKAS 7. Details of the amendments that are expected to be applicable to the Group are as follows:

- HKFRS 7 *Financial Instruments: Disclosures*: The amendments have updated certain wording in paragraph B38 of HKFRS 7 and paragraphs IG1, IG14 and IG20B of the Guidance on implementing HKFRS 7 for the purpose of simplification or achieving consistency with other paragraphs in the standard and/or with the concepts and terminology used in other standards. In addition, the amendments clarify that the Guidance on implementing HKFRS 7 does not necessarily illustrate all the requirements in the referenced paragraphs of HKFRS 7 nor does it create additional requirements. Earlier application is permitted. The amendments are not expected to have any significant impact on the Group's financial statements.

- HKFRS 9 *Financial Instruments*: The amendments clarify that when a lessee has determined that a lease liability has been extinguished in accordance with HKFRS 9, the lessee is required to apply paragraph 3.3.3 of HKFRS 9 and recognise any resulting gain or loss in profit or loss. In addition, the amendments have updated certain wording in paragraph 5.1.3 of HKFRS 9 and Appendix A of HKFRS 9 to remove potential confusion. Earlier application is permitted. The amendments are not expected to have any significant impact on the Group's financial statements.

- HKFRS 10 *Consolidated Financial Statements*: The amendments clarify that the relationship described in paragraph B74 of HKFRS 10 is just one example of various relationships that might exist between the investor and other parties acting as de facto agents of the investor, which removes the inconsistency with the requirement in paragraph B73 of HKFRS 10. Earlier application is permitted. The amendments are not expected to have any significant impact on the Group's financial statements.

- HKAS 7 *Statement of Cash Flows*: The amendments replace the term "cost method" with "at cost" in paragraph 37 of HKAS 7 following the prior deletion of the definition of "cost method". Earlier application is permitted. The amendments are not expected to have any impact on the Group's financial statements.

Investments in associates and joint ventures

An associate is an entity in which the Group has a long term interest of generally not less than 20% of the equity voting rights and over which it has significant influence. Significant influence is the power to participate in the financial and operating policy decisions of the investee, but is not control or joint control over those policies.

A joint venture is a type of joint arrangement whereby the parties that have joint control of the arrangement have rights to the net assets of the joint venture. Joint control is the contractually agreed sharing of control of an arrangement, which exists only when decisions about the relevant activities require the unanimous consent of the parties sharing control.

The Group's investments in associates and joint ventures are stated in the consolidated statement of financial position at the Group's share of net assets under the equity method of accounting, less any impairment losses. Adjustments are made to bring into line any dissimilar accounting policies that may exist.

The Group's share of the post-acquisition results and other comprehensive income of associates and joint ventures is included in the consolidated statement of profit or loss and consolidated other comprehensive income, respectively. In addition, when there has been a change recognised directly in the equity of the associate or joint venture, the Group recognises its share of any changes, when applicable, in the consolidated statement of changes in equity. Unrealised gains and losses resulting from transactions between the Group and its associates or joint ventures are eliminated to the extent of the Group's investments in the associates or joint ventures, except where unrealised losses provide evidence of an impairment of the assets transferred. Goodwill arising from the acquisition of associates or joint ventures is included as part of the Group's investments in associates or joint ventures.

If an investment in an associate becomes an investment in a joint venture or vice versa, the retained interest is not remeasured. Instead, the investment continues to be accounted for under the equity method. In all other case, upon loss of significant influence over the associate or joint control over the joint venture, the Group measures and recognises any retained investment at its fair value. Any difference between the carrying amount of the associate or joint venture upon loss of significant influence or joint control and the fair value of the retained investment and proceeds from disposal is recognised in profit or loss.

When an investment in an associate or a joint venture is classified as held for sale, it is accounted for in accordance with HKFRS 5 Non-current Assets Held for Sale and Discontinued Operations.

Business combinations and goodwill

Business combinations are accounted for using the acquisition method. The consideration transferred is measured at the acquisition date fair value which is the sum of the acquisition date fair values of assets transferred by the Group, liabilities assumed by the Group to the former owners of the acquiree and the equity interests issued by the Group in exchange for control of the acquiree. For each business combination, the Group elects whether to measure the non-controlling interests in the acquiree at fair value or at the proportionate share of the acquiree's identifiable net assets. All other components of non-controlling interests are measured at fair value. Acquisition-related costs are expensed as incurred.

The Group determines that it has acquired a business when the acquired set of activities and assets includes an input and a substantive process that together significantly contribute to the ability to create outputs.

When the Group acquires a business, it assesses the financial assets and liabilities assumed for appropriate classification and designation in accordance with the contractual terms, economic circumstances and pertinent conditions as at the acquisition date. This includes the separation of embedded derivatives in host contracts of the acquiree.

If the business combination is achieved in stages, the previously held equity interest is remeasured at its acquisition date fair value and any resulting gain or loss is recognised in profit or loss or other comprehensive income, as appropriate.

Any contingent consideration to be transferred by the acquirer is recognised at fair value at the acquisition date. Contingent consideration classified as an asset or liability is measured at fair value with changes in fair value recognised in profit or loss. Contingent consideration that is classified as equity is not remeasured and subsequent settlement is accounted for within equity.

Goodwill is initially measured at cost, being the excess of the aggregate of the consideration transferred, the amount recognised for non-controlling interests and any fair value of the Group's previously held equity interests in the acquiree over the identifiable net assets acquired and liabilities assumed. If the sum of this consideration and other items is lower than the fair value of the net assets acquired, the difference is, after reassessment, recognised in profit or loss as a gain on bargain purchase.

After initial recognition, goodwill is measured at cost less any accumulated impairment losses. Goodwill is tested for impairment annually or more frequently if events or changes in circumstances indicate that the carrying value may be impaired. The Group performs its annual impairment test of goodwill as at 31 December. For the purpose of impairment testing, goodwill acquired in a business combination is, from the acquisition date, allocated to each of the Group's cash-generating units, or groups of cash-generating units, that are expected to benefit from the synergies of the combination, irrespective of whether other assets or liabilities of the Group are assigned to those units or groups of units.

Impairment is determined by assessing the recoverable amount of the cash-generating unit (group of cash-generating units) to which the goodwill relates. Where the recoverable amount of the cash-generating unit (group of cash-generating units) is less than the carrying amount, an impairment loss is recognised. An impairment loss recognised for goodwill is not reversed in a subsequent period.

Business combinations and goodwill (Continued)

Where goodwill has been allocated to a cash-generating unit (or group of cash-generating units) and part of the operation within that unit is disposed of, the goodwill associated with the operation disposed of is included in the carrying amount of the operation when determining the gain or loss on the disposal. Goodwill disposed of in these circumstances is measured based on the relative value of the operation disposed of and the portion of the cash-generating unit retained.

Fair value measurement

The Group measures its certain equity investments, debt investments, certain financial assets and financial liabilities designated upon initial recognition as at fair value through profit or loss at fair value at the end of each reporting period. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either in the principal market for the asset or liability, or in the absence of a principal market, in the most advantageous market for the asset or liability. The principal or the most advantageous market must be accessible by the Group. The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Group uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

Level 1 — based on quoted prices (unadjusted) in active markets for identical assets or liabilities

Level 2 — based on valuation techniques for which the lowest level input that is significant to the fair value measurement is observable, either directly or indirectly

Level 3 — based on valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For assets and liabilities that are recognised in the financial statements on a recurring basis, the Group determines whether transfers have occurred between levels in the hierarchy by reassessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

Related parties

A party is considered to be related to the Group if:

(a) the party is a person or a close member of that person's family and that person

(i) has control or joint control over the Group;

(ii) has significant influence over the Group; or

(iii) is a member of the key management personnel of the Group or of a parent of the Group;

or

(b) the party is an entity where any of the following conditions applies:

(i) the entity and the Group are members of the same group;

(ii) one entity is an associate or joint venture of the other entity (or of a parent, subsidiary or fellow subsidiary of the other entity);

(iii) the entity and the Group are joint ventures of the same third party;

(iv) one entity is a joint venture of a third entity and the other entity is an associate of the third entity;

(v) the entity is a post-employment benefit plan for the benefit of employees of either the Group or an entity related to the Group;

(vi) the entity is controlled or jointly controlled by a person identified in (a);

(vii) a person identified in (a)(i) has significant influence over the entity or is a member of the key management personnel of the entity (or of a parent of the entity); and

(viii) the entity, or any member of a group of which it is a part, provides key management personnel services to the Group or to the parent of the Group.

Property, plant and equipment and depreciation

Property, plant and equipment, other than construction in progress, are stated at cost less accumulated depreciation and any impairment losses. When an item of property, plant and equipment is classified as held for sale or when it is part of a disposal group classified as held for sale, it is not depreciated and is accounted for in accordance with HKFRS 5. The cost of an item of property, plant and equipment comprises its purchase price and any directly attributable costs of bringing the asset to its working condition and location for its intended use.

Expenditure incurred after items of property, plant and equipment have been put into operation, such as repairs and maintenance, is normally charged to the statement of profit or loss in the period in which it is incurred. In situations where the recognition criteria are satisfied, the expenditure for a major inspection is capitalised in the carrying amount of the asset as a replacement. Where significant parts of property, plant and equipment are required to be replaced at intervals, the Group recognises such parts as individual assets with specific useful lives and depreciates them accordingly.

Depreciation is calculated on the straight-line basis to write off the cost of each item of property, plant and equipment to its residual value over its estimated useful life. The principal annual rates used for this purpose are as follows:

Freehold land	Not depreciated
Buildings	2.00% to 10.00%
Plant and machinery	4.75% to 33.33%
Medical devices	9.50% to 20.00%
Office equipment	4.85% to 33.33%
Motor vehicles	9.00% to 33.33%
Leasehold improvements	10.00% to 20.00%

Where parts of an item of property, plant and equipment have different useful lives, the cost of that item is allocated on a reasonable basis among the parts and each part is depreciated separately. Residual values, useful lives and the depreciation method are reviewed, and adjusted if appropriate, at least at each financial year end.

An item of property, plant and equipment including any significant part initially recognised is derecognised upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss on disposal or retirement recognised in the statement of profit or loss in the year the asset is derecognised is the difference between the net sales proceeds and the carrying amount of the relevant asset.

Construction in progress is stated at cost less any impairment losses, and is not depreciated. It is reclassified to the appropriate category of property, plant and equipment when completed and ready for use.

Non-current assets and disposal groups held for sale

Non-current assets and disposal groups are classified as held for sale if their carrying amounts will be recovered principally through a sales transaction rather than through continuing use. For this to be the case, the asset or disposal group must be available for immediate sale in its present condition subject only to terms that are usual and customary for the sale of such assets or disposal groups and its sale must be highly probable. All assets and liabilities of a subsidiary classified as a disposal group are reclassified as held for sale regardless of whether the Group retains a non-controlling interest in its former subsidiary after the sale.

Non-current assets and disposal groups (other than investment properties and financial assets) classified as held for sale are measured at the lower of their carrying amounts and fair values less costs to sell. Property, plant and equipment and intangible assets classified as held for sale are not depreciated or amortised.

Intangible assets (other than goodwill)

Intangible assets acquired separately are measured on initial recognition at cost. The cost of intangible assets acquired in a business combination is the fair value at the date of acquisition. The useful lives of intangible assets are assessed to be either finite or indefinite. Intangible assets with finite lives are subsequently amortised over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortisation period and the amortisation method for an intangible asset with a finite useful life are reviewed at least at each financial year end.

Intangible assets with indefinite useful lives are tested for impairment annually either individually or at the cash-generating unit level. Such intangible assets are not amortised. The useful life of an intangible asset with an indefinite life is reviewed annually to determine whether the indefinite life assessment continues to be supportable. If not, the change in the useful life assessment from indefinite to finite is accounted for on a prospective basis.

Trademarks

Trademarks with finite useful lives are measured initially at cost and are amortised on the straight-line basis over the respective estimated useful lives. Trademarks with indefinite useful lives are tested for impairment annually either individually or at the cash-generating unit level. Such intangible assets are not amortised. The useful lives of trademarks are reviewed annually to determine whether the indefinite life assessment continues to be supportable. If not, the change in the useful life assessment from indefinite to finite is accounted for on a prospective basis.

Medicine licences, technical know-how and operating concession rights

Medicine licences and technical know-how with finite useful lives are measured initially at cost and are amortised on the straight-line basis over the respective estimated useful lives. Medicine licences, technical know-how and operating concession rights with indefinite useful lives are tested for impairment annually either individually or at the cash-generating unit level. Such intangible assets are not amortised. The useful lives of medicine licences, technical know-how and operating concession rights are reviewed annually to determine whether the indefinite life assessment continues to be supportable. If not, the change in the useful life assessment from indefinite to finite is accounted for on a prospective basis.

Intangible assets (other than goodwill) (Continued)

Patents

Patents with finite useful lives are measured initially at cost and are amortised on the straight-line basis over the respective estimated useful lives. Patents with indefinite useful lives are tested for impairment annually either individually or at the cash-generating unit level. Such intangible assets are not amortised. The useful lives of patents are reviewed annually to determine whether the indefinite life assessment continues to be supportable. If not, the change in the useful life assessment from indefinite to finite is accounted for on a prospective basis.

Office software

Purchased office software is stated at cost less any impairment losses and is amortised on the straight-line basis over the estimated useful life of 2 to 10 years.

Business networks

Business networks are stated at cost less any impairment losses and are amortised on the straight-line basis over the respective estimated useful lives.

Research and development costs

All research costs are charged to the statement of profit or loss as incurred.

Expenditure incurred on projects to develop new products is capitalised and deferred only when the Group can demonstrate the technical feasibility of completing the intangible asset so that it will be available for use or sale, its intention to complete and its ability to use or sell the asset, how the asset will generate future economic benefits, the availability of resources to complete the project and the ability to measure reliably the expenditure during the development. Product development expenditure which does not meet these criteria is expensed when incurred.

Deferred development costs are stated at cost less any impairment losses and are amortised using the straight-line basis over the commercial lives of the underlying products, commencing from the date when the products are put into commercial production.

Leases

The Group assesses at contract inception whether a contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

Group as a lessee

The Group applies a single recognition and measurement approach for all leases, except for short-term leases and leases of low-value assets. The Group recognises lease liabilities to make lease payments and right-of-use assets representing the right to use the underlying assets.

At inception or on reassessment of a contract that contains a lease component and non-lease component(s), the Group adopts the practical expedient not to separate non-lease component(s) and to account for the lease component and the associated non-lease component(s) (e.g., property management services for leases of properties) as a single lease component.

Leases (Continued)

Group as a lessee (Continued)

(a) Right-of-use assets

Right-of-use assets are recognised at the commencement date of the lease (that is the date the underlying asset is available for use). Right-of-use assets are measured at cost, less accumulated depreciation and any impairment losses, and adjusted for any remeasurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognised, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Right-of-use assets are depreciated on a straight-line basis over the shorter of the lease terms and the estimated useful lives of the assets as follows:

Buildings	2 to 20 years
Plant and machinery	5 to 10 years
Motor vehicles	3 years
Prepaid land lease payments	20 to 50 years

If ownership of the leased asset transfers to the Group by the end of the lease term or the cost reflects the exercise of a purchase option, depreciation is calculated using the estimated useful life of the asset.

(b) Lease liabilities

Lease liabilities are recognised at the commencement date of the lease at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (including in-substance fixed payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees. The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the Group and payments of penalties for termination of a lease, if the lease term reflects the Group exercising the option to terminate the lease. The variable lease payments that do not depend on an index or a rate are recognised as an expense in the period in which the event or condition that triggers the payment occurs.

In calculating the present value of lease payments, the Group uses its incremental borrowing rate at the lease commencement date because the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in lease payments (e.g., a change to future lease payments resulting from a change in an index or rate) or a change in assessment of an option to purchase the underlying asset.

(c) Short-term leases and leases of low-value assets

The Group applies the short-term lease recognition exemption to its short-term leases of machinery and equipment (that is those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). It also applies the recognition exemption for leases of low-value assets to leases of office equipment and laptop computers that are considered to be of low value.

Lease payments on short-term leases and leases of low-value assets are recognised as an expense on a straight-line basis over the lease term.

Leases (Continued)

Group as a lessor

When the Group acts as a lessor, it classifies at lease inception (or when there is a lease modification) each of its leases as either an operating lease or a finance lease.

Leases in which the Group does not transfer substantially all the risks and rewards incidental to ownership of an asset are classified as operating leases. When a contract contains lease and non-lease components, the Group allocates the consideration in the contract to each component on a relative stand-alone selling price basis. Rental income is accounted for on a straight-line basis over the lease term and is included in revenue in the statement of profit or loss due to its operating nature. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognised over the lease term on the same basis as rental income. Contingent rents are recognised as revenue in the period in which they are earned.

Leases that transfer substantially all the risks and rewards incidental to ownership of an underlying asset to the lessee, are accounted for as finance leases.

Investments and other financial assets

Initial recognition and measurement

Financial assets are classified, at initial recognition, as subsequently measured at amortised cost, fair value through other comprehensive income, and fair value through profit or loss.

The classification of financial assets at initial recognition depends on the financial asset's contractual cash flow characteristics and the Group's business model for managing them. With the exception of trade receivables that do not contain a significant financing component or for which the Group has applied the practical expedient of not adjusting the effect of a significant financing component, the Group initially measures a financial asset at its fair value, plus in the case of a financial asset not at fair value through profit or loss, transaction costs. Trade receivables that do not contain a significant financing component or for which the Group has applied the practical expedient are measured at the transaction price determined under HKFRS 15 in accordance with the policies set out for "Revenue recognition" below.

In order for a financial asset to be classified and measured at amortised cost or fair value through other comprehensive income, it needs to give rise to cash flows that are solely payments of principal and interest ("SPPI") on the principal amount outstanding. Financial assets with cash flows that are not SPPI are classified and measured at fair value through profit or loss, irrespective of the business model.

The Group's business model for managing financial assets refers to how it manages its financial assets in order to generate cash flows. The business model determines whether cash flows will result from collecting contractual cash flows, selling the financial assets, or both. Financial assets classified and measured at amortised cost are held within a business model with the objective to hold financial assets in order to collect contractual cash flows, while financial assets classified and measured at fair value through other comprehensive income are held within a business model with the objective of both holding to collect contractual cash flows and selling. Financial assets which are not held within the aforementioned business models are classified and measured at fair value through profit or loss.

Investments and other financial assets (Continued)

Subsequent measurement (Continued)

Financial assets at fair value through profit or loss

Financial assets at fair value through profit or loss are carried in the statement of financial position at fair value with net changes in fair value recognised in the statement of profit or loss.

This category includes derivative instruments and equity investments which the Group had not irrevocably elected to classify at fair value through other comprehensive income. Dividends on the equity investments are also recognised as other income in the statement of profit or loss when the right of payment has been established.

A derivative embedded in a hybrid contract, with a financial liability or non-financial host, is separated from the host and accounted for as a separate derivative if the economic characteristics and risks are not closely related to the host; a separate instrument with the same terms as the embedded derivative would meet the definition of a derivative; and the hybrid contract is not measured at fair value through profit or loss. Embedded derivatives are measured at fair value with changes in fair value recognised in the statement of profit or loss. Reassessment occurs if there is either a change in the terms of the contract that significantly modifies the cash flows.

A derivative embedded within a hybrid contract containing a financial asset host is not accounted for separately. The financial asset host together with the embedded derivative is required to be classified in its entirety as a financial asset at fair value through profit or loss.

Derecognition of financial assets

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is primarily derecognised (i.e., removed from the Group's consolidated statement of financial position) when:

- the rights to receive cash flows from the asset have expired; or
- the Group has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a "pass-through" arrangement;

Impairment of financial assets (Continued)

General approach (Continued)

Debt investments at fair value through other comprehensive income and financial assets at amortised cost are subject to impairment under the general approach and they are classified within the following stages for measurement of ECLs except for trade receivables and contract assets which apply the simplified approach as detailed below.

Stage 1 — Financial instruments for which credit risk has not increased significantly since initial recognition and for which the loss allowance is measured at an amount equal to 12-month ECLs

Stage 2 — Financial instruments for which credit risk has increased significantly since initial recognition but that are not credit-impaired financial assets and for which the loss allowance is measured at an amount equal to lifetime ECLs

Stage 3 — Financial assets that are credit-impaired at the reporting date (but that are not purchased or originated credit-impaired) and for which the loss allowance is measured at an amount equal to lifetime ECLs

Simplified approach

For trade and bills receivables that do not contain a significant financing component or when the Group applies the practical expedient of not adjusting the effect of a significant financing component, the Group applies the simplified approach in calculating ECLs. Under the simplified approach, the Group does not track changes in credit risk, but instead recognises a loss allowance based on lifetime ECLs at each reporting date. The Group has established a provision matrix that is based on its historical credit loss experience, adjusted for forward-looking factors specific to the debtors and the economic environment.

For trade and bills receivables and contract assets that contain a significant financing component and lease receivables, the Group chooses as its accounting policy to adopt the simplified approach in calculating ECLs with policies as described above.

Financial liabilities

Initial recognition and measurement

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss, loans and borrowings, payables, as appropriate.

All financial liabilities are recognised initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

The Group's financial liabilities include trade and bills payables, other payables and accruals, derivative financial instruments and interest-bearing bank and other borrowings.

Financial liabilities (Continued)

Subsequent measurement

The subsequent measurement of financial liabilities depends on their classification as follows:

Financial liabilities at fair value through profit or loss

Financial liabilities at fair value through profit or loss include financial liabilities held for trading and financial liabilities designated upon initial recognition as at fair value through profit or loss.

Financial liabilities are classified as held for trading if they are incurred for the purpose of repurchasing in the near term. This category also includes derivative financial instruments entered into by the Group that are not designated as hedging instruments in hedge relationships as defined by HKFRS 9. Separated embedded derivatives are also classified as held for trading unless they are designated as effective hedging instruments. Gains or losses on liabilities held for trading are recognised in the statement of profit or loss. The net fair value gain or loss recognised in the statement of profit or loss does not include any interest charged on these financial liabilities.

Financial liabilities designated upon initial recognition as at fair value through profit or loss are designated at the initial date of recognition, and only if the criteria in HKFRS 9 are satisfied. Gains or losses on liabilities designated at fair value through profit or loss are recognised in the statement of profit or loss, except for the gains or losses arising from the Group's own credit risk which are presented in other comprehensive income with no subsequent reclassification to the statement of profit or loss. The net fair value gain or loss recognised in the statement of profit or loss does not include any interest charged on these financial liabilities.

Financial liabilities at amortised cost (trade and other payables, and borrowings)

After initial recognition, trade and other payables, and interest-bearing borrowings are subsequently measured at amortised cost, using the effective interest rate method unless the effect of discounting would be immaterial, in which case they are stated at cost. Gains and losses are recognised in the statement of profit or loss when the liabilities are derecognised as well as through the effective interest rate amortisation process.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the effective interest rate. The effective interest rate amortisation is included in finance costs in the statement of profit or loss.

Derecognition of financial liabilities

A financial liability is derecognised when the obligation under the liability is discharged or cancelled, or expires.

When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and a recognition of a new liability, and the difference between the respective carrying amounts is recognised in the statement of profit or loss.

Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the statement of financial position if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, or to realise the assets and settle the liabilities simultaneously.

Derivative financial instruments

Initial recognition and subsequent measurement

The Group uses derivative financial instruments, such as forward carrying contracts and interest rate swaps,

Cash and cash equivalents

Cash and cash equivalents in the statement of financial position comprise cash on hand and at banks, and short-term highly liquid deposits with a maturity of generally within three months that are readily convertible into known amounts of cash, subject to an insignificant risk of changes in value and held for the purpose of meeting short-term cash commitments.

For the purpose of the consolidated statement of cash flows, cash and bank equivalents comprise cash on hand and at banks, and short-term deposits as defined above, less bank overdrafts which are repayable on demand and form an integral part of the Group's cash management.

Provisions

A provision is recognised when a present obligation (legal or constructive) has arisen as a result of a past event and it is probable that a future outflow of resources will be required to settle the obligation, provided that a reliable estimate can be made of the amount of the obligation.

When the Group expects some or all of a provision to be reimbursed, for example, under an insurance contract, the reimbursement is recognised as a separate asset, but only when the reimbursement is virtually certain. The expense relating to a provision is presented in the statement of profit or loss net of any reimbursement.

When the effect of discounting is material, the amount recognised for a provision is the present value at the end of the reporting period of the future expenditures expected to be required to settle the obligation. The increase in the discounted present value amount arising from the passage of time is included in finance costs in the statement of profit or loss.

The Group provides for warranties in relation to the sale of certain medical devices and the provision of services for general repairs of defects occurring during the warranty period. Provisions for these assurance-type warranties granted by the Group are initially recognised based on sales volume and past experience of the level of repairs and returns, discounted to their present values as appropriate. The warranty-related cost is revised annually.

A contingent liability recognised in a business combination is initially measured at its fair value. Subsequently, it is measured at the higher of (i) the amount that would be recognised in accordance with the general policy for provisions above and (ii) the amount initially recognised less, when appropriate, the amount of income recognised in accordance with the policy for revenue recognition.

Income tax (Continued)

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply to the period when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

Deferred tax assets and deferred tax liabilities are offset if and only if the Group has a legally enforceable right to set off current tax assets and current tax liabilities and the deferred tax assets and deferred tax liabilities relate to income taxes levied by the same taxation authority on either the same taxable entity or different taxable entities which intend either to settle current tax liabilities and assets on a net basis, or to realise the assets and settle the liabilities simultaneously, in each future period in which significant amounts of deferred tax liabilities or assets are expected to be settled or recovered.

Government grants

Government grants are recognised at their fair value where there is reasonable assurance that the grant will be received and all attaching conditions will be complied with. When the grant relates to an expense item, it is recognised as income on a systematic basis over the periods that the costs, for which it is intended to compensate, are expensed.

Where the grant relates to an asset, the fair value is credited to a deferred income account and is released to the statement of profit or loss over the expected useful life of the relevant asset by equal annual instalments or deducted from the carrying amount of the asset and released to the statement of profit or loss by way of a reduced depreciation charge.

Revenue recognition

Revenue from contracts with customers

Revenue from contracts with customers is recognised when control of goods or services is transferred to the customers at an amount that reflects the consideration to which the Group expects to be entitled in exchange for those goods or services.

When the consideration in a contract includes a variable amount, the amount of consideration is estimated to which the Group will be entitled in exchange for transferring the goods or services to the customer. The variable consideration is estimated at contract inception and constrained until it is highly probable that a significant revenue reversal in the amount of cumulative revenue recognised will not occur when the associated uncertainty with the variable consideration is subsequently resolved.

When the contract contains a financing component which provides the customer with a significant benefit of financing the transfer of goods or services to the customer for more than one year, revenue is measured at the present value of the amount receivable, discounted using the discount rate that would be reflected in a separate financing transaction between the Group and the customer at contract inception. When the contract contains a financing component which provides the Group with a significant financial benefit for more than one year, revenue recognised under the contract includes the interest expense accreted on the contract liability under the effective interest method. For a contract where the period between the payment by the customer and the transfer of the promised goods or services is one year or less, the transaction price is not adjusted for the effects of a significant financing component, using the practical expedient in HKFRS 15.

Revenue recognition (Continued)

Revenue from contracts with customers (Continued)

(a) Sale of industrial products

Revenue from the sale of industrial products is recognised at the point in time when control of the asset is transferred to the customer, generally on delivery of the industrial products.

(b) Healthcare services, technology transfer services and consigned processing services

Revenue from rendering healthcare services, technology transfer services and consigned processing services is recognised at the point in time when the services were completed. As the customers can not control the service or consume the benefit and have no obligation to pay until each service completed and accepted.

(c) Rendering of technical consultancy services and maintenance services

Revenue from rendering technical consultancy services and maintenance services is recognised over time, as the Group's performance does not create an asset with an alternative use and the Group has an enforceable right to payment for performance completed to date.

(d) License

The Group grant commercialisation licenses or intellectual property licenses (collectively, the "License") of certain products. The License are either sold separately or bundled together with research and development service to one customer.

Contracts for bundled License and research and development service are comprised of two performance obligations because the promises to transfer the License and provide research and development service are capable of being distinct and separately identifiable. Accordingly, the transaction price is allocated based on the relative stand-alone selling prices of the License and research and development services.

Revenue from other sources

Rental income is recognised on a time proportion basis over the lease terms. Variable lease payments that do not depend on an index or a rate are recognised as income in the accounting period in which they are incurred.

Other income

Interest income is recognised on an accrual basis using the effective interest method by applying the rate that exactly discounts the estimated future cash receipts over the expected life of the financial instrument or a shorter period, when appropriate, to the net carrying amount of the financial asset.

Dividend income is recognised when the shareholders' right to receive payment has been established, it is probable that the economic benefits associated with the dividend will flow to the Group and the amount of the dividend can be measured reliably.

Contract assets

If the Group performs by transferring goods or services to a customer before being unconditionally entitled to the consideration under the contract terms, a contract asset is recognised for the earned consideration that is conditional. Contract assets are subject to impairment assessment, details of which are included in the accounting policies for impairment of financial assets. They are reclassified to trade receivables when the right to the consideration becomes unconditional.

Contract liabilities

A contract liability is recognised when a payment is made received or the a payment is due (whichever is earlier) from a customer before the Group transfers the related goods or services. Contract liabilities are recognised as revenue when the Group performs under the contract (i.e., transfers control of the related goods or services to the customer).

Contract costs

Other than the costs which are capitalised as inventories, property, plant and equipment and intangible assets, costs incurred to fulfil a contract with a customer are capitalised as an asset if all of the following criteria are met:

(a) The costs relate directly to a contract or to an anticipated contract that the entity can specifically identify.

(b) The costs generate or enhance resources of the entity that will be used in satisfying (or in continuing to satisfy) performance obligations in the future.

(c) The costs are expected to be recovered.

The capitalised contract costs are amortised and charged to the statement of profit or loss on a systematic basis that is consistent with the transfer to the customer of the goods or services to which the asset relates. Other contract costs are expensed as incurred.

Share-based payments

The Company operates a share incentive scheme. Employees (including directors) of the Group receive remuneration in the form of share-based payments, whereby employees render services in exchange for equity instruments ("equity-settled transactions"). The cost of equity-settled transactions with employees is measured by reference to the fair value at the date at which they are granted. The fair value is determined by an external valuer using a binomial model, further details of which are given in note 45 to the financial statements.

The cost of equity-settled transactions is recognised in employee benefit expense, together with a corresponding increase in equity, over the period in which the performance and/or service conditions are fulfilled. The cumulative expense recognised for equity-settled transactions at the end of each reporting period until the vesting date reflects the extent to which the vesting period has expired and the Group's best estimate of the number of equity instruments that will ultimately vest. The charge or credit to the statement of profit or loss for a period represents the movement in the cumulative expense recognised as at the beginning and end of the period.

Service and non-market performance conditions are not taken into account when determining the grant date fair value of awards, but the likelihood of the conditions being met is assessed as part of the Group's best estimate of the number of equity instruments that will ultimately vest. Market performance conditions are reflected within the grant date fair value. Any other conditions attached to an award, but without an associated service requirement, are considered to be non-vesting conditions. Non-vesting conditions are reflected in the fair value of an award and lead to an immediate expensing of an award unless there are also service and/or performance conditions.

For awards that do not ultimately vest because non-market performance and/or service conditions have not been met, no expense is recognised. Where awards include a market or non-vesting condition, the transactions are treated as vesting irrespective of whether the market or non-vesting condition is satisfied, provided that all other performance or service conditions are satisfied.

Where the terms of an equity-settled award are modified, as a minimum an expense is recognised as if the terms had not been modified, if the original terms of the award are met. In addition, an expense is recognised for any modification that increases the total fair value of the share-based payments, or is otherwise beneficial to the employee as measured at the date of modification. Where an equity-settled award is cancelled, it is treated as if it had vested on the date of cancellation, and any expense not yet recognised for the award is recognised immediately.

This includes any award where non-vesting conditions within the control of either the Group or the employee are not met. However, if a new award is substituted for the cancelled award, and is designated as a replacement award on the date that it is granted, the cancelled and new awards are treated as if they were a modification of the original award, as described in the previous paragraph.

The dilutive effect of outstanding options is reflected as additional share dilution in the computation of earnings per share.

Other employee benefits

Retirement benefits

The full-time employees of the Group in the PRC are covered by various government-regulated defined contribution retirement benefit schemes under which the employees are entitled to a monthly pension. The Group contributes a percentage of the employees' salaries to these retirement benefit schemes on a monthly basis. Under these schemes, the Group has no legal obligation for retirement benefits beyond the contributions made. Contributions to these schemes are expensed as incurred.

Accommodation benefits

According to the relevant PRC rules and regulations, the PRC companies now comprising the Group and their employees are each required to make contributions which are in proportion to the salaries and wages of the employees to an accommodation fund administered by government agencies in the PRC. There is no further obligation on the part of the Group except for such contributions to the accommodation fund. Contributions to an accommodation fund administered by government agencies are charged to the statement of profit or loss as and when they are incurred.

Termination benefits

Termination benefits are recognised at the earlier of when the Group can no longer withdraw the offer of those benefits and when the Group recognises restructuring costs involving the payment of termination benefits.

Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, i.e., assets that necessarily take a substantial period of time to get ready for their intended use or sale, are capitalised as part of the cost of those assets. The capitalisation of such borrowing costs ceases when the assets are substantially ready for their intended use or sale. All other borrowing costs are expensed in the period in which they are incurred. Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds.

Where funds have been borrowed generally, and used for the purpose of obtaining qualifying assets, a capitalisation rate ranging between 3.18% and 4.88% has been applied to the expenditure on the individual assets.

Events after the reporting period

If the Group receives information after the reporting period, but prior to the date of authorisation for issue, about conditions that existed at the end of the reporting period, it will assess whether the information affects the amounts that it recognises in its financial statements. The Group will adjust the amounts recognised in its financial statements to reflect any adjusting events after the reporting period and update the disclosures that relate to those conditions in light of the new information. For non-adjusting events after the reporting period, the Group will not change the 5(amounts recognised ints afterre funds periodGroupe the d chang tependlight of Fo, the)TjETEMC /

Foreign currencies

These financial statements are presented in RMB, which is the Company's functional currency. Each entity in the Group determines its own functional currency and items included in the financial statements of each entity are measured using that functional currency. Foreign currency transactions recorded by the entities in the Group are initially recorded using their respective functional currency rates prevailing at the dates of the transactions. Monetary assets and liabilities denominated in foreign currencies are translated at the functional currency rates of exchange ruling at the end of the reporting period. Differences arising on settlement or translation of monetary items are recognised in the statement of profit or loss.

Differences arising on settlement or translation of monetary items are recognised in the statement of profit or loss with the exception of monetary items that are designated as part of the hedge of the Group's net investment of a foreign operation. These are recognised in other comprehensive income until the net investment is disposed of, at which time the cumulative amount is reclassified to the statement of profit or loss. Tax charges and credits attributable to exchange differences on those monetary items are also recorded in other comprehensive income.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was measured. The gain or loss arising on translation of a non-monetary item measured at fair value is treated in line with the recognition of the gain or loss on change in fair value of the item (i.e., translation difference on the item whose fair value gain or loss is recognised in other comprehensive income or profit or loss is also recognised in other comprehensive income or profit or loss, respectively).

In determining the exchange rate on initial recognition of the related asset, expense or income on the derecognition of a non-monetary asset or non-monetary liability relating to an advance consideration, the date of initial transaction is the date on which the Group initially recognises the non-monetary asset or non-monetary liability arising from the advance consideration. If there are multiple payments or receipts in advance, the Group determines the transaction date for each payment or receipt of the advance consideration.

The functional currencies of certain overseas subsidiaries are currencies other than RMB. As at the end of the reporting period, the assets and liabilities of these entities are translated into RMB at the exchange rates prevailing at the end of the reporting period and their statements of profit or loss are translated into RMB at the weighted average exchange rates for the year.

The resulting exchange differences are recognised in other comprehensive income and accumulated in the exchange fluctuation reserve, except to the extent that the differences are attributable to non-controlling interests. On disposal of a foreign operation, the cumulative amount in the reserve relating to that particular foreign operation is recognised in the statement of profit or loss.

Foreign currencies (Continued)

Any goodwill arising on the acquisition of a foreign operation and any fair value adjustments to the carrying amounts of assets and liabilities arising on acquisition are treated as assets and liabilities of the foreign operation and translated at the closing rate.

For the purpose of the consolidated statement of cash flows, the cash flows of overseas subsidiaries are translated into RMB at the exchange rates ruling at the dates of the cash flows. Frequently recurring cash flows of overseas subsidiaries which arise throughout the year are translated into RMB at the weighted average exchange rates for the year.

The preparation of the Group's financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and their accompanying disclosures, and the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that could require a material adjustment to the carrying amounts of the assets or liabilities affected in the future.

In the process of applying the Group's accounting policies, management has made the following judgements, apart from those involving estimations, which have the most significant effect on the amounts recognised in the financial statements:

Classification of financial assets

The classification of financial assets at initial recognition depends on the Group's business model for managing the financial assets and the financial assets' contractual cash flow characteristics: (1) management needs to make significant judgement when assessing its business model, including but is not limited to (a) how the performance of the business model and the financial assets held within that business model are evaluated and reported to the entity's key management personnel; (b) the risks that affect the performance of the business model and the financial assets held within that business model and, in particular, the way in which those risks are managed; and (c) how managers of the business are compensated. In determining whether cash flows are going to be realised by collecting the financial assets' contractual cash flows, management needs to consider the reasons for the sales, timing of sales, frequency and value in prior periods; and (2) management needs to make significant judgement on whether the contractual cash flows are solely payments of principal and interest on the principal amount outstanding, such as whether contractual cash flows could be significantly different from the benchmark cash flows involves judgement when assessing a modified time value of a money element, and whether the fair value of prepayment features is insignificant also requires judgement when assessing the financial assets with prepayment features.

Determining the method to estimate variable consideration

Certain contracts include variable consideration based on the future events. In estimating the variable consideration, the Group is required to use either the expected value method or the most likely amount method based on which method better predicts the amount of consideration to which it will be entitled.

Given that the payments of certain variable consideration are not within the control of the Group, such as regulatory approvals, relevant consideration is not considered until relevant approvals are obtained. The Group determines that the most likely amount method is the appropriate method to estimate the variable consideration. When it is highly probable that the income corresponding to the relevant consideration will not be significantly reversed, the uncertainty of the variable consideration is eliminated and the variable consideration will be included in the transaction price. At the end of each reporting period, the Group will re-evaluate the probability of the payment of the variable consideration, and if necessary, adjust the estimation of the overall transaction price.

The key assumptions concerning the future and other key sources of estimation uncertainty at the end of the reporting period, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below:

Impairment of goodwill

The Group determines whether goodwill is impaired at least on an annual basis. This requires an estimation of the value in use of the cash-generating units to which the goodwill is allocated. Estimating the value in use requires the Group to make an estimate of the expected future cash flows from the cash-generating units and also to choose a suitable discount rate in order to calculate the present value of those cash flows. The carrying amount of goodwill at 31 December 2024 was RMB10,905,083,000 (2023: RMB10,851,999,000). Further details are given in note 17 to the financial statements.

Provision for expected credit losses on trade and bills receivables and contract assets

The Group uses a provision matrix to calculate ECLs for trade and bills receivables and contract assets. The provision rates are based on days past due for groupings of various customer segments that have similar loss patterns (i.e., by geography, product type, customer type and rating, and coverage by letters of credit and other forms of credit insurance).

The provision matrix is initially based on the Group's historical observed default rates. The Group will calibrate the matrix to adjust the historical credit loss experience with forward-looking information. For instance, if forecast economic conditions (i.e., gross domestic products) are expected to deteriorate over the next year which can lead to an increased number of defaults in the manufacturing sector, the historical default rates are adjusted. At each reporting date, the historical observed default rates are updated and changes in the forward-looking estimates are analysed.

The assessment of the correlation among historical observed default rates, forecast economic conditions and ECLs is a significant estimate. The amount of ECLs is sensitive to changes in circumstances and forecast economic conditions. The Group's historical credit loss experience and forecast of economic conditions may also not be representative of customer's actual default in the future. The information about the ECLs on the Group's trade and bill receivables cost is disclosed in note 26 to the financial statements, respectively.

Leases — Estimating the incremental borrowing rate

The Group cannot readily determine the interest rate implicit in a lease, and therefore, it uses an incremental borrowing rate ("IBR") to measure lease liabilities. The IBR is the rate of interest that the Group would have to pay to borrow over a similar term, and with a similar security, the funds necessary to obtain an asset of a similar value to the right-of-use asset in a similar economic environment. The IBR therefore reflects what the Group "would have to pay", which requires estimation when no observable rates are available (such as for subsidiaries that do not enter into financing transactions) or when it needs to be adjusted to reflect the terms and conditions of the lease (for example, when leases are not in the subsidiary's functional currency). The Group estimates the IBR using observable inputs (such as market interest rates) when available and is required to make certain entity-specific estimates (such as the subsidiary's stand-alone credit rating).

Impairment of non-financial assets (other than goodwill)

The Group assesses whether there are any indicators of impairment for all non-financial assets at the end of each reporting period. Indefinite-life intangible assets are tested for impairment annually and at other times when such an indicator exists. Other non-financial assets are tested for impairment when there are indicators that the carrying amounts may not be recoverable. An impairment exists when the carrying value of an asset or a cash-generating unit exceeds its recoverable amount, which is the higher of its fair value less costs of disposal and its value in use. The calculation of the fair value less costs of disposal is based on available data from binding sales transactions in an arm's length transaction of similar assets or observable market prices less incremental costs for disposing of the asset. When value in use calculations are undertaken, management must estimate the expected future cash flows from the asset or cash-generating unit and choose a suitable discount rate in order to calculate the present value of those cash flows.

Net realisable value of inventories

Net realisable value of inventories is the estimated selling price in the ordinary course of business, less estimated cost to be incurred to completion and sale. These estimates are based on the current market condition and the historical experience of selling products of a similar nature. It could change significantly as a result of changes in customers' needs and prices change when the products' expiration date is approaching. Management reassesses these estimates at the end of the reporting period.

Fair value of unlisted equity investments

The unlisted equity investments have been valued based on a market-based valuation technique as detailed in note 51 to the financial statements. The valuation requires the Group to determine the comparable public companies (peers) and select the price multiple. In addition, the Group makes estimates about the discount for illiquidity and size differences. The Group classifies the fair value of these investments as Level 3. The fair value of the unlisted equity investments at 31 December 2024 was RMB2,410,866,000 (2023: RMB1,637,244,000). Further details are included in note 29 to the financial statements.

Valuation of the identifiable assets and liabilities through business combinations and the recognised corresponding goodwill

The Group completed certain business combinations during the year. The purchase prices are allocated between the fair values of the identifiable assets acquired and the liabilities assumed which result in the recognition of goodwill. Management, assisted by the external appraisers, evaluated the fair values of identifiable assets acquired and liabilities assumed and completed the purchase price allocation. The fair value determination in the accounting for business combinations relied on significant management estimation in respect of fair value assessments.

Useful lives of property, plant and equipment

The Group determines the estimated useful lives and related depreciation charges for its property, plant and equipment. This estimate is based on the historical experience of the actual useful lives of property, plant and equipment of similar nature and functions. It could change significantly as a result of technical innovations, or competitor actions in response to severe industry cycles. Management will increase the depreciation charge where useful lives are less than previously estimated lives, or it will write off or write down technically obsolete or non-strategic assets that have been abandoned or sold.

Useful lives of intangible assets (other than goodwill)

The Group determines the estimated useful lives for its intangible assets. This estimate is based on the historical experience of the actual useful lives of intangible assets of similar nature and functions. It could change significantly as a result of technical innovations, or competitor actions in response to severe industry cycles. Management will increase the amortisation charge where useful lives are less than previously estimated lives, or it will write off or write down technically obsolete or non-strategic assets that have been abandoned or sold.

Development costs

Development costs are capitalised in accordance with the accounting policy for research and development costs in note 2.4 to the financial statements. Determining the amounts to be capitalised requires management to make assumptions regarding to future economic benefits.

Deferred tax assets

Deferred tax assets are recognised for unused tax losses to the extent that it is probable that taxable profit will be available against which the losses can be utilised. Significant management judgement is required to determine the amount of deferred tax assets that can be recognised, based upon the likely timing and the level of future taxable profits, together with future tax planning strategies.

As at 31 December 2024, the Group has tax losses of RMB11,342,606,000 (2023: RMB11,138,269,000) carried forward. These losses related to subsidiaries that have a history of losses, have not expired, and may not be used to offset taxable income elsewhere in the Group. The subsidiaries have neither any taxable temporary difference nor any tax planning opportunities available that could partly support the recognition of these losses as deferred tax assets. On this basis, the Group has determined that it cannot recognise deferred tax assets on the tax losses carried forward.

Further details on deferred taxes are disclosed in note 22 to the financial statements.

For management purposes, the Group is organised into business units based on their products and services and has five reportable operating segments as follows:

(a) the pharmaceutical manufacturing segment mainly engages in the R&D, production and sale of medicine;

(b) the medical devices and medical diagnosis segment mainly engages in the R&D production and sale of medical devices and diagnostic products;

(c) the healthcare service segment mainly engages in the provision of healthcare service and hospital management;

(d) the pharmaceutical distribution and retail segment mainly engages in distribution and retail of medicine and medical devices; and

(e) the other business operations segment comprises businesses other than those mentioned above.

Management monitors the results of the Group's operating segments separately for the purpose of making decisions about resource allocation and performance assessment. Segment performance is evaluated based on reportable segment profit or loss, which is a measure of adjusted profit or loss after tax. The adjusted profit or loss after tax is measured consistently with the Group's profit or loss after tax except that fair value gain or loss on financial assets at fair value through profit or loss, as well as head office and investment management entities income and expenses are excluded from such measurement.

Intersegment revenues are eliminated on consolidation. Intersegment sales and transfers are transacted with reference to the selling prices used for sales made to third parties at the then prevailing market prices.

Segment assets exclude financial assets at fair value through profit or loss, equity investments designated at fair value through other comprehensive income, entrusted loan recorded in current assets and unallocated head office and investment management entities assets as these assets are managed on a group basis.

Segment liabilities exclude interest-bearing bank and other borrowings, interest payable and unallocated head office and investment management entities liabilities as these liabilities are managed on a group basis.

Goods and materials transferred at a point in time	28,554,391	4,256,666	686,595	—	32,949	33,530,601
Services transferred at a point in time	1,205,727	34,162	5,976,603	—	33,450	7,249,942
Services transferred over time	312,253	93,108	—	—	—	405,361
Total	30,072,371	4,383,936	6,663,198	—	66,399	41,185,904

The following table shows the amounts of revenue recognised in the current reporting period that were included in the contract liabilities at the beginning of the reporting period and recognised from performance obligations satisfied in previous periods:

	2023 RMB'000
Revenue recognised that was included in contract liabilities as at the beginning of the reporting period:	
Advances from customers	1,493,312
Warranty services	51,450
Total	1,544,762

(ii) Performance obligations

Information about the Group's performance obligations is summarised below:

Sale of goods

The performance obligation is satisfied at the point when control of the asset is transferred to the customer.

Rendering of services

— The performance obligation is recognized at the point in time when the service is provided

— The performance obligation is satisfied over time as services are rendered and payment is generally due upon completion of installation and customer acceptance.

The amounts of transaction prices allocated to the remaining performance obligations (unsatisfied or partially unsatisfied) as at 31 December are as follows:

	2023 RMB'000
Amounts expected to be recognised as revenue:	
Within one year	1,200,496
After one year	319,785
Total	1,520,281

The amounts disclosed above do not include variable consideration which is constrained.

	2023 RMB'000
Dividend income from financial assets at fair value through profit or loss	61,239
Dividend income from equity investments designated at fair value through other comprehensive income	203
Government grants	463,538
Total	524,980

The Group's profit before tax is arrived at after charging/(crediting):

	Notes	2023 RMB'000
Cost of inventories sold		16,189,857
Cost of services provided		5,405,452
Staff costs (including Directors', Supervisors' and Chief Executive's remuneration)		
Salaries and other staff costs		9,322,174
Retirement benefits:		
Defined contribution fund		553,831
Accommodation benefits:		
Defined contribution fund		328,098
Share-based payment expense		35,898
		10,240,001
Research and development costs:		
Current year expenditure excluding amortisation of other intangible assets		3,877,623
Less: Government grants for R&D projects*		(56,687)
		3,820,936
Auditors' remuneration		4,660
Depreciation of property, plant and equipment		1,517,737
Amortisation of other intangible assets		1,282,683
Provision for impairment of property, plant and equipment	15	2,408
Provision for impairment of inventories		121,339
Impairment losses on financial assets, net		
Impairment of trade receivables, net	23 & 26	110,362

Provision for other intangible assets	18	21,592
Provision for impairment of investment in associates	20	61,284
Provision for other non-current assets		13,119
Depreciation of right-of-use assets	16	318,258
Lease payments not included in the measurement of lease liabilities		113,749
Loss/(Gain) on disposal of financial assets at fair value through profit or loss		(558,489)
Loss/(Gain) on fair value change of other financial liabilities at fair value through profit or loss, net		(47,204)
Loss on fair value change of financial assets at fair value through profit or loss, net		452,384
Gain on disposal of interests in associates and joint ventures	8	(710,599)
Foreign exchange loss/(gain), net		(13,027)
Loss on disposal of subsidiaries		1,046
Gain on disposal of items of property, plant and equipment and other intangible assets		(538)
Donations		45,909

* The Group received various government grants related to research and development projects. The government grants received have been recorded in other income. Government grants received for which related expenditure has not yet been undertaken are included in deferred income in the consolidated statement of financial position. There are no unfulfilled conditions or contingencies relating to these grants.

	2023 RMB'000
Gain on disposal of interests in associates and joint ventures	710,599
Gain on disposal of financial assets at fair value through profit or loss	558,489
Gain on fair value change of other financial liabilities at fair value through profit or loss, net	47,204
Foreign exchange gain, net	13,027
Gain on disposal of items of property, plant and equipment and other intangible assets	5,564
Others	57,124
Total	1,392,007

	2023 RMB'000
Interest on bank and other borrowings (excluding lease liabilities)	1,323,035
Interest on lease liabilities	50,920
Subtotal	1,373,955
Less: Interest capitalised *(note 15)*	(49,124)
Total	1,324,831

Directors', supervisors' and chief executive's remuneration for the year, disclosed pursuant to the Listing Rules, section 383 (1)(a), (b), (c) and (f) of the Hong Kong Companies Ordinance and Part 2 of the Companies (Disclosure of Information about Benefits of Directors) Regulation, is as follows:

	2023 RMB'000
Fees	1,568
Other emoluments:	
Salaries, allowances and benefits in kind	12,181
Performance related bonuses	35,939
Pension scheme contributions	330
Subtotal	48,450
Total	50,018

During the year, certain directors were granted the incentive schemes of the Group, in respect of their services to the Group, under the granted incentive Interest scheme of the Company, further details of which are set out in note 45 to the financial statements. The fair value of such options, which has been recognised in the statement of profit or loss over the vesting period, was determined as at the date of grant and the amount included in the financial statements for the current year is included in the above directors' and chief executive's remuneration disclosures.

The fees paid to independent non-executive directors during the year were as follows:

	2023 RMB'000
Ms. Li Ling	392
Mr. Tang Guliang	392
Mr. Wang Quandi	392
Mr. Yu Zishan	392
Total	1,568

There were no other emoluments payable to the independent non-executive directors during the year (2023: Nil).

There was no arrangement under which a director, a supervisor or the chief executive waived or agreed to waive any remuneration during the year (2023: Nil).

The five highest paid employees during the year included two directors (2023: four directors), details of whose remuneration are set out in note 10 above. Details of the remuneration for the year of the remaining three (2023: one) highest paid employees who are not a director, supervisor, or the chief executive of the Company are as follows:

	2023 RMB'000
Salaries, allowances and benefits in kind	

The provision for Chinese Mainland current income tax is based on a statutory rate of 25% of the assessable profits of the Group as determined in accordance with the PRC Corporate Income Tax Law which was approved and became effective on 1 January 2008, except for certain subsidiaries of the Group in Chinese Mainland, which are taxed at preferential rates of 0% to 20%.

Taxes on profits assessable in overseas countries and regions have been calculated at the tax rates prevailing in the jurisdictions in which the Group operates. Hong Kong profits tax has been provided at the rate of 16.5% on the estimated assessable profits arising in Hong Kong during the year, the first HKD2,000,000 of assessable profits are taxed at 8.25% and the remaining assessable profits are taxed at 16.5%. The provision of current income tax of Alma Lasers Ltd., a subsidiary of the Company incorporated in Israel, enjoyed a preferential effective tax rate of 6% for being a Special Preferred Technological Enterprise ("SPTE"). The provision of current tax of Gland Pharma Limited ("Gland Pharma"), a subsidiary of the Company incorporated in India, was based on a statutory rate of 25.17%. The provision of current tax of Breas Medical Holdings AB ("Breas"), a subsidiary of the Company incorporated in Sweden, is based on a statutory rate of 20.6%. The provision of current tax of Tridem Pharma S.A.S ("Tridem Pharma"), a subsidiary of the Company incorporated in France, is based on a statutory rate of 25.83%. The provision of current income tax of Phixen SAS ("Phixen"), a subsidiary of the Company incorporated in France, is based on a statutory rate of 25.83%.

	2023 RMB'000
Current	529,206
Deferred *(note 22)*	(159,702)
Total	369,504

A reconciliation of the tax expense applicable to profit before tax at the statutory tax rates for the countries in which the company and the majority of its subsidiaries are domiciled to the tax expense at the effective tax rates, and a reconciliation of the applicable rates (i.e., the statutory tax rates) to the effective tax rates, are as follows:

Profit before tax	
Tax at the statutory tax rate	
Lower tax rates for certain entities	
Adjustments in respect of current tax of previous years	
Profit attributable to joint ventures and associates	
Income not subject to tax	
Expenses not deductible for tax	
Influence of the change of tax rate on the deferred income tax balance	
Tax losses utilised from previous periods	
Tax incentives on eligible expenditures	
Deductible temporary differences and tax losses not recognised	
Tax charge at the Group's effective rate

The Group is within the scope of the Pillar Two model rules. The Group has applied the mandatory exception to recognising and disclosing information about deferred tax assets and liabilities arising from Pillar Two income taxes, and will account for the Pillar Two income taxes as current tax when incurred. Pillar Two legislation has been enacted or substantively enacted in certain jurisdictions in which the Group operates.

The Group has assessed its potential exposure based on the information available regarding the financial performance of the Group in the current year. As such, it may not be entirely representative of future circumstances. Based on the assessment, the Pillar Two effective tax rates in most of the jurisdictions in which it operates are above 15%. There are a limited number of jurisdictions where the Pillar Two effective tax rate is slightly below 15%. The Group does not expect a material exposure to Pillar Two income taxes.

	2023 RMB'000
Proposed final — RMB0.32 (2023: RMB0.27) per ordinary share	721,548

The Company proposed to distribute a cash dividend of RMB 0.32 (before tax) for each ordinary share to all shareholders whose names are registered in the register of members and are entitled to participate in the distribution on the record date. The proposed final dividend for the year is subject to the approval of the Company's shareholders at the forthcoming annual general meeting and the final dividend amount will be determined by the number of the ordinary shares available for distribution on the corresponding date of share registration for the dividend payment.

The amount of the proposed final dividend of RMB850,275 thousand is calculated based on the total number of ordinary shares of the Company of 2,671,326,465 shares as at 25 March 2025, net off 14,218,200 shares repurchased but not cancelled, which resulted in 2,657,108,265 shares.

The calculation of the basic earnings per share amounts is based on the profit for the year attributable to ordinary equity holders of the parent, adjusted to reflect the cash dividends distributed to the Restricted A Share Incentive Scheme, and the weighted average number of ordinary shares of 2,670,408,116 (2023: 2,669,655,211) in issue during the period.

The calculation of the diluted earnings per share amounts is based on the profit for the period attributable to ordinary equity holders of the parent. The weighted average number of ordinary shares used in the calculation is the number of ordinary shares in issue during the period, as used in the basic earnings per share calculation, and the weighted average number of ordinary shares assumed to have been issued at no consideration on the deemed conversion of all dilutive potential ordinary shares into ordinary shares.

The calculations of basic and diluted earnings per share are based on:

	2023 RMB'000
Profit attributable to ordinary equity holders of the parent	2,398,606
Less: Cash dividends distributed to the Restricted A Share Incentive Scheme	(1,050)
Adjusted profit attributable to ordinary equity holders of the parent, used in the basic earnings per share calculation	2,397,556
Cash dividends distributed to the Restricted A Share Incentive Scheme	1,050
Total	2,398,606

	2023
Weighted average number of ordinary shares in issue during the period used in the basic earnings per share calculation	2,669,655,211
Effect of dilution — weighted average number of ordinary shares: — the Restricted A Share Incentive Scheme	253,150
Total	2,669,908,361

The carrying amounts of construction in progress of the Group included capitalised interest of approximately RMB21,791,000 (2023: RMB49,124,000) charged for the year (note 9) prior to being transferred to property, plant and equipment.

As at 31 December 2024, the Group has not obtained title certificates for certain of the buildings with an aggregate net carrying amount of approximately RMB897,780,000 (2023:RMB42,289,000). The directors were of the opinion that the aforesaid matter did not have any significant impact on the Group's financial position as at 31 December 2024.

As at 31 December 2024, certain of the Group's property, plant and equipment with a net carrying amount of approximately RMB2,597,290,000 (2023: RMB2,117,025,000) were pledged to secure certain of the Group's bank and other borrowings (note 34).

As at 31 December, the net carrying values of the group's property, plant and equipment leased out for operating purposes are as follows:

	2023 RMB'000
Buildings	79,181

The Group has lease contracts for various items of land, buildings, plant and machinery and motor vehicles used in its operations. Lump sum payments were made upfront to acquire the leased land from the owners with lease periods of 20 to 50 years, and no ongoing payments will be made under the terms of these land leases. Leases of buildings have lease terms between 2 to 20 years, plant and machinery generally have lease terms between 5 and 10 years, while motor vehicles generally have lease terms of 3 years. Generally, the Group is restricted from assigning and subleasing the leased assets outside the Group.

* Goodwill of Gland Pharma, Sisram and Breas is measured in USD, and goodwill of Alma Hong Kong 2023 Limited is measured in RMB.

** Goodwill of Tridem Pharma and Phixen SAS, a subsidiary of Gland Pharma, is measured in EUR.

The English names of the companies registered in the PRC represent the best efforts made by the management of the Company in directly translating the Chinese names of these companies.

Goodwill of Gland Pharma and subsidiaries

Gland Pharma, founded in 1978 and headquartered in Hyderabad, India, is a generic injection company with R&D capabilities for original pharmaceuticals and preparations. At present, it mainly provides manufacturing services of generic injection for large-scale pharmaceutical companies worldwide. Gland Pharma is the first Indian manufacturer

Goodwill of Sisram and subsidiaries

Sisram is a manufacturer of medical lasers, photonics and Radio Frequency equipment in Israel. Sisram ranks in the forefront of the medical beauty market, and has formed a strong competitive advantage in design capabilities, cost control, and customer base. Its medical laser and optical equipment is mainly used in dermatology, orthopedics, burn surgery, laser and many other fields, and Sisram and subsidiaries are dedicated to provide the comprehensive solution with core of top technology for the medical beauty market. Sisram merged downstream distributor Nova Medical Israel Ltd. to integrate its sales channels in the Israel market during 2019. In 2023, Sisram completed the acquisition of PhotonMed brand and channel, a leading energy source equipment distributor and strategic partner of Alma in China, achieving a direct sales layout for medical beauty business in the Chinese market. The Group regularly evaluates the above-mentioned business activities and unifies resource allocation based on the evaluation results. Therefore, Sisram and its subsidiaries as a whole is recognised as a group of cash-generating units, which belongs to the medical devices and medical diagnosis segment. According to the 5-year financial forecast approved by the management, the revenue growth rate for Sisram and its subsidiaries beyond the forecast period is 2.00% (2023: 2.30%). The discount rate applicable to future cash flows is 18.11% (2023: 17.75%). According to the calculation, the present value of the estimated future cash flow is higher than the carrying amount of Sisram and subsidiaries' group of cash-generating units. The Group believes that there is no impairment of the goodwill during 2024. This group of cash-generating units mainly consists of Alma Lasers, Ltd., Nova Medical Israel Ltd. and Alma Hong Kong 2023 Limited, and the cash flows generated are independent from those of other cash-generating units or groups of cash-generating units.

Goodwill of Chancheng Hospital, Zhuhai Chancheng & Xinshi Hospital

Chancheng Hospital is a national third-grade class-A hospital which integrates medical treatment, rehabilitation, scientific research and teaching in Foshan, Guangdong Province. Chancheng Hospital in Zhuhai City, Guangdong Province is a second-class hospital approved by Zhuhai Health and Family Planning Bureau. Xinshi Hospital is a third-class general hospital which integrates medical treatment, teaching, prevention and health care in Guangzhou, Guangdong Province. As the above-mentioned hospitals are located in South China, they have synergy and relevance in terms of acquisition purpose, integration progress, overall evaluation, resource allocation and business operation. Therefore, Chancheng Hospital, Zhuhai Chancheng & Xinshi Hospital as a whole is recognised as a group of cash-generating units, which belongs to the Healthcare service segment. According to the 9-year financial forecast approved by the management, the revenue growth rate for Chancheng Hospital, Zhuhai Chancheng & Xinshi Hospital beyond the forecast period is 2.00% (2023: 2.30%). The discount rate applicable to future cash flows is 14.78% (2023: 15.67%). According to the calculation, the present value of the estimated future cash flow is higher than the carrying amount of Chancheng Hospital, Zhuhai Chancheng & Xinshi Hospital

Goodwill of Hengsheng Hospital

Hengsheng Hospital is a large-scale modern comprehensive Tertiary Hospital approved by the Health and Family Planning Commission of Guangdong Province, which integrates medical treatment, scientific research, teaching, rehabilitation and preventive health care. It is mainly engaged in healthcare service and is the designated medical institution for social medical insurance in Shenzhen. Shenzhen Workers' Injury Insurance Hospital, Shenzhen Children's Medical Insurance Hospital, Shenzhen 120 Emergency Medical Center Network Hospital, Shenzhen Baoan District Science Education Base, Teaching Hospital of Guangdong Medical College. The Group regularly evaluates the above-mentioned operating activities and unifies resource allocation based on the evaluation results. Hengsheng Hospital specialises in healthcare service and generates operating cash flow independently. Therefore, Hengsheng Hospital as a whole is recognised as a group of cash-generating units, which belongs to the Healthcare service segment. According to the 9-year financial forecast approved by the management, the revenue growth rate for Hengsheng Hospital beyond the forecast period is 2.00% (2023: 2.30%). The discount rate applicable to future cash flows is 16.00% (2023: 17.08%). According to the calculation, the present value of the estimated future cash flow is higher than the carrying amount of Hengsheng Hospital's group of cash-generating units. The Group believes that there is no impairment of the goodwill during 2024. This cash-generating unit mainly consists of Hengsheng Hospital, and the cash flows generated are independent from those of other cash-generating units or groups of cash-generating units.

Goodwill of Avanc Pharma and subsidiaries

Avanc Pharma and subsidiaries focus on pharmaceutical products whose major products included Aodejin (Calf blood serum injection), Bangting (Hemocoagulase for injection) and others. In 2019, Avanc Pharma obtained first class listed pharmaceutical chemicals Penehyclidine hydrochloride injection (Changtuoning) through acquiring Chengdu List Pharmaceutical Co., Ltd. (hereinafter called the "List Pharma"). Meanwhile, Avanc Pharma recombined its own business with those of List Pharma, improving the strategic layout by transferring the production of Changtuoning and integrate the sales channels. The group has overall assessment for mentioned-above operating activities regularly, and allocates resources accordingly; therefore, Avanc Pharma and its subsidiaries as a whole is recognised as a group of cash-generating units, which belongs to the pharmaceutical manufacturing segment. The recoverable amount is determined based on the present value of the expected future cash flows of the asset portfolio. According to the 9-year financial forecast approved by the management, the revenue growth rate for Avanc Pharma and its subsidiaries beyond the forecast period is 2.00% (2023: 2.30%). The discount rate applicable to future cash flows is 13.84% (2023: 14.36%). According to the calculation, the present value of the estimated future cash flow is higher than the carrying amount of Avanc Pharma and subsidiaries' group of cash-generating units. The Group believes that there is no impairment of the goodwill during 2024. This group of cash-generating units mainly consists of Avanc Pharma and Chengdu List, and the cash flows generated are independent from those of other cash-generating units or groups of cash-generating units.

Goodwill of Yao Pharma and subsidiaries

The group of cash-generating units belongs to the pharmaceutical manufacturing segment. The recoverable amount is determined based on the present value of the expected future cash flows of the group of cash-generating units. According to the 9-year financial forecast approved by the management, the revenue growth rate for Yao Pharma and its subsidiaries beyond the forecast period is 2.00% (2023: 2.30%). The discount rate applicable to future cash flows is 16.00% (2023: 17.13%). According to the calculation, the present value of the estimated future cash flow is higher than the carrying amount of Yao Pharma and subsidiaries' group of cash-generating units. The Group believes that there is no impairment of the goodwill during 2024. This group of cash-generating units mainly consists of Sichuan Hexin, Dongting Pharma, Liaoning Shinsun Pharma and Beijing Jiluohua, and the cash flows generated are independent from those of other cash-generating units or groups of cash-generating units.

Goodwill of Erye Pharma

Erye Pharma is a comprehensive pharmaceutical company that produces APIs, powder injections (including penicillins,

Goodwill of Tridem Pharma

The cash-generating unit belongs to the pharmaceutical manufacturing segment. The recoverable amount is determined based on the present value of the expected future cash flows of the cash-generating unit. According to the 9-year financial forecast approved by the management, the revenue growth rate for Tridem Pharma beyond the forecast period is 2.00% (2023: 2.30%). The discount rate applicable to future cash flows is 16.15% (2023: 18.46%). According to the calculation, the present value of the estimated future cash flow is higher than the carrying amount of Tridem Pharma's cash-generating unit. The Group believes that there is no impairment of the goodwill during 2024. This cash-generating unit is mainly composed of Tridem Pharma, and the cash flows generated are independent from those of other cash-generating units or groups of cash-generating units.

Goodwill of Fosun Wanbang and subsidiaries

The group of cash-generating units belongs to the pharmaceutical manufacturing segment. The recoverable amount is determined based on the present value of the expected future cash flows of the group of cash-generating units. According to the 9-year financial forecast approved by the management, the revenue growth rate for Fosun Wanbang and its subsidiaries beyond the forecast period is 2.00% (2023: 2.30%). The discount rate applicable to future cash flows is 16.67% (2023: 17.22%). According to the calculation, the present value of the estimated future cash flow is higher than the carrying amount of Fosun Wanbang and subsidiaries' group of cash-generating units. The Group believes that there is no impairment of the goodwill during 2024. This group of cash-generating units mainly consists of Fosun Wanbang Biochemical, Shenyang Wanbang Tiansheng and Wanbang Sinock, and the cash flows generated are independent from those of other cash-generating units or groups of cash-generating units.

The Group's calculation of the present value (recoverable amount) of the estimated future cash flows of the cash-generating units or the groups of cash-generating units of Gland Pharma and subsidiaries, Fosun Adgenvax and subsidiaries, Foshan Fosun Chancheng Hospital, Zhuhai Chancheng & Xinshi Hospital, Hengsheng Hospital, Avanc Pharma and subsidiaries, Xingmai Technology, Breas, Shenyang Red Flag and Erye Pharma was also referred to the results of Shanghai Orient Appraisal Co., Ltd.'s report on 21 March 2025 No. 0611 of Orient Appraisal Evaluation Report [2025] "The assessment report of the recoverable amount of nine related cash-generating units or groups of cash-generating units for the purpose of financial reporting of Shanghai Fosun Pharmaceutical (Group) Co., Ltd.".

Additions	—	111,281	75,265	19	19,067			

As at 31 December 2024, the indefinite-life intangible assets of the Group are as follows

		RMB'000	
Medicine licences	Fosun Aleph, Dongting Pharma, Hongqi Pharma, Erye Pharma	307,000	The extension cost is low and the assets can be used indefinitely
Trademarks	Fosun Aleph, Dongting Pharma, Erye Pharma	31,000	The extension cost is low and the assets can be used indefinitely
Trademarks	CML, Alma*	208,106	The extension cost is low and the assets can be used indefinitely
Operating concession rights	Hengsheng Hospital	421,710	The extension cost is low and the assets can be used indefinitely
Patents and technical know-how	Henlix	48,921	The extension cost is low and the assets can be used indefinitely
Total		1,016,737	

* Trademarks of CML and Alma are measured in USD.

The Group performs impairment tests for the above individual intangible assets or the respective cash-generating units depending on whether the recoverable amounts of individual intangible assets can be reliably estimated.

The recoverable amounts of medicine licences have been determined based on a value-in-use calculation using cash flow projections based on a financial budget covering a nine-years period approved by senior management. The discount rates applied to the cash flow projections are in the range of 15.50% to 16.70%. The growth rate used to extrapolate the cash flows beyond the forecast period is 2.00%, which is also an estimate of the rate of inflation.

The recoverable amounts of trademarks have been determined based on a value-in-use calculation using cash flow projections based on a financial budget covering a period of five to nine years period approved by senior management. The discount rates applied to the cash flow projections is 17.50%. The growth rate used to extrapolate the cash flows beyond the forecast period is 2.00%, which is also an estimate of the rate of inflation.

The recoverable amounts of operating concession rights have been determined based on a value-in-use calculation using cash flow projection based on a financial budget covering a nine-year period approved by senior management. The discount rate applied to the cash flow projection is 16.64%. The growth rate used to extrapolate the cash flows beyond the forecast period is 2.00%, which is also an estimate of the rate of inflation.

The recoverable amounts of the Patents and technical know-how were determined based on the fair value less costs of disposal, and the fair values of non-patent technologies were determined using the relief from the royalty method taking into account the nature of the asset, using cash flow projections based on financial budget covering a nine-year period approved by the management. The discount rate applied to the cash flow projection is 18.04%. The growth rate used to extrapolate the cash flows beyond the financial budget period is 2.00%, which is close to the long-term inflation rate.

Assumptions were used in the value-in-use calculation for 31 December 2024 and 31 December 2023. The following describes each key assumption on which management has based its cash flow projections to undertake impairment testing of indefinite-life intangible assets:

Forecasted revenue — The basis for determining this growth rate is an appropriate increase based on projected market developments on the basis of forecasted revenue achieved in the previous year.

Forecasted profit margin — The basis used to determine the value assigned to the forecasted profit margin is the average profit margin achieved in the year immediately before the forecast year, adjusted for expected efficiency adjustments and expected market development.

Discount rates — The discount rates used are the rates of return on investment required by the group.

The growth rates beyond the forecast period — The growth rates beyond the forecast period are the rates of inflation.

The values assigned to key assumptions are consistent with historical experience of the Group and external information sources.

	2023 RMB'000
Share of net assets	78,910

The Group's trade receivable balances due from the joint ventures are disclosed in note 26 to the financial statements.

The above investment in joint venture is indirectly held by the Company.

The following table illustrates the aggregate financial information of the Group's joint ventures that are not individually material:

	2023 RMB'000
Share of the joint ventures' loss for the year	(202,030)
Share of the joint ventures' other comprehensive income	109
Share of the joint ventures' total comprehensive loss	(201,921)
Aggregate carrying amount of the Group's investments in the joint ventures	78,910

	2023 RMB'000
Share of net assets	23,736,350
Goodwill on acquisition	757,478
Subtotal	24,493,828
Provision for impairment	(691,715)
Total	23,802,113

Movements in the provisions for impairment of investment in associates are as follows:

Provisions for impairment of	
Sovereign Medical Services, Inc.	
Saladax Biomedical, Inc.	
Mingyi Zhonghe Technology (Beijing) Co., Ltd.	
Integrated Endoscopy, Inc.	
Others	
Total	

Movements in the provisions for impairment of investment in associates are as follows: (Continued)

2023	At beginning of year RMB'000	Additions RMB'000	Disposals RMB'000	At end of year RMB'000
Provisions for impairment of

Particulars of the Group's principal associates are as follows:

		('000)	%	%	
Sinopharm Industrial Investment Co., Ltd. ( )	PRC/Chinese Mainland	RMB100,000	49.00	—	Pharmaceutical investment

* The English names of the companies registered in the PRC represent the best efforts of the management of the Company in directly translating the Chinese names of these companies.

The above table lists the associates of the Group which, in the opinion of the directors of the Company, principally affected the results of the Group for the year or formed a substantial portion of the net assets of the Group. To give details of other associates would, in the opinion of the directors of the Company, result in particulars of excessive length.

Sinopharm Industrial Investment Co., Ltd. ("Sinopharm Industrial"), which is considered a material associate of the Group, has significant impact on the share of profits and losses of associates and is accounted for using the equity method.

The following table illustrates the summarised financial information of Sinopharm Industrial, adjusted for any differences in accounting policies and reconciled to the carrying amount in the consolidated financial statements:

	2023 RMB'000
Revenue	596,569,565
Profit for the year	14,993,794
Other comprehensive income	8,395
Total comprehensive income for the year	15,002,189
Profit for the year attributable to owners of the parent of Sinopharm Industrial	4,553,856
Current assets	335,769,893
Non-current assets	47,566,886
Current liabilities	(241,419,075)
Non-current liabilities	(21,300,812)
Net assets	120,616,892
Net assets attributable to owners of the parent of Sinopharm Industrial	37,897,955
Reconciliation to the Group's interest in the associate:	
Proportion of the Group's ownership	49%
Group's share of net assets of the associate	18,569,998
Goodwill on acquisition (less cumulative impairment)	—
Carrying amount of the investment	18,569,998
Dividend received by the Group	633,947

The following table illustrates the aggregate financial information of the Group's associates that are not individually material:

	2023 RMB'000
Share of the associates' profit for the year	155,489
Share of the associates' other comprehensive income/(loss)	(6,825)
Share of the associates' total comprehensive income	148,664
Aggregate carrying amount of the Group's investments in the associates	5,232,115

	2023 RMB'000
Listed equity investments, at fair value	
Sichuan Huiyu Pharmaceutical Co., Ltd.	11,619
Others	41,155
Total	52,774

The above equity investments were irrevocably designated at fair value through other comprehensive income as the Group considers these investments to be strategic in nature.

The cumulative loss on transfer to retained earnings from derecognition of investments in other equity instruments for the year was RMB3,780,000.

During the year ended 31 December 2024, the Group received dividends in the amounts of RMB209,000 (2023: RMB203,000).

The movements in deferred tax assets/(liabilities) during the year are as follows:

At 31 December 2023	
Disposal of subsidiaries *(note 42)*	
Deferred tax credited/(charged) to the statement of profit or loss during the year	
Gross deferred tax assets at 31 December 2024	

The movements in deferred tax assets/(liabilities) during the year are as follows:

At 31 December 2023	
Disposal of subsidiaries *(note 42)*	
Deferred tax (credited)/charged to the statement of profit or loss during the year	
Deferred tax charged to reserves during the year	
Exchange differences	
Gross deferred tax liabilities at 31 December 2024	

The movements in deferred tax assets/(liabilities) during the year are as follows:

	Losses available for offsetting against future taxable profits RMB'000	Provision for impairment of assets RMB'000	Depreciation and amortisation RMB'000	Accrued expenses RMB'000	Unrealised profit RMB'000	Deferred income RMB'000	Fair value adjustments arising from acquisitions of subsidiaries RMB'000	Lease liabilities RMB'000	Total RMB'000

Effect of adoption of amendments to HKAS12	—	—						

Deferred tax assets have not been recognised in respect of the following items as they have arisen in subsidiaries that have been loss-making for some time and it is not considered probable that taxable profits will be available against which the following items can be utilised:

	2023 RMB'000
Tax losses	11,138,269
Deductible temporary differences	1,780,646
Total	12,918,915

There are no income tax consequences attaching to the payments of dividends by the Company to its shareholders.

	2023 RMB'000
Trade receivables	90,435
Impairment	(5,112)
Net carrying amount	85,323

Movements in the loss allowance for impairment of trade receivables are as follows:

	2023 RMB'000
At beginning of year	5,083
Impairment losses, net	901
Amounts written off as uncollectible	(939)
Exchange realignment	67
At end of year	5,112

	2023 RMB'000
Prepayments for purchase of items of property, plant and equipment	1,431,182
Prepayments for acquisitions of an associate company and subsidiaries	265,486
Prepayments for purchase of other intangible assets	694,566
Deposits for purchase of prepaid land lease payments	22,200
Loans to a related party	196,743
Others	96,451
Total	2,706,628

Included in the Group's other non-current assets are amounts due from a related party of the Group of RMB147,026,000 (2023: RMB966,942,000) arising from prepayments for purchase of items of property, plant and equipment. The balances were non-interest-bearing.

Shanghai Fosun Pharmaceutical Industry Development Co., Ltd. ("Industrial Development") provided an entrusted loan of RMB196,743,000 to Fosun Kite Biological Technology Co., Ltd. (now renamed Fosun Kairos (Shanghai) Biological Technology Co., Ltd. ("Fosun Kairos")), an associate at that time, with a fixed interest rate of 4.73%. On 31 October 2024, the Group completed the acquisition of its controlling interest. On 19 July 2024, Industrial Development signed the Debt for Equity and Capital Increase Agreement with Kite Pharma and Fosun Kairos, and Industrial Development and Kite Pharma respectively increased the capital of Fosun Kairos in the same proportion with their existing debt for equity swaps of equivalent USD28,500,000 to Fosun Kairos.

	2023 RMB'000
Raw materials	2,199,240
Work in progress	1,323,919
Finished goods	3,534,766
Spare parts and consumables	664,557
Others	80,622
	7,803,104
Provision	(265,336)
Total	7,537,768

	2023 RMB'000
Trade receivables	7,643,737
Bills receivable	24,492
Total	7,668,229

	2023 RMB'000
Debt investments at fair value through other comprehensive income	642,569

If an entity's business model for the management of bank notes is aimed at both the collection of contract cash flows and the sale, it is classified as financial assets measured at fair value through other comprehensive income.

The credit period for trade receivables is generally three months, which may be extended up to six months for major customers. Trade and bills receivables are non-interest-bearing.

An ageing analysis of trade receivables, based on the invoice date and net of loss allowance, as at the respective reporting dates is as follows:

	2023 RMB'000
Within 1 year	7,436,979
1 to 2 years	333,408
2 to 3 years	77,594
Over 3 years	64,952
Total	7,912,933
Impairment	(269,196)
Net Carrying Amount	7,643,737

The movements in the loss allowance for impairment of trade receivables are as follows:

	2023 RMB'000
At beginning of year	207,192
Impairment losses, net	109,461
Amounts written off as uncollectible	(47,457)
At end of year	269,196

An impairment analysis is performed at each reporting date using a provision matrix to measure expected credit losses. The provision rates are based on days past due for groupings of various customer segments with similar loss patterns (i.e., by geographical region, product type, customer type and rating, and coverage by letters of credit or other forms of credit insurance). The calculation reflects the probability-weighted outcome, the time value of money and reasonable and supportable information that is available at the reporting date about past events, current conditions and forecasts of future economic conditions.

Set out below is the information about the credit risk exposure on the Group's trade receivables using a provision matrix:

Included in the Group's trade receivables are amounts due from the Group's associates of RMB1,027,020,000 (2023: RMB1,037,217,000), the Group's joint ventures of nil (2023: RMB4,000) and other related companies of RMB18,977,000 (2023: RMB17,640,000). There was no bills receivable due from the Group's associates (2023: Nil). Included in the Group's debt investments at fair value through other comprehensive income are amounts due from the Group's associates of RMB151,610,000 (2023: RMB122,882,000). These balances due from associates, joint ventures and other related companies were trade in nature, non-interest-bearing and collectible on credit terms similar to those offered to the major customers of the Group.

	2023 RMB'000
Contract assets arising from:	
Research and development services	82,419
Profit-sharing	63,468
	145,887
Impairment allowance	—
Total	145,887

Contract assets are initially recognised for revenue earned from research and development services as the receipt of consideration is based on achieving of operational milestones under development plan. Included in contract assets for research and development services are retention receivables. Upon achievement of operational milestones, the amounts recognised as contract assets are reclassified to trade receivables.

Contract assets are initially recognised for revenue earned from profit-sharing as the receipt of consideration is based on profit earned by the customer from selling the product in the market. Upon achievement of settlement conditions, the amounts recognised as contract assets are reclassified to trade receivables.

During the year ended 31 December 2024, no allowance was recognised for expected credit losses on contract assets. The Group's trading terms and credit policy with customers are disclosed in note 26 to the financial statements.

The expected timing of recovery or settlement for contract assets as at 31 December is as follows:

	2023 RMB'000
Within one year	145,887

	2023 RMB'000
Advances to suppliers	884,582
Other receivables	1,373,622
	2,258,204
Impairment allowance	(42,175)
Total	2,216,029

An ageing analysis of prepayments, other receivables and other assets as at the respective reporting dates, net of loss allowance, is as follows:

	2023 RMB'000
Within 1 year	1,999,224
1 to 2 years	111,036
2 to 3 years	57,666
Over 3 years	90,278
	2,258,204
Less: Loss allowance for impairment of other receivables	(42,175)
Total	2,216,029

The changes in the impairment allowance for other receivables based on 12-month and the entire life expectancy expected credit losses are as follows:

		2023 RMB'000
Listed equity investments, at fair value		1,291,366
Other unlisted equity investments, at fair value	2,4106260	1,637,244
B Tm(1,637,244)TjETEMC /Span <</La16		

As at 31 December 2024, the cash and bank balances of the Group denominated in Renminbi ("RMB") amounted to RMB9,560,092,000 (2023: RMB10,236,879,000). The RMB is not freely convertible into other currencies. However, under Chinese Mainland's prevailing rules and regulations over foreign exchange, the Group is permitted to exchange RMB for other currencies through banks authorised to conduct foreign exchange business.

Cash at banks earns interest at floating rates based on daily bank deposit rates. Short-term time deposits are made for varying periods of between seven days and three months depending on the immediate cash requirements of the Group, and earn interest at the respective short-term time deposit rates. Term deposits with original maturity of more than three months earn interest at fixed interest rates for varying periods of between three months and one year. The bank balances and pledged deposits are deposited with creditworthy banks with no recent history of default. Details of interest earned on deposits in Fosun Finance are set out in note 47(e) to the financial statements.

On 21 June 2024, Fosun Diagnosis Technology (Shanghai) Co., Ltd., a subsidiary of the Company, reached an agreement with the controlling shareholder of Jiangsu Innova Medical Technology Co., Ltd. to dispose the 25% equity interest in Jiangsu Innova Medical Technology Co., Ltd. The consideration of the disposal was RMB47,500,000.

On 31 December 2024, Shanghai Fosun Health Technology (Group) Co., Ltd., a subsidiary of the Company, reached an agreement with an independent third party to dispose the 2.7937% equity interest in Tupai (Beijing) Medical Technology Co., Ltd. The consideration of the disposal was RMB50,287,000.

On 28 December 2024, Shanghai Futuo Biotechnology Development Co., Ltd., a subsidiary of the Company, reached an agreement with an independent third party to dispose the 12% equity interest in Xiansida (Nanjing) Biotechnology Co., Ltd. The consideration of the disposal was RMB50,000,000. After the completion of this transfer, Shanghai Futuo Biotechnology Development Co., Ltd. still holds RMB2,284,700 of registered capital of Xiansida (Nanjing) Biotechnology Co., Ltd., with a shareholding ratio of 17.3031% (the influencing factors of shareholding changes include the dilution of financing in the same period as this transfer).

The carrying value of assets of a disposal group classified as held for sale are presented below:

	2023 RMB'000

At 31 December		2,672,399	2,672,399

Note:

(i) On 7 August 2024, the 58th meeting of the 9th session of the board of directors and the 9th meeting of the 9th session of the Supervisory Committee in 2024 considered and approved the proposal on the repurchase and cancellation of some of the restricted A shares that have not been lifted. According to the authorization of the relevant shareholders' meeting and the relevant provisions of the restricted A share incentive scheme, it is agreed that the Company repurchase and cancel a total of 1,072,246 restricted A shares, Total repurchase price is RMB22,831,000 (of which interest expense is RMB3,000).

(ii) On 9 January 2024, the 42nd meeting of the 9th Board of Directors and the first meeting of the 9th Supervisory Committee in 2024 of our company respectively approved the proposal regarding the first phase of lifting the restrictions on the Restricted A Shares granted under the Restricted A Share Incentive Scheme. A total of 774,114 Restricted A Shares held by 113 incentive recipients have met the conditions for the first phase of lifting the restrictions as stipulated in the plan. It was agreed to lift the restrictions on these Restricted A Shares.

The amounts of the Group's reserves and the movements therein for the current and prior years are presented in the consolidated statements of changes in equity on pages 139 to 140 of the financial statements.

According to the relevant PRC regulations and the articles of association of the Company in the PRC, the Company is required to transfer 10% of its profit after income tax, as determined under the Chinese Accounting Standards, to the statutory surplus reserve until the reserve balance reaches 50% of its registered capital. The transfer to this reserve must be made before the distribution of dividends to equity owners. The statutory surplus reserve can be used to make good previous years' losses, if any, and may be converted into paid-in capital/issued share capital in proportion to the existing interests of equity owners, provided that the balance after such conversion is not less than 25% of its registered capital. This reserve is non-distributable other than in liquidation.

The major acquisitions of subsidiaries accounted for as business combinations are set out as follows:

On 22 October 2024, Fosun Pharmaceutical Industry Development (Shenzhen) Co., Ltd.* a subsidiary of the Company, acquired 100.00% equity interests in Shenzhen Fosun Pharmaceutical Technology Co., Ltd.* ("Shenzhen Fosun") from an independent third party. The consideration for the acquisition was RMB5,588,000. After the acquisition, the Group holds 100% equity interests in Shenzhen Fosun. The Group determined that the acquisition date of this transaction was 22 October 2024, and Shenzhen Fosun was included in the scope of consolidation from 22 October 2024.

On 31 October 2024, Shanghai Fosun Pharmaceutical Industry Development Co., Ltd.* a subsidiary of the Company, acquired 50.00% equity interests in Fosun Kairos (Shanghai) Biological Technology Co., Ltd.* ("Fosun Kairos") from Kite Pharma. The consideration for the acquisition was RMB192,549,000. After the acquisition, the Group holds 100% equity interests in Fosun Kairos. The Group determined that the acquisition date of this transaction was 31 October 2024, and Fosun Kairos was included in the scope of consolidation from 31 October 2024.

* The English names of the companies registered in the PRC represent the best efforts made by the management of the Company in directly translating the Chinese names of these companies.

The above acquisitions were undertaken under the Group's strategy to further improve the Group's pharmaceutical manufacturing, medical devices and medical diagnosis and health care service.

The Group has elected to measure the non-controlling interests in all the subsidiaries acquired at the non-controlling interests' proportionate share of the acquired subsidiaries' identifiable net assets.

The provisional fair values of the identifiable assets and liabilities of all the subsidiaries acquired as at the dates of acquisition were as follows:

	Notes	RMB'000
Property, plant and equipment	15	151,622
Right-of-use assets	16(a)	11,274
Other intangible assets	18	543,024
Inventories		32,315
Trade and bills receivables		2,328

The Company operated a share incentive scheme (the "Restricted A Share Incentive Scheme") for the purpose of providing incentives and rewards to eligible participants who contribute to the success of the Group's operations. Eligible participants of the Scheme include the Company's directors, including independent non-executive directors, other employees of the Group, suppliers of goods or services to the Group, customers of the Group, the Company's shareholders, and any non-controlling shareholder in the Company's subsidiaries. The Scheme became effective on 1 December 2022 and, will remain no longer than 5 years from that date.

Restricted A Share Incentive Scheme

The Restricted A Share Incentive Scheme was approved by the shareholders of the Company (the "Shareholders") at the 2022 second extraordinary general meeting of the Company, the 2022 second class meeting of A shareholders and the 2022 second class meeting of H shareholders convened on 29 November 2022. On 1 December 2022, relevant resolutions were considered and passed at the Company's 17th meeting of the 9th session of the board of directors and the 5th meeting of the 9th session of the Supervisory Committee, pursuant to which the date of grant for the A Share First Grant was set on 1 December 2022.

On 1 December 2022 (the "Date of Grant"), pursuant to the A Share First Grant of the Restricted A Share Incentive Scheme, 2,706,400 A shares of the Company were granted to 138 eligible participants of the Restricted A Share Incentive Scheme (the "Share Incentive Participants") at a grant price of RMB21.29 per share. The Share Incentive Participants include executive directors, the members of senior management of the Company, other mid-level management personnel, core technicians and other key personnel identified by the Board of Directors who have a direct impact on the overall performance and sustainable development of the Group.

126 out of 138 of the Share Incentive Participants have accepted and subscribed with their own funds under the Restricted A Share Incentive Scheme and a total of 2,501,400 Restricted A Shares (the "Restricted Shares") have been issued by the Company to the relevant Share Incentive Participants.

On 1 September 2023 (the "Date of Grant"), pursuant to the A Share Reserved Grant of the Restricted A Share Incentive Scheme, 417,600 A shares of the Company were granted to 94 eligible participants of the Restricted A Share Incentive Scheme (the "Share Incentive Participants") at a grant price of RMB21.29 per share. The Share Incentive Participants include the members of senior management of the Company, other mid-level management personnel, core technicians and other key personnel identified by the Board of Directors who have a direct impact on the overall performance and sustainable development of the Group.

80 out of 94 of the Share Incentive Participants have accepted and subscribed with their own funds under the Restricted A Share Incentive Scheme and a total of 371,600 Restricted A Shares (the "Restricted Shares") have been issued by the Company to the relevant Share Incentive Participants.

On 27 September 2023, the 35th meeting of the 9th Board of Directors and the 7th meeting of the 9th Supervisory Committee of the Company respectively approved the proposal on the repurchase and cancellation of locked Restricted A Shares. Due to the occurrence of the repurchase and cancellation circumstances stipulated in the incentive plan for 10 first-time granted incentive recipients (such as retirement at the age stipulated by the state and the Company or voluntary resignation), the Company agreed to repurchase and cancel a total of 129,500 Restricted A Shares that had been granted but not yet unlocked to these incentive recipients. The Company applied to reduce its registered capital by RMB129,500. The Company repaid RMB2,769,000 (including interest expenses of RMB12,000) to the 10 incentive recipients at a price of RMB21.29 per share in cash, and simultaneously reduced its share capital by RMB130,000 and its capital reserve by RMB2,628,000.

On 9 January 2024, the 42nd meeting of the 9th Board of Directors and the first meeting of the 9th Supervisory Committee in 2024 of our company respectively approved the proposal regarding the first phase of lifting the restrictions on the Restricted A Shares granted under the Restricted A Share Incentive Scheme. A total of 774,114 Restricted A Shares held by 113 incentive recipients have met the conditions for the first phase of lifting the

As at 14 April 2018, approved by the second extraordinary general meeting of Henlix, a subsidiary of the Company, passed a share incentive scheme and granted 22,750,000 restricted shares to eligible participants at a price of RMB9.21 per share. As at 10 December 2020, Henlix granted 2,780,700 restricted shares to eligible participants at a price of RMB9.21 per share. As at 7 April 2021, at 13 July 2021, and at 30 November 2021, Henlix granted 531,050 restricted shares to eligible participants at a price of RMB9.21 per share. The 531,050 shares of common stock granted in April, July and November 2021 are from restricted shares that were released from embargoes upon departure of share-incentive plan participants in 2018 and 2020. Henlix recognised an amount of RMB nil as related expenses for the year ended 31 December 2024 (2023: RMB2,627,000).

On 30 November 2021 and 2 December 2021, subsidiary Sisram granted 4,699,550 Restricted Shares to the incentive object, and on 4 September 2024, Sisram granted 1,320,300 Restricted Shares to the incentive object. 80,000 shares, 1,137,009 shares and 1,050,483 shares will be unlocked in 2021, 2022 and 2023 respectively, while 250,437 shares, 1,132,269 shares and 1,049,352 shares will be cancelled in 2022, 2023 and 2024 respectively due to performance failure. The total amortisation expense of Sisram Restricted Shares, a subsidiary of the Group, was reversed by RMB5,689,000 for the year ended 31 December 2024 (2023: Total amortisation expense of RMB3,469,000).

On 11 February 2022, the Board of Directors of the Company reviewed and approved the equity incentive plan for Fosun Health's directors and core management personnel; On 1 June 2022, the 2021 Annual General Meeting of the Group passed the Fosun Health Core Backbone Equity Incentive Plan (together with the Directors and Core Management Incentive Plan, the "Fosun Health Incentive Plan"). Fosun Health approved the incentive plan in 2022 and granted 43,590,000 restricted shares (at the grant price of RMB1/share) and 146,919,000 stock options (at the exercise price of RMB1/share) to eligible participants for the first time. Fosun Health approved the incentive plan in 2023 and granted 2,544,880 restricted shares (at the grant price of RMB1/share) and 64,192,020 stock options (at the exercise price of RMB1/share) to eligible participants. In 2024, due to employee departures, 2,460,000 restricted shares that have been granted but have not vested have been repurchased and 20,107,050 stock options that have been granted but have not vested have been cancelled. Fosun Health recognised an amount of RMB16,354,000 as related expenses for the year ended 31 December 2024 (2023: RMB19,223,000).

As at 1 January 2023 and 31 August 2023, Shanghai Jingshan Biotechnology Co., Ltd, a subsidiary of the Company, granted 565,000 and 426,612 share options to the incentive subjects respectively at the exercise price of RMB1 per share. The total amount of amortization expense carried back to the Group's subsidiary Shanghai Jinghizi Biotechnology Co., LTD., was RMB51,000 for the year ended 31 December 2024 (2023: Total amortization expense was RMB814,000).

On 27 August 2024, the Board of Directors of the Company reviewed and approved the first phase of Fosun Adgenvax equity Incentive Plan, granted 2,825,366 shares options to incentive subjects in 2024 at an exercise price of RMB20.60 per share. Fosun Adgenvax recognised an amount of RMB4,517,000 as related expenses for the year ended 31 December 2024.

Trade receivables-non-current	85,323	86,341
Total	3,709,276	3,710,294
Non-current portion of interest-bearing bank borrowings	13,504,923	13,806,197
Interest-bearing other borrowings	499,908	497,804
Financial liabilities included in other long-term liabilities	2,964,353	2,964,353
Total	16,969,184	17,268,354

Management has assessed that the fair values of cash and bank balances, trade and bills receivables, trade and bills payables, financial assets included in prepayments, other receivables and other assets, financial assets included in other non-current assets and financial liabilities included in other payables and accruals approximate to their carrying amounts largely due to the short term maturities of these instruments or the interest rate is approximate to the discount rate of current market.

The Group's finance department headed by the finance manager is responsible for determining the policies and procedures for the fair value measurement of financial instruments. The finance manager reports directly to the chief financial officer and the audit committee. At each reporting date, the finance department analyses the movements in the values of financial instruments and determines the major inputs applied in the valuation. The valuation is reviewed and approved by the chief financial officer.

The fair values of the financial assets and liabilities are included at the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale. The following methods and assumptions were used to estimate the fair values:

The fair values of the non-current portion of interest-bearing bank and other borrowings have been calculated by discounting the expected future cash flows using rates currently available for instruments with similar terms, credit risk and remaining maturities. The changes in fair value as a result of the Group's own non-performance risk for the non-current portion of interest-bearing bank and other borrowings as at 31 December 2024 was assessed to be insignificant.

The fair values of listed corporate bond issued by the Company and equity investments without a lock-up period are based on quoted market prices. The fair values of listed equity investments with a lock-up period have been estimated based on assumptions that are supported by observable market prices and discount for lack of marketability. The directors believe that the estimated fair values resulting from the valuation technique, which are recorded in the consolidated statement of financial position, and the related changes in fair values, which are recorded in other comprehensive income or profit or loss, are reasonable, and that they were the most appropriate values at the end of the reporting period.

Below is a summary of significant unobservable inputs to the valuation of financial instruments as at 31 December 2024:

The financial assets measured at fair value held by the Group which were classified in Level 3 primarily correspond to unlisted equity investments not quoted in an active market.

For the fair value of the unlisted equity investments is based on valuation techniques for which the input that is significant to the fair value measurement is unobservable. For certain unlisted equity investments, the Group adopts quotation from counterparties' quotations or valuation techniques to determine the fair value. Valuation techniques include a discounted cash flow analysis, the market comparison approach, etc. The fair value measurement of these financial instruments may involve unobservable inputs such as liquidity discount. Fair value change resulting from changes in the unobservable inputs was not significant. The Finance Department periodically reviews all significant unobservable inputs and valuation adjustments used to measure the fair values of financial instruments in Level 3.

Significant unobservable valuation input for the share redemption option granted to non-controlling shareholders of subsidiaries included in other long-term liabilities of RMB1,427,655,000 (31 December 2023: RMB1,601,368,000 included in other long-term liabilities) is the progress of research and development activities or net profit of the subsidiaries.

Included in other non-current liabilities are other financial liabilities of RMB536,295,000 (2023: RMB878,407,000). Significant unobservable valuation input is value of net assets of subsidiaries.

The following tables illustrate the fair value measurement hierarchy of the Group's financial instruments:

Assets measured at fair value:

		Fair value measurement using		
	Quoted prices in active markets (Level 1)	Significant observable inputs (Level 2)	Significant unobservable inputs (Level 3)	Total
Financial assets at fair value through profit or loss *(note 29)*				
Equity investments designated at fair value through other comprehensive income *(note 21)*				
Debt investments at fair value through other comprehensive income

The Group's principal financial instruments comprise interest-bearing bank and other borrowings and cash and bank balances. The main purpose of these financial instruments is to raise finance for the Group's operations. The Group has various other financial assets and liabilities such as trade and bills receivables and trade and bills payables, which arise directly from its operations.

The main risks arising from the Group's financial instruments are interest rate risk, foreign currency risk, credit risk, liquidity risk and equity price risk. The board of directors reviews and agrees policies for managing each of these risks and they are summarised below.

The Group's exposure to the risk of changes in market interest rates relates primarily to the Group's long term debt obligations with floating interest rates.

The Group's policy is to manage its interest cost using a mix of fixed and floating rate debts.

As at 31 December 2024, the total interest-bearing bank borrowings of RMB13,331,488,000 (31 December 2023: RMB15,215,190,000) of the Group were with floating interest rates denominated in RMB, USD or EUR.

The following table demonstrates the sensitivity to a reasonably possible change in interest rates, with all other variables held constant, of the Group's profit after tax through the impact on floating rate borrowings.

Increase/(decrease) in the Group's profit after tax

If RMB strengthens against HKD	(5)	(32,196)

The Group trades only with related companies and recognised and creditworthy third parties. It is the Group's policy that all customers who wish to trade on credit terms are subject to credit verification procedures. In addition, receivable balances are monitored on an ongoing basis and the Group's exposure to bad debts is not significant.

The credit risk of the Group's other financial assets, which comprise cash and bank balances, and deposits and other receivables, arises from the default of the counterparties, with a maximum exposure equal to the carrying amounts of these instruments.

Maximum exposure and year-end staging

The tables below show the credit quality and the maximum exposure to credit risk based on the Group's credit policy, which is mainly based on past due information unless other information is available without undue cost or effort, and year-end staging classification as at 31 December. The amounts presented are gross carrying amounts for financial assets and the exposure to credit risk for the financial guarantee contracts.

* For trade and bills receivables to which the Group applies the simplified approach for impairment, information based on the provision matrix is disclosed in note 26 to the financial statements, respectively.

** The credit quality of the financial assets included in prepayments, other receivables and other assets is considered to be "normal" when they are not past due and there is no information indicating that the financial assets had a significant increase in credit risk since initial recognition. Otherwise, the credit quality of the financial assets is considered to be "doubtful".

Further quantitative data in respect of the Group's exposure to credit risk arising from trade receivables are disclosed in note 26 to the financial statements.

Since the Group trades only with recognised and creditworthy third parties, there is no requirement for collateral. Concentrations of credit risk are managed by customer/counterparty, by geographical region and by industry sector. There are no significant concentrations of credit risk within the Group as the customer bases of the Group's trade receivables are widely dispersed in different sectors and industries.

The Group's objective is to maintain a balance between continuity of funding and flexibility through the use of bank loans and other interest-bearing borrowings. As at 31 December 2024, 69% (31 December 2023: 53%) of the Group's borrowings would mature in less than one year based on the carrying values of the borrowings.

The maturity profile of the Group's financial liabilities as at the end of the reporting period, based on the contractual undiscounted payments, is as follows:

Interest-bearing bank and	

Equity price risk is the risk that the fair values of equity securities decrease as a result of changes in the levels of equity indices and the value of individual securities. The Group is exposed to equity price risk arising from individual equity investments included in financial assets at fair value through profit or loss (note 29) and equity investments at fair value through other comprehensive Income (note 21) as at 31 December 2024. The Group's listed investments are listed on the stock exchanges in Shanghai, Shenzhen, Hong Kong, New York, NASDAQ and Korea which are valued at quoted market prices or using valuation techniques at the end of the reporting period.

The following table demonstrates the sensitivity to a reasonably possible change in the fair values of the equity investments, with all other variables held constant and after any impact on tax, based on their carrying amounts at the end of the reporting period. For the purposes of this analysis, for the equity investments at fair value through other comprehensive income, the impact is deemed to be on the fair value reserve revaluation reserve, respectively.

* Excluding retained profits

The primary objectives of the Group's capital management are to safeguard the Group's ability to continue as a going concern and to maintain healthy capital ratios in order to support its business and maximise shareholders' value.

The Group manages its capital structure and makes adjustment to it in light of changes in economic conditions. To maintain or adjust the capital structure, the Group may adjust the dividend payment to shareholders, return capital to shareholders or issue new shares. No changes were made in the objectives, policies or processes for managing capital during the years ended 31 December 2024 and 31 December 2023.

The Group monitors capital using a gearing ratio, which is net debt divided by total equity plus net debt. Net debt includes interest-bearing bank and other borrowings, other long-term liabilities less cash and cash equivalents. Total equity includes equity attributable to owners of the parent and non-controlling interests. The gearing ratios as at the end of the reporting periods were as follows:

	2023 RMB'000
Interest-bearing bank and other borrowings *(note 34)*	32,573,741
Less: Cash and bank balances *(note 30)*	(13,693,591)
Net debt	18,880,150
Total equity	56,577,885
Total equity and net debt	75,458,035
Gearing ratio	25%

On 13 March 2025, Fosun Industrial Co., Limited ("Fosun Industrial"), a subsidiary of the Company, entered into a Share Purchase Agreement with Calcite Gem Investments Group Ltd ("Calcite Gem"). Fosun Industrial intends to transfer 9.4 million ordinary shares, representing approximately 6.6% of the total shares of Unicorn II Holdings Limited, to Calcite Gem for a cash consideration of USD124.08 million. Upon completion of this transaction, the Group will no longer hold any equity interest in the company.

Information about the statement of financial position of the Company at the end of the reporting period is as follows:

	31 December 2023 RMB'000
Property, plant and equipment	6,945
Other intangible assets	1,346
Investments in subsidiaries	14,905,688
Investments in associates	7,477,556
